

February 17, 2009

TO: Members of the MAG Regional Council

FROM: Councilmember Peggy Neely, Phoenix, Chair

SUBJECT: MEETING NOTIFICATION AND TRANSMITTAL OF TENTATIVE AGENDA

Meeting - 5:00 p.m.

Wednesday, February 25, 2009
MAG Office, Suite 200 - Saguaro Room
302 North 1st Avenue, Phoenix

Dinner - 6:30 p.m.

MAG Office, Suite 200

The next MAG Regional Council meeting will be held at the MAG offices at the time and place noted above. Members of the Regional Council may attend either in person, by videoconference or by telephone conference call. Members who wish to remove any items from the Consent Agenda are requested to contact the MAG office. MAG will host a dinner/reception for the Regional Council members following the meeting in the MAG Cholla Room on the 2nd floor. Supporting information is enclosed for your review.

Please park in the garage underneath the building. Parking places will be reserved for Regional Council members on the first and second levels of the garage. Bring your ticket to the meeting, parking will be validated. For those using transit, the Regional Public Transportation Authority will provide transit tickets for your trip. For those using bicycles, please lock your bicycle in the bike rack in the garage.

Pursuant to Title II of the Americans with Disabilities Act (ADA), MAG does not discriminate on the basis of disability in admissions to or participation in its public meetings. Persons with a disability may request a reasonable accommodation, such as a sign language interpreter, by contacting the MAG office. Requests should be made as early as possible to allow time to arrange the accommodation.

If you have any questions, please call the MAG office.

c: MAG Management Committee

**MAG REGIONAL COUNCIL
TENTATIVE AGENDA
February 25, 2009**

COUNCIL ACTION REQUESTED

1. Call to Order

2. Pledge of Allegiance

3. Call to the Audience

An opportunity will be provided to members of the public to address the Regional Council on items not scheduled on the agenda that fall under the jurisdiction of MAG, or on items on the agenda for discussion but not for action. Citizens will be requested not to exceed a three minute time period for their comments. A total of 15 minutes will be provided for the Call to the Audience agenda item, unless the Regional Council requests an exception to this limit. Please note that those wishing to comment on agenda items posted for action will be provided the opportunity at the time the item is heard.

4. Executive Director's Report

The MAG Executive Director will provide a report to the Regional Council on activities of general interest.

5. Approval of Consent Agenda

Council members may request that an item be removed from the consent agenda. Prior to action on the consent agenda, members of the audience will be provided an opportunity to comment on consent items. Consent items are marked with an asterisk (*).

3. Information.

4. Information and discussion.

5. Approval of the Consent Agenda.

ITEMS PROPOSED FOR CONSENT*

MINUTES

*5A. Approval of the January 28, 2009, Meeting Minutes

5A. Review and approval of the January 28, 2009, meeting minutes.

TRANSPORTATION ITEMS***5B. Recommendation to ADOT's Safe Routes to School Program**

A total of \$2,255,000 is available statewide for safety improvement projects through grants from the Arizona Department of Transportation's (ADOT) Safe Routes to School (SRTS) Program. The program provides grants to public and non-profit agencies for projects that improve road safety and encourage more K-8 children to walk or bike to their neighborhood schools. This is the third cycle of the program, and grants will be provided to projects that implement infrastructure improvements as well as projects that would involve education, training and encouragement. In response to the ADOT request for proposals announced in October 2008, a total of 17 project applications from the MAG region was received by ADOT. The ADOT proposal review process stipulates that MPOs and COGs are required to recommend a ranked list of projects to ADOT by February 28, 2009. These recommendations will be considered by a statewide SRTS panel that will make a final recommendation to ADOT. The MAG Transportation Safety Committee reviewed all project proposals, and on January 27, 2009, recommended a ranked list of projects from the region as the MAG recommendation to ADOT. The MAG Management Committee concurred with the recommendation. Please refer to the enclosed material.

***5C. Pedestrian and Bicycle Design Assistance Programs**

The FY 2009 MAG Unified Planning Work Program and Annual Budget, approved by the MAG Regional Council in May 2008, includes \$150,000 for the Pedestrian Design Assistance Program and \$250,000 for the Bicycle/Shared-Use Design Assistance program. According to federal law, any project which is not constructed after being designed with federal transportation funds could be required to return the funds used for design to the Federal Highway Administration. Eight project applications were

5B. Approval of the ranked list of projects to be submitted to the Arizona Department of Transportation for the Safe Routes to School Program.

5C. Approval of the following projects for funding for the Pedestrian Design Assistance Program: Phoenix - 11th Street Streetscape in Historic Garfield District (\$80,000); and Fountain Hills - Saguaro Ranch Park (\$70,000); and recommend approval of the following projects for the Bicycle/Shared-Use Design Assistance Program: Tempe/Mesa Rio Salado Shared-Use Path (\$142,000); Buckeye - BID Canal Multi-Use Path (\$58,000); and Glendale - Neighborhood Access Improvements for Multi-Use Pathways (\$50,000).

submitted by member agencies for the program. On January 20, 2009, the MAG Bicycle Task Force and the MAG Pedestrian Working Group recommended five projects for approval. The MAG Transportation Review Committee and the MAG Management Committee recommended the five Design Assistance projects for approval. Please refer to the enclosed material.

AIR QUALITY ITEMS

*5D. Conformity Consultation

A list of projects for an amendment and administrative modification to the FY 2008-2012 MAG Transportation Improvement Program, and as appropriate, to the Regional Transportation Plan 2007 Update may be developed following the passage of the federal American Recovery and Reinvestment Act of 2009 into law. In response to the expedited time frames for transportation projects in the Act, the Maricopa Association of Governments will conduct consultation on a conformity assessment if projects are submitted for a proposed amendment and administrative modification. It is anticipated that the proposed amendment may include projects that may be categorized as exempt from a conformity determination and administrative modifications that do not require a conformity determination.

*5E. MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan for the Maricopa Nonattainment Area

The MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan demonstrates that the eight-hour ozone standard of .08 parts per million will continue to be met through 2025 with existing measures in place. This standard was established by the Environmental Protection Agency in 1997. No violations of this ozone standard have occurred since 2004. The Environmental Protection Agency is being requested to redesignate this area to attainment status. The MAG Air Quality Technical Advisory Committee and the MAG Management Committee recommended adoption of the MAG

5D. Consultation.

5E. Adoption of the MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan for the Maricopa Nonattainment Area.

Eight-Hour Ozone Redesignation Request and Maintenance Plan for the Maricopa Nonattainment Area. Please refer to the enclosed material.

GENERAL ITEMS

*5F. MAG Regional Human Services Plan for FY 2010

The MAG Regional Human Services Plan approved by the MAG Regional Council in 2006, has been updated to reflect funding allocation recommendations for the Social Services Block Grant (SSBG) and to identify new human services transportation coordination goals as required by SAFETEA-LU. The plan also presents an assessment of human services delivery in the region while highlighting useful practices implemented by member agencies to address the impact of the economy on human services. On January 8, 2009, the MAG Human Services Technical Committee recommended approval of the SSBG allocation recommendations and the major elements to be included in the MAG Regional Human Services Plan for FY 2010. On January 20, 2009, the MAG Human Services Coordinating Committee recommended approval of the MAG Regional Human Services Plan for FY 2010 including the new human services transportation coordination goals and the SSBG allocation recommendations. The MAG Management Committee concurred with the recommendation of the Committee. Please refer to the enclosed material.

*5G. MAG Continuum of Care Regional Committee on Homelessness Regional Plan to End Homelessness

The MAG Regional Plan to End Homelessness, developed by the MAG Continuum of Care Regional Committee on Homelessness, was approved by the MAG Regional Council in 2005. The MAG Continuum of Care Regional Committee on Homelessness, with more than 70 stakeholders, has developed a new Regional Plan that takes a fresh look at the issues surrounding homelessness in the region with goals and action steps to address homelessness in the community. The MAG Continuum of Care Regional

5F. Approval of the MAG Regional Human Services Plan for FY 2010, which includes recommending approval of the Social Services Block Grant allocation recommendations and the new human services transportation coordination goals.

5G. Approval of the MAG Continuum of Care Regional Committee on Homelessness Regional Plan to End Homelessness.

Committee on Homelessness and the MAG Management Committee recommended approval of the Regional Plan. Please refer to the enclosed material.

*5H. Development of the FY 2010 MAG Unified Planning Work Program and Annual Budget

Each year, the MAG Unified Planning Work Program and Annual Budget is developed in conjunction with member agency and public input. The Work Program is reviewed each year by the federal agencies in April and approved by the Regional Council in May. To provide an early start in developing the Work Program and Budget, staff is providing a draft of the program's proposed new projects. These projects will continue to be reviewed and refined leading up to the adoption of the FY 2010 MAG Unified Planning Work Program and Annual Budget in May. To gain additional input, a Budget Webinar is scheduled for February 19, 2009. Please refer to the enclosed material.

5H. Information.

ITEMS PROPOSED TO BE HEARD

TRANSPORTATION ITEMS

6. Reinvestment and Recovery Act Update

On February 17, 2009, President Obama signed the Reinvestment and Recovery Act. The national Highway Infrastructure Investment component of the legislation is \$27.5 billion. The State of Arizona is expected to receive \$521.9 million for highway infrastructure. For transit, \$8.4 billion was allocated nationally. Arizona is expected to receive \$100.5 million. The legislation contains \$1.5 billion nationally for a competitive grants component.

For the highway portion, the Arizona Department of Transportation (ADOT) has 120 days to obligate 50 percent of the funding. The ADOT portion is \$349.7 million plus \$15.66 million for transportation enhancements. The legislation also sub-allocates 30 percent of the funding (\$156.57 million) to local jurisdictions. The amount being suballocated to MAG has not been officially

6. Information, discussion and possible action.

transmitted yet by the Federal Highway Administration, however, MAG staff believes about \$88 million would be allocated directly to the MAG region. Metropolitan Planning Organizations have one year to obligate the funds.

The regional portion for transit is in the range of \$65 million to \$75 million. The legislation requires that 50 percent of the transit funds be obligated within 120 days. Transit planning staff has a working group meeting scheduled for February 19, 2009, to review potential projects for funding.

The federal planning requirements for the funds remain. Federal law requires that the financial plan be developed by the MPO in cooperation with the state and transit operator. The state and transit operator must provide the MPO with estimates of available federal and state funds. Also, projects for federal discretionary funds need to be cooperatively developed between MAG and ADOT. MAG has been holding workshops to further refine the list of projects to determine which projects are ready to implement. Coordination is ongoing with ADOT to determine the ADOT discretionary amount for this region and the projects to be selected. A report will be provided to the Transportation Policy Committee on February 18, 2009, regarding the progress being made on the revenue estimate and the selection of projects. The State Transportation Board will be meeting on these issues on February 20, 2009.

Depending on the progress being made, the ADOT discretionary projects for this region may be ready for consideration. This is important due to the shorter time frame for ADOT to obligate projects (120 days). The transit projects also have a short time period to obligate transit projects (180 days). If agreement is reached on the transit projects, possible action may be considered. It is anticipated that updated information will be forwarded following the mailing of the agenda. It is expected that the projects for suballocation may be ready at a future

meeting. The TPC will discuss the suballocation process at its meeting on February 18, 2009, and a report will be provided to the Regional Council.

7. Project Changes – Amendment and Administrative Modification to the FY 2008-2012 MAG Transportation Improvement Program for Funding from the American Recovery and Reinvestment Act of 2009

On February 13, 2009, the United States Senate and House of Representatives passed the American Recovery and Reinvestment Act of 2009. Presidential action is expected the week of February 17, 2009. The components of the bill and policy implications were discussed in a separate agenda item: Federal Economic Recovery/Stimulus Update. In response to the expedited time frames for transportation projects in the Act, amending and administratively modifying the 2008-2012 Transportation Improvement Program (TIP) and, as appropriate, the Regional Transportation Plan (RTP) 2007 Update, may be necessary to move projects forward. The FY 2008-2012 TIP and RTP 2007 Update were originally approved by the MAG Regional Council on July 25, 2007. MAG staff and MAG member agencies have been working collaboratively together through working group meetings on reviewing projects. It is anticipated that a proposed list of projects to be programmed with the Economic Recovery/Stimulus funds may be developed prior to the Regional Council meeting. If a proposed list of projects is drafted, it will be transmitted to the Regional Council.

8. Transportation Planning Update

Staff will present an update of the financial status of the MAG Freeway Program, introduce the peer review process that is currently underway to look at the planned freeway projects in the central area, and provide a summary of the specific corridors and project components that could be changed or delayed as updates to the Regional Transportation Plan, and revised schedule for the freeway program update process.

7. Information, discussion and possible action to amend and make administrative modifications to the FY 2008-2012 MAG Transportation Improvement Program for funding from the American Recovery and Reinvestment Act of 2009.

8. Information and discussion.

AIR QUALITY ITEMS9. Proposed Strawman Option for a Revised Eight-Hour Ozone Nonattainment Area Boundary

By March 12, 2009, the Governor is required to recommend nonattainment area boundaries to the Environmental Protection Agency (EPA) for the revised eight-hour ozone standard. The Environmental Protection Agency had strengthened the standard by lowering it from .08 parts per million to .075 parts per million on March 12, 2008. The Arizona Department of Environmental Quality (ADEQ) has been conducting a stakeholder process to discuss a Strawman Option for a Revised Eight-Hour Ozone Nonattainment Area Boundary. The ADEQ is proposing to extend the boundary only where absolutely necessary, primarily to include some power plants. The deadline for submitting comments on the Strawman Option to ADEQ is the close of business on February 26, 2009. Following the consideration of comments, ADEQ will make a recommendation to the Governor. Please refer to the enclosed material.

9. Information, discussion and possible action.

GENERAL ITEMS10. Legislative Update

An update will be provided on legislative issues of interest.

10. Information and discussion.

11. Comments from the Council

An opportunity will be provided for Regional Council members to present a brief summary of current events. The Regional Council is not allowed to propose, discuss, deliberate or take action at the meeting on any matter in the summary, unless the specific matter is properly noticed for legal action.

11. Information.

**MINUTES OF THE
MARICOPA ASSOCIATION OF GOVERNMENTS
REGIONAL COUNCIL MEETING**

January 28, 2009
MAG Office, Saguaro Room
Phoenix, Arizona

MEMBERS ATTENDING

Councilmember Peggy Neely, Phoenix, Chair	Supervisor Max W. Wilson, Maricopa County
Mayor Thomas Schoaf, Litchfield Park, Vice Chair	Mayor Scott Smith, Mesa
# Councilmember Robin Barker, Apache Junction	# Mayor Vernon Parker, Paradise Valley
Mayor Marie Lopez Rogers, Avondale	Mayor Bob Barrett, Peoria
Mayor Jackie Meck, Buckeye	# Mayor Arthur Sanders, Queen Creek
Mayor Wayne Fulcher, Carefree	* President Diane Enos, Salt River Pima-Maricopa Indian Community
Councilmember Dick Esser, Cave Creek	* Mayor Jim Lane, Scottsdale
Mayor Boyd Dunn, Chandler	Vice Mayor Joe Johnson for Mayor Lyn Truitt, Surprise
Mayor Fred Waterman, El Mirage	# Mayor Hugh Hallman, Tempe
* President Clinton Pattea, Fort McDowell Yavapai Nation	# Mayor Adolfo Gamez, Tolleson
# Mayor Jay Schlum, Fountain Hills	# Mayor Kelly Blunt, Wickenburg
# Mayor Fred Hull, Gila Bend	Mayor Michael LeVault, Youngtown
Lt. Governor Joseph Manuel for Governor William Rhodes, Gila River Indian Community	* Felipe Zubia, State Transportation Board
* Mayor Steven Berman, Gilbert	Victor Flores, State Transportation Board
# Mayor Elaine Scruggs, Glendale	David Martin, Citizens Transportation Oversight Committee
Mayor James M. Cavanaugh, Goodyear	
* Mayor Frank Montiel, Guadalupe	

* Those members neither present nor represented by proxy.

Attended by telephone conference call.

+ Attended by videoconference call.

1. Call to Order

The meeting of the MAG Regional Council was called to order by Vice Chair Peggy Neely at 5:05 p.m.

2. Pledge of Allegiance

Councilmember Dick Esser led the Pledge of Allegiance.

Vice Chair Neely noted that Councilmember Robin Barker, Mayor Jay Schlum, Mayor Fred Hull, Mayor Elaine Scruggs, Mayor Vernon Parker, Mayor Adolfo Gamez, Mayor Kelly Blunt, and Mayor Arthur Sanders were participating by teleconference.

Vice Chair Neely noted that this was the first Regional Council meeting for Mayor Kelly Blunt. She welcomed him to the MAG Regional Council and said that his Regional Council membership certificate would be sent to him.

Vice Chair Neely introduced Lt. Governor Joseph Manuel as proxy for Governor William Rhodes and Vice Mayor Joe Johnson as proxy for Mayor Lyn Truitt.

Vice Chair Neely noted items at each place: A memorandum reporting actions taken by the Transportation Policy Committee on #5C and #7; the addendum to the agenda, item #5K; and revised material for agenda items #5C and #5D.

Vice Chair Neely requested that members of the public who would like to comment fill out a blue public comment card for Call to the Audience or a yellow public comment card for Consent Agenda items or items on the agenda for action. She said that parking garage validation and transit tickets for those who used transit to attend the meeting were available.

3. Call to the Audience

Vice Chair Neely noted that public comment cards were available to members of the audience who wish to speak on items not scheduled on the agenda that fall under the jurisdiction of MAG, or on items on the agenda for discussion but not for action. Citizens are requested to not exceed a three minute time period for their comments. A total of 15 minutes is provided for the Call to the Audience agenda item, unless the Regional Council requests an exception to this limit. Those wishing to comment on agenda items posted for action will be provided the opportunity at the time the item is heard. Vice Chair Neely noted that no public comment cards had been received.

4. Executive Director's Report

Dennis Smith, MAG Executive Director, provided a report to the Regional Council on activities of interest. He said that leading up to this meeting, there were several inquiries about potential changes to MAG and how MAG could be improved. Mr. Smith noted one year ago, during the goal setting process, Mayor Lopez Rogers and Mayor Schoaf advocated for clarification to MAG's rules and procedures. He stated that staff began to draft a rules and procedures book, which was estimated to be a two-year project. Mr. Smith stated that they are now accelerating the book to a six-month project. Mr. Smith displayed a bell curve that illustrated the phases of building high-performance organizations, their growth cycles, how they can decline, and what to do about it. Mr. Smith pointed out the phases when MAG began, when Proposition 300 was passed, when Proposition 400 was passed, and its current phase at the top of the bell curve. Mr. Smith stated that the challenge is how an organization remains at the top of the curve.

Mr. Smith explained how this has worked at MAG, through points of renewal that occurred approximately every five years. He stated that these include the performance audit in 1990 to 1991, when the relationship between MAG and ADOT was defined and the Regional Council was established as the decision makers for material cost estimates and defining priorities. Mr. Smith noted that the next renewal point occurred in approximately 1996, when Mayor Scruggs was Regional Council Chair and expressed that MAG needed more procedures to guide its operations. Mr. Smith stated that MAG underwent the re-engineering of the MAG policy process. He said that a number of recommendations through this process were implemented, including the format for the transmittal summary for agenda items, which shows the record of how each agency's committee member voted on the item.

Mr. Smith stated that the next cycle occurred in 2001, when Mayor Skip Rimsza was Chair and he expressed that if MAG wanted to pursue an extension of the half-cent sales tax, it would need to change. Mr. Smith said that in response, the Governance Task Force and Governance Advisory Committee process was conducted, resulting in the implementation of recommendations in 2002, which included formation of the Transportation Policy Committee and expansion of the Executive Committee. Mr. Smith stated that this was an example of the Regional Council taking the organization and molding it the way they wanted.

Mr. Smith stated that MAG is now at the point where the policies and procedures book is being developed. He said that MAG is the Regional Council's organization and their input is how MAG stays healthy, otherwise an organization remains at the point where it does not learn and renew itself.

Vice Chair Neely stated that Mr. Smith had received several letters requesting a new look at MAG's procedures and she discussed with some Regional Council members what they would like to see. She requested that the process be conducted with full transparency and get all of the input possible. Vice Chair Neely stated that the procedures book would be on the next Executive Committee agenda and the Committee would discuss how to move forward. No questions from the Council for Mr. Smith were noted.

5. Approval of Consent Agenda

Vice Chair Neely noted that agenda items #5A through #5K were on the Consent Agenda. She noted that no public comment cards had been received. Vice Chair Neely asked members if they had questions or requests to hear an item individually. None were noted.

Vice Chair Neely called for a motion to approve Consent Agenda items #5A, #5B, #5C, #5D, #5E, #5F, #5G, #5H, #5I, #5J, and #5K. Mayor Cavanaugh moved, Mayor Hallman seconded, and the motion passed unanimously.

5A. Approval of the December 3, 2008, Meeting Minutes

The Regional Council, by consent, approved the December 3, 2008, meeting minutes.

5B. Appointment of Mayor Jim Lane, City of Scottsdale, to Serve as One of the Seven Largest Cities/Towns Elected Officials on the Transportation Policy Committee

The Regional Council, by consent, appointed Mayor Jim Lane, Scottsdale, as the one of the seven largest cities/towns elected officials on the Transportation Policy Committee. The composition of the Transportation Policy Committee (TPC), established by the Regional Council on April 24, 2002, includes elected officials from the seven largest cities/towns. In June 2008 the Regional Council appointed the list of TPC members. Since that time, the City of Scottsdale seat has become vacant. Mayor Jim Lane from the City of Scottsdale has expressed interest in serving as Scottsdale's representative on the TPC. The appointment of Mayor Jim Lane to the TPC by the Regional Council as one of the seven largest cities/towns elected officials was requested.

5C. Project Changes – Amendments, and Administrative Modifications to the FY 2008-2012 MAG Transportation Improvement Program, FY 2009 Arterial Life Cycle Program, and Material Cost Changes to the ADOT Program

The Regional Council, by consent, approved amendments and administrative modifications to the FY 2008-2012 Transportation Improvement Program, the FY 2009 Arterial Life Cycle Program, as appropriate, to the Regional Transportation Plan 2007 Update, and material cost changes to the ADOT Program as shown in tables A, B, C, and D. The FY 2008-2012 Transportation Improvement Program (TIP) was approved by the MAG Regional Council on July 25, 2007, and the FY 2009 Arterial Life Cycle Program (ALCP) was approved by the MAG Regional Council on June 25, 2008. Since that time, there have been requests from member agencies to modify projects in the programs. The proposed amendments to the FY 2008-2012 TIP for highway projects are listed in Table A, and proposed administrative modifications to the ALCP are listed in Table B. As per the Draft MAG Federal Fund Programming Principles, a request to change a programmed Federal Fund Project in the TIP will go through the MAG committee processes beginning at the appropriate technical advisory committee. There is one CMAQ-funded project requesting a project change. The project change request for PHX12-859 (Table A) was heard and unanimously recommended for approval at the October 21, 2008 Pedestrian Working Group and the Regional Bicycle Task Force meeting. Projects DOT08-812 and DOT08-813 are projects that the MAG Regional Council approved in December 2006 to be funded from the Statewide Transportation Acceleration Needs (STAN) account. The increase of funds per each project can be made without causing a fiscal impact to the MAG Freeway Program since another STAN project (SR101L: HOV Lanes from Tatum Blvd. to Princess Dr.) was bid at \$12.2 million less than the original budget. This change was approved by the Regional Council on December 3, 2008. These project changes are included in this agenda item because they need to be reflected in the FY 2008-2012 MAG TIP. There are six Arizona Department of Transportation (ADOT) projects in Table A (as annotated) that require Regional Council approval of a Material Cost Change to the ADOT Program. According to A.R.S. 28-6353, it is required that MAG approve any change in priorities, new projects, or requests for changes that would materially increase Freeway Program costs. According to the MAG Material Cost Change policy, a material cost change is defined as: 'An increase in the cost of a project that is more than five (5) percent of the adopted project budget, but not less than \$500,000 or any increase greater than \$2.5 million. In December 2008, the Transportation Review Committee (TRC) unanimously recommended approval of the changes to projects listed in Tables A and B. In addition

to the projects approved at TRC, two project change requests were received following the mailout of the MAG Management Committee agenda on January 6, 2009. The ITS Committee met on January 7, 2009 and unanimously recommended approval to change the project scope for PHX07-317, and on January 12, 2009, ADOT requested to change the funding type for project DOT09-823 from local to STP-AZ. These projects are found in Table C. The Management Committee and the Transportation Policy Committee recommended approval of project changes in Tables A, B, and C. Since the mailout of the Regional Council agenda, a request was received from the Town of Gilbert to amend the FY 2008-2012 MAG Transportation Improvement Program to add a new safety project (GIL09-801). This project is listed in Table D. All of the projects to be amended may be categorized as exempt from conformity determinations and an administrative modification does not require a conformity determination.

5D. Conformity Consultation

The Maricopa Association of Governments is conducting consultation on conformity assessments for an amendment and administrative modification to the FY 2008-2012 MAG Transportation Improvement Program. The proposed amendment involves several projects, including the addition of Arizona Department of Transportation MAG Proposition 400 noise mitigation projects. The proposed administrative modification involves several projects, including funding changes to an Arizona Department of Transportation project on Interstate-10 and Gilbert intersection improvements at Guadalupe Road and Cooper Road. The amendment includes projects that are exempt from a conformity determination and the administrative modification includes minor project revisions that do not require a conformity determination. Comments on the conformity assessments were requested by January 23, 2009. This item was on the agenda for consultation.

5E. Prioritized List of Proposed PM-10 Certified Street Sweeper Projects for FY 2009 CMAQ Funding

The Regional Council, by consent, approved a prioritized list of proposed PM-10 Certified Street Sweeper Projects for FY 2009 CMAQ funding and retained the prioritized list for any additional FY 2009 CMAQ funds that may become available due to year-end closeout, including any redistributed obligation authority, or additional funding received by this region. The FY 2009 MAG Unified Planning Work Program and Annual Budget and the FY 2008-2012 MAG Transportation Improvement Program contain \$1,210,000 in Congestion Mitigation and Air Quality (CMAQ) Funds for the purchase of PM-10 certified street sweepers. PM-10 certified street sweeper projects were solicited from member agencies in the Maricopa County PM-10 nonattainment area and 15 applications requesting \$2.7 million in federal funds were received. On December 11, 2008, the MAG Air Quality Technical Advisory Committee (AQTAC) made a recommendation on a prioritized list of proposed PM-10 certified street sweeper projects for FY 2009 CMAQ funding. Prior to the AQTAC recommendation, the MAG Street Committee reviewed the proposed street sweeper applications on October 16, October 22, and November 12, 2008, in accordance with FY 2009 Draft MAG Federal Fund Programming Principles. On January 14, 2009, the MAG Management Committee concurred with the MAG AQTAC recommendation.

5F. Ratification of the Annual Performance Review and Compensation/Benefits of the MAG Executive Director

The Regional Council, by consent, ratified the action of the Executive Committee regarding the compensation/benefits of the MAG Executive Director. In January 2003, the Regional Council approved an agreement to hire the current Executive Director. As part of this agreement, it was provided that the Executive Director would receive an annual performance review conducted by the Executive Committee. As part of the evaluation, in November 2008, a questionnaire was sent to the members of the Regional Council to comment on the performance of the Executive Director. On January 20, 2009, the Executive Committee reviewed the comments from the Regional Council, discussed the performance of the Executive Director, and took action regarding the compensation/benefits of the Executive Director.

5G. Maricopa Region Community Emergency Notification System (CENS)/Reverse 9-1-1 Standard Operating Procedures

The Regional Council, by consent, approved the Maricopa Region Community Emergency Notification System (CENS)/Reverse 9-1-1 Standard Operating Procedures. When the current service provider for the region's Community Emergency Notification System (CENS) informed Maricopa Region 9-1-1 that it would no longer continue to provide this service, a procurement process was conducted for a new vendor. Plant CML, whose product is Reverse 9-1-1, was selected to provide this service. It is necessary to update the standard operating procedures, which were approved by the MAG Regional Council in 2003, to accommodate the new product. A multi-agency team developed draft standard operating procedures for the new system. The MAG PSAP Managers Group, the MAG 9-1-1 Oversight Team, and the MAG Management Committee reviewed and recommended approval of the draft procedures.

5H. Discussion of the Development of the FY 2010 MAG Unified Planning Work Program and Annual Budget

Each year, the Unified Planning Work Program and Annual Budget is developed in conjunction with member agency and public input. The Work Program is reviewed each year by the federal agencies in the spring and approved by the Regional Council in May. This overview of MAG's draft Dues and Assessments and the proposed budget production timeline provides an opportunity for early input into the development of the Work Program and Budget. This item was on the agenda for information and input on the development of the FY 2010 MAG Unified Planning Work Program and Annual Budget.

5I. MAG Socioeconomic Projections to 2035

The Regional Council, by consent, approved the extension of the 2007 MAG Socioeconomic Projections to 2035 for resident population, housing and employment by Municipal Planning Area (MPA) and Regional Analysis Zone (RAZ). In accordance with Executive Order 95-2, MAG prepares subregional socioeconomic projections. These projections are used as input into transportation and air quality models. The 2007 MAG Socioeconomic Projections for population, housing and employment by Municipal Planning Area (MPA) and Regional Analysis Zone (RAZ) for July 1, 2010, 2020, and 2030

were approved by the MAG Regional Council in May 2007. A 25-year planning horizon consistent with the 2007 projections is needed to support potential transportation planning projects. MAG needs to extend the 2007 set of projections to 2035 by using the Control Totals for 2035 consistent with the 2005 Special Census and adopted by the MAG Regional Council in December 2006. The MAG Population Technical Advisory Committee (POPTAC) approved the use of base data and methods consistent with the 2007 Socioeconomic Projections to extend the projections by MPA and RAZ to 2035 and have reviewed and provided comments on the draft 2035 projections. The POPTAC and the MAG Management Committee recommended approval of the extension of the MAG 2007 Socioeconomic Projections to 2035 for resident population, housing and employment by MPA and RAZ.

5J. The 2009 Set of International Codes

The Regional Council, by consent, recommended that each jurisdiction consider adopting the 2009 family of International Codes as published by the International Code Council (ICC). At the November 2008 MAG Building Codes Committee (BCC) meeting, members discussed an initiative to reach consensus in unison on the 2009 International Codes, prior to the jurisdiction adoption of these codes. These codes include: building, mechanical, plumbing, electric, residential, fire, energy, fuel, and performance. The MAG BCC makes recommendations on the development, interpretation and enforcement of building codes in the MAG region. It also provides a regional forum for construction, development, and other issues as they relate to building codes. In an effort to promote uniformity throughout MAG jurisdictions under the purview of life safety a motion was passed to recommend that each jurisdiction consider adopting the 2009 family of International codes as published by the International Code Council (ICC). The MAG Management Committee recommended that each jurisdiction consider adopting the 2009 family of International Codes as published by the ICC.

5K. Amendment to the FY 2009 Work Program and Annual Budget to Provide Funding for the Travel Time Information on Dynamic Message Signs Project

The Regional Council, by consent, amended the FY 2009 MAG Unified Planning Work Program and Annual Budget to provide \$250,000 of MAG Surface Transportation Improvement Program funds to ADOT for the Travel Time Information on Dynamic Message Signs Project. On January 22, 2008, the Arizona Department of Transportation (ADOT) initiated a 12-month Pilot Study to provide travel time information on dynamic message signs for six freeway corridors throughout the MAG region. The Pilot Study included an evaluation component conducted by Kimley-Horn. Preliminary results from the evaluation indicate acceptance by the motoring public to assist them in their daily commute. Due to current state fiscal constraints, ADOT is unable to continue operating the signs this year. ADOT has requested that MAG provide \$250,000 to assist ADOT in operating the system for the coming year. MAG provided similar assistance to ADOT and the Department of Public Safety to initiate the Freeway Service Parol Program. This program was subsequently operated by the State. It is anticipated that one-year funding for the Travel Time Information on Dynamic Message Signs Project would be provided by using MAG federal Surface Transportation Program funds. The MAG Management Committee recommended approval.

8. Election of MAG Regional Council Chair and Executive Committee Vacancy(ies)

This agenda item was taken out of order.

As a result of recent elections, the Chair position for the MAG Regional Council has become vacant. The MAG By-Laws provide that the Regional Council fills a vacancy on the Board by electing a successor to serve for the remainder of the unexpired term. The MAG By-Laws also provide that the Regional Council fills a vacancy on the Executive Committee following the same procedure. Nomination of the Chair and vacancy(ies) on the Executive Committee will be considered to fill the unexpired portion of the term (June 30, 2009).

Fredda Bisman, MAG General Counsel, provided an overview of the procedure for the election to fill the vacant Chair position by saying that the MAG By-Laws provide that if there is a vacancy in the Chair position, the body votes to fill the position for the unexpired term. Ms. Bisman advised that the agenda also provides for an election if another vacancy on the Executive Committee occurs.

Vice Chair Neely stated that former Chair of the Regional Council, Mayor Mary Manross, did a fine job on the Council, and even though her term was for a shorter period, her leadership should be celebrated by the Regional Council. Vice Chair Neely stated that she had spoken to many Regional Council members and expressed that as Vice Chair, she was interested in moving up to Chair. She said that in the past when a vacancy occurred, MAG had allowed the Chair to serve the remainder of the term plus two one-year terms. Vice Chair Neely indicated that she was not seeking to serve more than the six months remaining in the term and then seek a one-year term. She stated that in the process to examine MAG's procedures, there could be some changes there.

Mayor Hallman stated that he wrote a letter expressing his interest in the Chair position, sent largely due to his concern about how MAG could do a better job for the region's benefit. He noted that Mr. Smith's Executive Director's presentation and the amount of letters sent demonstrate that all see an opportunity to create a governance structure to address the shortfalls being experienced and to bring everyone together to create a powerful regional organization. Mayor Hallman stated that the Regional Council Chair is not an honorary position, but a formal position to facilitate discussion among members. He said that MAG's opportunity for developing and vetting policy occurs at the Executive Committee for presentation and discussion by the Regional Council, and if that process is used correctly, matters not being fully fleshed out can be avoided. Mayor Hallman expressed his hope that as part of the work on the governance structure, MAG might take a page from the AMWUA process to establish a cycle that ensures that all communities participate in Chair leadership and all regions participate fully. He said that every community has an equal stake in the regional process. Mayor Hallman expressed his appreciation for Vice Chair Neely's commitment to fill only the remainder of the Chair's term and then seek one additional term, and commented that it is a wise move so all other communities can be drawn in. Mayor Hallman stated that he was convinced Vice Chair Neely was committed to making the changes that would bring everyone together, because, as he said at the TPC meeting, it really does not matter if Tempe can compete with Phoenix, or with Scottsdale, or with Glendale, because we all need to work together to compete with the powerhouse regions across the globe.

Mayor Hallman moved to elect Vice Chair Peggy Neely as Chair of the MAG Regional Council for the unexpired portion of the term.

Councilmember Esser stated that he would like to second the motion, but would move to amend the motion to fill the vacancies on the Executive Committee, with Councilmember Peggy Neely as Chair, Mayor Thomas Schoaf as Vice Chair, and Mayor Hugh Hallman as Treasurer.

Mayor Hallman stated that he appreciated having the motion amended, but did not feel it appropriate that he make the motion to elect himself Treasurer.

Mayor Parker stated that he would make the motion.

Vice Chair Neely asked members if there was discussion of the motion.

Mayor Dunn asked for clarification of the terms of office. Mr. Smith replied that the terms were for the unexpired portion of the terms until June 2009.

Supervisor Wilson expressed that he wanted to say he supported Vice Chair Neely as Chair, but he had concern about the weighted vote and how it affects the different communities. He indicated that he had spoken to Vice Chair Neely about this and she had indicated that she would address his concern. Supervisor Wilson stated that it is all right to have weighted voting if it is not used, but when it is used, there are problems. He said that everyone who comes to the meetings and participates and spends their time feels they are important, too, so before he cast his vote, he would like Vice Chair Neely to respond to his concern.

Vice Chair Neely stated that she did not address that concern in her letter, however, she was supportive of modifications to the weighted vote and thought that defining what items are eligible for weighted voting could be a part of the Executive Committee's examination of MAG's policies and procedures. She said that she would be honored to bring that through the process.

Mayor Schoaf asked if there was an opportunity to fill any vacancies on the Executive Committee under this agenda item. Vice Chair Neely replied that as soon as the vote was taken, any vacancy occurring on the Executive Committee could be addressed.

Vice Chair Neely asked if there was any further discussion. Hearing none, she called for a vote on the motion to elect Councilmember Peggy Neely as Chair, Mayor Thomas Schoaf as Vice Chair, and Mayor Hugh Hallman as Treasurer, for the unexpired term (June 2009), which passed unanimously.

Chair Neely thanked the Regional Council for supporting those elected, and said she was excited for what the future holds for MAG. Chair Neely stated that she would entertain a motion to fill the vacancy on the Executive Committee.

Mayor Dunn moved to nominate Mayor Scott Smith to fill the vacancy on the Executive Committee for the unexpired portion of the term. Mayor Schoaf seconded.

Chair Neely asked if there was discussion of the motion. Hearing none, the vote on the motion passed unanimously.

Chair Neely welcomed Mayor Smith to the Executive Committee. She said that she hoped to bring back some great material to the Regional Council in 60 days.

6. Transportation Planning Update

Eric Anderson, MAG Transportation Director, provided a report on the status of Proposition 400. He noted that staff would provide to the Regional Council individual briefings on the information presented, if requested. Mr. Anderson stated that a lot is going on with transportation and just this day, the U.S. House passed the economic stimulus bill.

Mr. Anderson stated that the December 2008 sales tax revenue, based on November 2008 business activity, is down 14.8 percent compared to December 2007, and the year-to-date revenue for the first six months of this fiscal year is down 11.2 percent compared to the same period last year. Mr. Anderson advised that if the trend continues, it will translate to revenue about \$40 million below projections. He said that of the decrease, 56 percent affects the freeway program, 33 percent affects the transit program, and the remainder affects the arterial streets program. Mr. Anderson stated that because ADOT anticipates going to the bond market later this year, it will do an interim revision of the revenue forecast. He noted that ADOT predicted a flat revenue, but it appears it will be below this. Mr. Anderson showed a chart that provided a summary of freeway revenues and costs and noted a deficit in the freeway program of about \$5.1 billion.

Mr. Anderson reviewed recent and current activities. He said that in partnership with ADOT, an Inner Loop Peer Review was convened to look at projects in the Central Phoenix core. Mr. Anderson stated that convening the panel resulted from an analysis of I-10 west from I-17 to Loop 101 that recommended an additional two general purpose lanes in each direction. He noted that the RTP calls for one lane in each direction. Mr. Anderson explained the concern for adding capacity on I-10 because the Stack interchange cannot handle more volume, and unless this is addressed, it probably does not make sense to widen I-10. He stated that it is important to build the right projects and not enhance the congestion situation.

Mr. Anderson stated that the Inner Loop Peer Review panel consists of three recognized national experts: John Conrad, who was previously the Washington Department of Transportation Chief Engineer; Mike Falini, the designer of the single point urban interchange, Jack Lettiere, former commissioner with the New Jersey Department of Transportation and former chair of the Board of Directors for New Jersey Transit. He said that some of the results, expected in mid-February, could include lower cost options that might be pursued, and added that they anticipate that a better plan for the Central corridor might be identified.

Mr. Anderson stated that the three ADOT management consultants are dealing with Valley corridors, and MAG staff and ADOT had their first meeting to review corridor options. He reported that they discussed what might be viable options for the South Mountain corridor and the SR-801 corridor. Mr.

Anderson stated that the Transportation Policy Committee (TPC) discussed buying more right of way versus utilizing engineering solutions, such as retaining walls that could minimize the amount of right of way needed to be acquired. He indicated that they will be analyzing the point at which engineering solutions might be more cost effective than purchasing right of way. Mr. Anderson said that the ADOT consultants are saying that all of the widening of new corridors will be planned for the median, and the analysis they received indicates that might not be the most cost effective strategy. He indicated that staff hopes to have options to the TPC and Regional Council in 30 to 60 days.

Mr. Anderson displayed a chart of costs by corridor and noted that the cost of the RTP in 2002 dollars was approximately \$9.5 billion and the current estimate is about \$15.7 billion.

Mr. Anderson reviewed three possible program scenarios that might be considered to balance the program. The Trend Line scenario elongates delivery of the program to build all of the projects planned, perhaps five or ten years, in order to collect the additional \$4.7 billion needed. He said that this scenario assumes an extension of the half-cent sales tax, finding other funding resources, and some value engineering.

Mr. Anderson stated that the Maintain the Budget scenario delivers the program by 2025, but only the projects that can be completed with the funds available will be built, and the other projects will go away. He indicated that he thought this was probably not a viable option because he thought there were alternatives that could be considered.

Mr. Anderson stated that the Blend scenario is a combination of a lot of strategies, which could include the reauthorization of the federal transportation act and economic stimulus funds. He expressed the importance of looking at corridors and considering options in addition to value engineering. Mr. Anderson stated that the South Mountain Freeway contemplates a ten-lane facility and noted that its right of way could be 400 feet to 600 feet wide in some places. He advised that right of way is estimated at \$1.1 billion, which was the amount estimated for the entire project, including the right of way. Mr. Anderson stated that the ADOT consultant has come back and suggested the potential use of retaining walls and making the footprint smaller. He noted that another option is reevaluating the number of lanes needed. Mr. Anderson noted that if less right of way is purchased, the implication is that the facility will not be expanded. He said that he thought significant economies could be achieved with smarter right of way acquisition strategies. Mr. Anderson stated that another option is that the South Mountain corridor could be built as an Arizona Parkway, which perhaps could be more neighborhood-friendly, however, with less capacity, the impacts to the rest of the system need to be considered.

Mr. Anderson noted that originally the timeframe to complete the process to balance the program was given as April 2009, with approval of the Plan update in July, however, this now seems too ambitious due to changing factors and that the revenue decline may not have ended. He said that the good news is that costs are declining, but it is not known how long that will last. Mr. Anderson indicated that a summer wrap-up is now anticipated, with approval of the Plan update in the Fall.

Chair Neely thanked Mr. Anderson for his report and asked members if they had questions.

Councilmember Esser asked when the funds from an economic stimulus package might be expected. Mr. Anderson replied that indications are the package is expected to be signed by the President in mid-February and he thought the funds would be available 30 days after that. He indicated that the idea was to get the money flowing to create jobs and stimulate the economy. Mr. Anderson advised that MAG will be required to follow the required federal processes for projects funded by the stimulus package because there will be no waiver of the federal rules. In addition MAG will follow the usual process when adding projects due to additional funding being received. He indicated that staff thinks the amount coming to Arizona will be equivalent its one-year appropriation of federal funds.

Supervisor Wilson commented that project reductions are being considered, but perhaps by the time they are made, the economy could turn around and then it is too late to go back to the previous plan. He asked if there were any legal requirements to change the Plan. Mr. Anderson replied that MAG would follow many processes to change the Plan, including the public participation process. He commented that in the past, the MAG program has experienced some declines in revenue that lasted for a couple of years, but he felt this is completely uncharted territory. Mr. Anderson remarked that until the base is known, it is difficult for the planning community to say what needs to be done in the next five or six years. Mr. Anderson stated that Supervisor Wilson was correct, changes need to be incremental, so that decisions made today are not regretted later. He said they are not only trying to find the middle ground to save money today, but also preserve options for tomorrow.

Supervisor Wilson asked if the stimulus money would need to be repaid. Mr. Anderson replied that to his understanding, the funds would not need to be repaid.

Councilmember Esser said that some development projects are on hold due to developers' lack of funds. He asked if commitments to acquire right of way could be made now to forestall development. Mr. Anderson replied that this was possible in some corridors. He indicated that Loop 303 is pretty well cleared now. The South Mountain is still in the environmental impact statement process. Mr. Anderson explained that right of way can be acquired during the environmental impact statement process, however, FHWA discourages it. He said that purchase of right of way for SR-801 is a possibility, but it is uncertain what will be built. Mr. Anderson stated that for SR-802, the first mile is well defined from the Santan to Ellsworth, however, corridor farther east is not defined in Pinal County, so it is probably not advisable to buy right of way yet.

Chair Neely stated that some people have suggested that in addition to the TPC, smaller workshops for the Regional Council could be held. She suggested surveying Regional Council members to see if they would like to have smaller breakouts. Mr. Anderson replied that this might be helpful because there was a lot of detail behind what was presented tonight and such workshops could be scheduled if requested.

7. Proposal to Advance a Portion of the Williams Gateway Freeway

Mr. Anderson provided a report on the Mesa request to advance the first mile of the Williams Gateway Freeway from the Hawes Road connection at the Santan Freeway to Ellsworth Road with all of the ramp connections at the Santan Freeway. He said that the mainline freeway would not be built at this time because there is not yet a need. Mr. Anderson stated that Mesa and other East Valley jurisdictions see

the Phoenix-Mesa Gateway Airport as a major employment hub developing in the East Valley and this first mile segment would provide access.

Mr. Anderson explained that Mesa would do the financing by issuing Highway Project Advancement Notes (HPAN) in two phases: 1) design and right of way, and 2) construction, which could be accelerated by four years. He said that the design and right of way amount is about \$45 million and the construction amount is about \$172 million. Mr. Anderson noted that detail on the proposal is shown in the agenda material.

Mr. Anderson stated that the interest expense on financing would be split fifty/fifty between Mesa and the freeway program, which is in accordance with the MAG Freeway Acceleration Policy adopted by the Regional Council in early 2008. He stated that Mesa is proposing that the STAN allocation of \$20.4 million be used for the interest reimbursement rather than the expense of right of way acquisition. Mr. Anderson provided background on the STAN funds by saying that in 2006, the Legislature set aside \$307 million statewide for transportation, and Maricopa County received 60 percent of that amount. He said that the Regional Council used the STAN funds to accelerate a number of projects, including advance acquisition of right of way for the Williams Gateway Freeway in the amount of \$20.4 million.

Mr. Anderson stated that using the \$20.4 million to pay down the interest expense accomplishes two things. He said that the \$20.4 million is insufficient to purchase all of the right of way, and due to the Mesa financing, all of the right of way would be acquired earlier than it would be otherwise. Secondly, that there could be cost savings due to this proposal.

Mr. Anderson stated that Mesa realizes that the Plan's schedule is subject to change as the program is readjusted. He said that currently, construction for this segment is scheduled for 2016, and this date could possibly be readjusted to 2018, however, that is currently unknown. Mr. Anderson stated that Mesa has indicated it will move forward on the right of way and design, but if the construction schedule moves out too far, it might not be able to afford to do the construction component. He noted that even if this occurred, the project would be fully designed and all of the right of way purchased. Mr. Anderson stated that the STAN funds are subject to being swept by the Legislature, and if that happens, Mesa might have to reevaluate the proposal.

Chair Neely thanked Mr. Anderson for his report and asked members if they had any questions.

Mayor Lopez Rogers stated that projects still in the queue and the possibility of funds being swept were concerns expressed at the TPC meeting. She said that due to concerns for projects in the queue, she would like to propose the motion she made at the TPC, and added her support for the Mesa proposal.

It was noted that the TPC's recommendation had been emailed to members and a copy was provided at each place.

Mayor Lopez Rogers moved to approve the Mesa request to advance the design, right of way and construction of an interim connection of the Williams Gateway Freeway utilizing STAN funds allocated to Williams Gateway Freeway, as noted in the report, subject to the condition that the funding and

schedule for any remaining MAG STAN project continue unaffected by the acceleration. If the funding and/or schedule for any remaining MAG STAN project is affected by the acceleration, or any other reason, such affected project's funding schedule shall be maintained by any means necessary, including, but not limited to, the use of economic recovery funds. Also to incorporate the project into the draft FY 2010 to FY 2014 MAG Transportation Improvement Program and the Regional Transportation Plan for a conformity analysis and that the STAN funds allocated to the Williams Gateway Freeway for right of way acquisition be used instead to pay for the interest expense associated with the proposed acceleration, recommend that the request for the change in the use of the STAN funds be forwarded to the State Transportation Board for consideration, and recommend authorizing the MAG Executive Director to enter into an agreement with ADOT and Mesa. Mayor Schoaf seconded.

Chair Neely asked members if there were any comments or discussion.

Mayor Sanders expressed his appreciation to Mesa and the Regional Council for all they have done for the East Valley region.

With no further discussion on the motion, the vote passed unanimously.

9. Status Update on the June 30, 2008 Single Audit and Management Letter Comments, MAG's Comprehensive Annual Financial Report (CAFR) and OMB Circular A-133 Reports (i.e., "Single Audit") for the Fiscal Year Ended June 30, 2008

Dennis Osuch, one of the three partners in the public accounting firm of Cronstrom, Osuch, & Company, P.C., provided a report on the audit of MAG's Comprehensive Annual Financial Report (CAFR) and Single Audit for the fiscal year ended June 30, 2008. He said that his firm has been conducting audits in Arizona cities and towns for 21 years, and this audit is the second they have conducted for MAG. Mr. Osuch stated that the report was issued on November 10, 2008, and they issued an unqualified opinion on the financial statements, which were found to be in prepared in accordance with generally accepted accounting principles. He stated that they issued no management letters or letter of significant deficiencies.

Mr. Osuch stated that they also conducted an audit of MAG's federal program, OMB 133, and issued an unqualified opinion on compliance and had no findings on the related internal controls.

Mr. Osuch noted that MAG has submitted the FY 2008 CAFR to the Government Finance Officers Association for the Certificate of Excellence in Financial Reporting and it is anticipated that it will receive the award, which would be the eleventh consecutive year. He concluded his presentation by saying that the audit went well with no issues. Chair Neely thanked Mr. Osuch for his report.

Councilmember Esser moved to accept the audit opinion issued on the MAG Comprehensive Annual Financial Report and Single Audit Report for the year ended June 30, 2008. Mayor Waterman seconded, and the motion carried unanimously.

10. Legislative Update

Nathan Pryor, MAG Senior Policy Planner, provided an update on a legislative package Congress is considering to boost the national economy. Mr. Pryor noted that the information presented was subject to change. He said that since October 2008, MAG staff and the member agencies compiled more than 750 projects totaling more than \$7.4 billion. Mr. Pryor stated that MAG staff has been working with local and national groups and associations and monitoring federal legislation. He reported that MAG staff met with the Arizona Congressional delegation in December 2008, and Senator Kyl indicated Congress wanted timeliness of projects to be addressed. Mr. Pryor stated that the list of projects was broken down into groups of 60 to 120 days, six months, and beyond six months. He noted that in discussions with the Congressional delegation, MAG staff urged the relaxation of federal processes, however, the House and Senate versions contain no provision for the relaxation of the process of drawing down the funds. Mr. Pryor noted that the bill is expected to be signed by the President by mid to late February.

Mr. Pryor reviewed the current provisions in the bill. He said that for highway and bridge construction, the House version includes \$30 billion and the Senate version includes about \$27 billion, plus \$5.5 billion for a competitively awarded surface transportation grants program. Mr. Pryor noted that the MAG project list includes a number of water and wastewater projects and for these types of projects there seems to be a grant-type of programming effort. He indicated that staff will continue to monitor the legislation in that regard.

Mr. Pryor stated that the House version includes about \$612 million for transportation infrastructure projects for Arizona, and the Senate version includes about \$627 million, which does not include the \$5.5 billion grants portion. He added that it was unknown how that would be broken out among the states. Mr. Pryor stated that the House version includes about \$206 million for non-transit MAG projects and the Senate version includes about \$249 million, of which about \$147 million would be allocated to the MPO. Mr. Pryor stated that these amounts have fallen short of expectations, with the MAG non-transit infrastructure project total about \$3.8 billion. He added that the House version represents 5.4 percent of the MAG projects submitted and the Senate version represents about 6.5 percent of the MAG projects submitted.

Mr. Pryor stated that the House bill may require 50 percent of funding to be obligated within 90 days for the state and 75 to 150 days for the MPOs, decreased from the original 180 days. He stated that this could cause restrictions in moving projects forward. Mr. Pryor stated that after the deadline, monies not spent would be redistributed according to a methodology. He explained that funds not used by the MPOs and local agencies would go back to the state level where MPOs and local agencies can draw from the funds. If the funds are not used by the state, they go to the federal level where other states can draw from the funds. Mr. Pryor stated that the Senate version includes a more direct suballocation to MPOs and allows one year for MPOs to obligate the funds, which is more relaxed in its obligation timeline.

Mr. Pryor referenced a draft letter to the Arizona Congressional delegation at each place, which encourages an increase in funding. Mr. Pryor stated that there is a Congressional Budget Office report that indicates they are pessimistic about how fast states and local agencies can spend the money and they

see this more as back-ended in terms of this recession. He noted that the draft letter indicates that MAG feels it can obligate the funds quickly.

Mayor Dunn asked if there had been any effort by Congress to streamline the policies or requirements to allow projects to proceed sooner. Mr. Pryor stated that staff had brought up this issue with the Congressional delegation and advanced the notion with the National Association of Regional Councils, but people are interested in maintaining traditional policies and procedures.

Mr. Smith stated that staff was blunt with the Congressional delegation about this and suggested to move projects quickly an emergency should be declared, as with the border fence. He indicated that MAG staff expressed that this financial situation was a national economic emergency and asked why it was not being declared to give emergency power to the Governor. Mr. Smith reported that FHWA issued a directive that they do not regard this as an emergency as they define it.

Mayor Smith asked when we would reach the level for obligating projects. Mr. Smith stated that there is a federal obligation form that is submitted that says all of the processes have been completed. He said that since none of the federal requirements have been waived, MAG is at a disadvantage due to its status as a nonattainment area. Mr. Smith explained that MAG has to do a conformity analysis, and after this is completed, there is a 30-day public input process that has to be followed before Plan approval. He advised that emergency committee meetings might need to be called due to the urgency of the situation.

Mayor Smith asked if any projects were ready that could spend the funds that would become available. Mr. Pryor stated that the Transportation Review Committee would begin the process at its meeting the next morning. He said that staff has already been taking the eligibility criteria and applying it to the project list. Mr. Pryor stated the Transportation Review Committee will start mapping out options and next steps.

Mayor Schoaf asked the process for prioritizing the projects if there are more projects that are ready than funds available. Mr. Smith stated that this will be the subject of discussion at the Transportation Review Committee meeting. He said that the Committee will have a cut line and will continue to rank the projects. Mr. Smith noted that MAG needs to be ready with an extended list, because if other states cannot get their projects out the door, the funds would be redistributed to states that could.

Mayor Schoaf asked the process for prioritizing projects to use the stimulus funds. Mr. Smith replied that the process has not yet been determined and that will be the discussion at the Transportation Review Committee meeting. He added that a great deal will be determined by project readiness, such as those STAN projects mentioned in the motion on the Williams Gateway Freeway agenda item. He indicated that those projects left behind by the STAN funding, such as I-17 north and I-10 west, which amount to about \$74 million, will be ready to go. Mr. Smith said that it will really come down to which projects have gone through the federal process.

Supervisor Wilson stated that it seems MAG is shifting its planning methods to the availability of funds, and maybe there could be an examination of what it is going to cost. He stated that the overpass on Loop 303 and I-10 is the most expensive overpass in the program, and asked if there was a way to

expedite that project with federal funds and use its current funding on other projects. Mr. Smith stated that Supervisor Wilson was correct, the overpass's cost is expensive – it is estimated at \$500 million. He said that MAG will be looking to ADOT who is hiring five consultant teams, two of which are for this region, to expedite projects. Mr. Smith said that he was not sure if that interchange project had completed all of its processes.

Mr. Martin commented that the current amount of funding being considered by Congress is wholly inadequate for this region and for Arizona. He said he would support more funding of ready projects. Mr. Martin stated that MAG needs to move forward with prioritizing projects, but he felt the first priority should be pushing Arizona's Congressional delegation to increase the funding amount. He stated that the amount of the ADOT list, which does not even include the \$7 billion from the MAG region, is almost double the amount being recommended for Arizona. Mr. Martin indicated that his organization, ADOT and all agencies will work together to get the projects out. He indicated that the Congressional Budget Office report assumes that Arizona has weather impacts, such as North Dakota, where the construction program comes to halt due to winter weather. Mr. Martin said that his point was that the Congressional Budget Office report has tempered the amount of money Congress is looking to provide. He expressed that he did not think this was over yet and there was still an opportunity at the Senate Conference Committee to increase the amount. Mr. Martin stated that an effort by the Regional Council to increase the funding would be appreciated and he strongly encouraged that the letter be sent to the Congressional delegation.

Mr. Smith stated that MAG has the full cooperation of ADOT to move forward projects and the FHWA Division Office has indicated it will do everything it can.

Supervisor Wilson stated that Mr. Smith could include Maricopa County in that statement.

Chair Neely stated that it appeared it was in the best interest of the region to send out the letter. No opposition was noted.

11. Comments from the Council

An opportunity will be provided for Regional Council members to present a brief summary of current events. The Regional Council is not allowed to propose, discuss, deliberate or take action at the meeting on any matter in the summary, unless the specific matter is properly noticed for legal action.

Supervisor Wilson asked if MAG staff could send out information on the amount of freeway miles capable of being built in Arizona.

There being no further business, the Regional Council meeting adjourned at 6:20 p.m.

DATE:

February 17, 2009

SUBJECT:

Recommendation to ADOT's Safe Routes to School Program

SUMMARY:

Many of us remember a time when walking and bicycling to school was a part of everyday life. In 1969, about half of all students walked or bicycled to school. Today, however, the story is very different. Fewer than 15 percent of all school trips are made by walking or bicycling, one-quarter are made on a school bus, and over half of all children arrive at school in private automobiles.

This decline in walking and bicycling has had an adverse effect on traffic congestion and air quality around schools, as well as pedestrian and bicycle safety. In addition, a growing body of evidence has shown that children who lead sedentary lifestyles are at risk for a variety of health problems such as obesity, diabetes, and cardiovascular disease. Safety issues are a big concern for parents, who consistently cite traffic danger as a reason why their children are unable to bicycle or walk to school.

The purpose of the Federal Safe Routes to School (SRTS) Program, established in SAFETEA-LU, is to address these issues head on. At its heart, the SRTS Program empowers communities to make walking and bicycling to school a safe and routine activity once again. The Program makes funding available, through state departments of transportation for a wide variety of programs and projects, from building safer street crossings to establishing programs that encourage children and their parents to walk and bicycle safely to school. To this end, the Safe Routes to School Program was created to accomplish three goals:

1. Enable and encourage children, including those with disabilities, to walk and bicycle to school.
2. Make bicycling and walking to school a safer and more appealing transportation alternative, thereby encouraging a healthy and active lifestyle from an early age.
3. Facilitate the planning, development, and implementation of projects and activities that will improve safety and reduce traffic, fuel consumption, and air pollution near schools.

The program hopes to accomplish this by providing funds for schools and communities to implement infrastructure projects (such as sidewalk improvements, trails, and 'traffic calming') and non-infrastructure projects (such as education campaigns, safety training, law enforcement efforts, and promotional giveaways).

The Arizona Department of Transportation (ADOT) is administering the state's Safe Routes to School Program and announced the third cycle/call for projects in October 2008. Awards in this cycle will be made to safety projects in three categories: (1) Infrastructure; (2) Non-infrastructure and (3) Materials and Regional Support. A total of \$1,596,000 has been made available by ADOT for infrastructure-based projects, with the maximum award for a single project limited to \$250,000. A total of \$609,000 has been made available for non-infrastructure projects, with the maximum award for a single project limited to \$45,000. A total of \$50,000 has been made available for Materials and Regional Support projects, with the maximum award for a single project limited to \$30,000. Safe Routes to School is a reimbursement program. Selected applicants will be entitled to request reimbursements from ADOT for an amount agreed upon at the time of selection.

The ADOT project review process stipulates that MPOs/COGs are required to provide a ranked list of project applications from their regions as the MPO/COG recommendation. This ranking will be considered when all applications are reviewed as part of the statewide selection process. A total of 20 infrastructure project applications, 27 non-infrastructure project applications, and four materials and regional support programs project applications have been received by ADOT. The MAG region has generated applications for nine infrastructure projects, six non-infrastructure projects and two materials and regional support projects (see Attachment). The project selection by ADOT is expected to be finalized by May 2009.

PUBLIC INPUT:

None has been received.

PROS & CONS:

PROS: The successful implementation of Safe Routes to School programs, projects and activities across the MAG region continue to encourage more kindergarten through eighth grade students walking and bicycling to their schools, and creates a safer road environment on school access routes for all pedestrians and bicyclists.

CONS: None.

TECHNICAL & POLICY IMPLICATIONS:

TECHNICAL: None.

POLICY: Since this national program, will be making funds available each year for school access related road safety improvements, there is a potential need for staff resources to administer School Traffic Safety Programs at MAG member agencies.

ACTION NEEDED:

Approval of the ranked list of projects to be submitted to the Arizona Department of Transportation for the Safe Routes to School Program.

PRIOR COMMITTEE ACTIONS:

On February 11, 2009, the MAG Management Committee recommended approval of the ranked list of projects to be submitted to the Arizona Department of Transportation for the Safe Routes to School Program.

February 17, 2009

SUBJECT:

Pedestrian and Bicycle Design Assistance Programs

SUMMARY:

The FY 2009 MAG Unified Planning Work Program and Annual Budget, approved by the MAG Regional Council in May 2008, includes \$150,000 for the Pedestrian Design Assistance Program and \$250,000 for the Bicycle/Shared-Use Design Assistance Program. The design programs allow MAG member agencies to apply for funding for the design portion of a bicycle or pedestrian project. A notice soliciting projects was sent to each member of the Management Committee, Transportation Review Committee, Pedestrian Working Group, Regional Bicycle Task Force, Street Committee and the Planners Stakeholders Group. Applications were received on October 30, 2008.

On January 20, 2009, the MAG Regional Bicycle Task Force and the MAG Pedestrian Working Group reviewed, listened to presentations, asked questions, ranked and recommended for approval the following projects:

Pedestrian Design Assistance Program

- Phoenix - 11th Street Streetscape in Historic Garfield District (\$80,000)
- Fountain Hills - Saguaro Ranch Park (\$70,000)

Bicycle/Shared-Use Design Assistance Program

- Tempe/Mesa Rio Salado Shared-Use Path \$142,000
- Buckeye - BID Canal Multi-Use Path (\$58,000)
- Glendale - Neighborhood Access Improvements for Multi-Use Pathways (\$50,000)

The Transportation Review Committee and the MAG Management Committee have also recommended approval of these projects for funding from the Design Assistance Program:

PUBLIC INPUT:

None.

PROS & CONS:

PROS: This program assists MAG member agencies by offering professional design assistance to develop bicycle and pedestrian facilities that help reduce congestion and improve air quality.

CONS: According to federal law, any project which is not constructed after being designed with federal transportation funds could be required to return the funds used for design to the Federal Highway Administration.

TECHNICAL & POLICY IMPLICATIONS:

TECHNICAL: The Pedestrian Design Assistance Program encourages implementation of the adopted MAG Pedestrian Area Policies and Design Guidelines, and provides demonstration projects for "best

practice” pedestrian area policies and facilities. The Bicycle Design Assistance program uses nationally accepted practices.

POLICY: These programs encourage the development of facilities to encourage walking and bicycling.

ACTION NEEDED:

Approval of the following projects for funding for the Pedestrian Design Assistance Program: Phoenix - 11th Street Streetscape in Historic Garfield District (\$80,000); and Fountain Hills - Saguaro Ranch Park (\$70,000); and recommend approval of the following projects for the Bicycle/Shared-Use Design Assistance Program: Tempe/Mesa Rio Salado Shared-Use Path (\$142,000; Buckeye - BID Canal Multi-Use Path (\$58,000); and Glendale - Neighborhood Access Improvements for Multi-Use Pathways (\$50,000).

PRIOR COMMITTEE ACTIONS:

On February 11, 2009, the MAG Management Committee unanimously recommended approval of the following projects for funding from the Design Assistance Program: Phoenix - 11th Street Streetscape in Historic Garfield District (\$80,000); and Fountain Hills - Saguaro Ranch Park (\$70,000); and recommend approval of the following projects for the Bicycle/Shared-Use Design Assistance Program: Tempe/Mesa Rio Salado Shared-Use Path (\$142,000; Buckeye - BID Canal Multi-Use Path (\$58,000); and Glendale - Neighborhood Access Improvements for Multi-Use Pathways (\$50,000).

SUBJECT:

MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan for the Maricopa Nonattainment Area

SUMMARY:

The Maricopa Association of Governments has prepared the Draft MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan for the Maricopa Nonattainment Area. The U.S. Environmental Protection Agency (EPA) is being requested to redesignate the Maricopa nonattainment area to attainment status for the eight-hour ozone standard of .08 parts per million. This standard was established by EPA in 1997. No violations of this eight-hour ozone standard have occurred in the area since 2004.

The air quality modeling analysis in the maintenance plan demonstrates that the eight-hour ozone standard will continue to be met through 2025. The maintenance plan relies upon the existing measures which have been implemented. With the submittal of this request and maintenance plan, the Maricopa nonattainment area has satisfied all of the requirements to be redesignated to attainment for the eight-hour ozone standard. A resolution to adopt the MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan is attached.

PUBLIC INPUT:

On January 22, 2009, a public hearing was conducted on the Draft MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan for the Maricopa Nonattainment Area. The draft document was made available for public review on December 23, 2008. At the hearing, a citizen indicated support for the use of alternative modes such as light rail, buses, and bicycles; expressed concern about the use of MTBE in gasoline; submitted an article on clean air and indicated that EPA should look into this area and determine if the measures are helping to reduce air pollution; and expressed concern regarding the use of Develop Intelligent Transportation Systems as a contingency measure. At the February 11, 2009 MAG Management Committee meeting, a citizen indicated support for better air quality; expressed concern about the use of MTBE in gasoline; expressed concern with Intelligent Transportation Systems; and questioned the benefits of the air quality measures.

PROS & CONS:

PROS: The MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan is one of the necessary steps toward redesignation to attainment status. The maintenance plan demonstrates that the eight-hour ozone standard of .08 parts per million will continue to be met through 2025 with the existing measures in place. This standard was established by EPA in 1997. There have been no violations of this eight-hour ozone standard since 2004.

CONS: If the Eight-Hour Ozone Redesignation Request and Maintenance Plan is not submitted, the region will not be able to be redesignated to attainment status.

TECHNICAL & POLICY IMPLICATIONS:

TECHNICAL: Based upon air quality modeling, the maintenance plan demonstrates that the maximum eight-hour ozone concentrations in 2025 for the June, July, and August episodes were .081 parts per million (ppm), .079 ppm, and .079 ppm respectively. Since the maximum value for each episode is less

than .08 ppm, when rounded to the nearest .01 ppm, the modeling demonstrates maintenance of the standard in 2025. The plan contains two motor vehicle emissions budgets for transportation conformity purposes. For volatile organic compounds, the 2025 budget is 43.8 metric tons per day. For nitrogen oxides, the 2025 budget is 101.8 metric tons per day.

POLICY: The MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan is an important step toward redesignation from a nonattainment area to attainment status. No additional measures were necessary to demonstrate that the standard would continue to be met through 2025. The maintenance plan establishes two new motor vehicle emissions budgets for conformity purposes. There have been no violations of this eight-hour ozone standard since 2004. It is important to note that the region has not yet attained the new more stringent eight-hour ozone standard of .075 parts per million which was established by EPA in March 2008.

ACTION NEEDED:

Adoption of the MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan for the Maricopa Nonattainment Area.

PRIOR COMMITTEE ACTIONS:

MAG Management Committee: On February 11, 2009, the MAG Management Committee recommended adoption of the Draft MAG Eight Hour Ozone Redesignation Request and Maintenance Plan for the Maricopa Nonattainment Area.

RESOLUTION TO ADOPT THE MAG EIGHT-HOUR OZONE
REDESIGNATION REQUEST AND MAINTENANCE PLAN FOR
THE MARICOPA NONATTAINMENT AREA

WHEREAS, the Maricopa Association of Governments (MAG) is a Council of Governments composed of twenty-five cities and towns within Maricopa County and the contiguous urbanized area, the County of Maricopa, the Gila River Indian Community, the Salt River Pima-Maricopa Indian Community, Fort McDowell Yavapai Nation, Arizona Department of Transportation, and Citizens Transportation Oversight Committee; and

WHEREAS, the Governor of Arizona designated MAG as the regional air quality planning agency and metropolitan planning organization for transportation in Maricopa County; and

WHEREAS, the Environmental Protection Agency designated the Maricopa nonattainment area in 2004 for the eight-hour ozone standard of .08 parts per million in accordance with the Clean Air Act; and

WHEREAS, the Maricopa nonattainment area has had no violations of the eight-hour ozone standard of .08 parts per million since 2004; and

WHEREAS, MAG has prepared the Eight-Hour Ozone Redesignation Request and Maintenance Plan for the Maricopa Nonattainment Area, including the modeling maintenance demonstration; and

WHEREAS, A.R.S. 49-406 H. requires that the governing body of the metropolitan planning organization adopt the maintenance area plan.

NOW THEREFORE, BE IT RESOLVED BY THE MARICOPA ASSOCIATION OF GOVERNMENTS REGIONAL COUNCIL as follows:

SECTION 1. That the MAG Regional Council adopts the MAG Eight-Hour Ozone Redesignation Request and Maintenance Plan for the Maricopa Nonattainment Area and authorizes the submission of the plan to the Arizona Department of Environmental Quality and the U.S. Environmental Protection Agency.

SECTION 2. That the MAG Regional Council further requests that the U.S. Environmental Protection Agency redesignate the Maricopa nonattainment area to attainment status for the eight-hour ozone standard of .08 parts per million.

PASSED AND ADOPTED BY THE REGIONAL COUNCIL OF THE MARICOPA ASSOCIATION OF GOVERNMENTS THIS TWENTY-FIFTH DAY OF FEBRUARY 2009.

Peggy Neely , Chair
MAG Regional Council

ATTEST: _____

Dennis Smith
Executive Director

MARICOPA ASSOCIATION OF GOVERNMENTS

INFORMATION SUMMARY... *for your review*

DATE:

February 17, 2009

SUBJECT:

MAG Regional Human Services Plan for FY 2010

SUMMARY:

The MAG Regional Human Services Plan approved by the MAG Regional Council in 2006, has been updated to reflect funding allocation recommendations for the Social Services Block Grant (SSBG) and to identify new human services transportation coordination goals as required by SAFETEA-LU. The plan also presents an assessment of human services delivery in the region while highlighting useful practices implemented by member agencies to address the impact of the economy on human services.

On January 8, 2009, the MAG Human Services Technical Committee recommended approval of the SSBG allocation recommendations and the major elements to be included in the MAG Regional Human Services Plan for FY 2010. On January 20, 2009, the MAG Human Services Coordinating Committee recommended approval of the MAG Regional Human Services Plan for FY 2010 including the new human services transportation coordination goals and the SSBG allocation recommendations. On February 11, 2009, the MAG Management Committee recommended approval of the MAG Regional Human Services Plan for FY 2010 including the new human services transportation coordination goals and the SSBG allocation recommendations.

PUBLIC INPUT:

Opportunities for public input were made available at the January MAG Human Services Technical and Coordinating Committee meetings. Another opportunity was offered at the February MAG Management Committee meeting. No input was offered at these meetings.

Seven focus groups were conducted with teenagers about the impact of teen dating violence. This feedback was used to develop the new focus on addressing abusers and those at risk of abusing their dating partners. More than 130 interviews were conducted with stakeholders involved in ending homelessness, including people who have or who are experiencing homelessness. This feedback was used to develop the action steps reflected in the draft Regional Plan to End Homelessness as reported in this plan. Stakeholders in human services transportation including nonprofit agencies, member agencies, and members of the public offered feedback to develop the identified strategies to better coordinate human services transportation.

PROS & CONS:

PROS: As needs increase and funding becomes uncertain, it is more important than ever to strategically assess and define priorities in order to maximize the existing resources. This plan combines the expertise of the member agencies, feedback from the public, and the benefit of detailed research to recommend strategies that will directly impact the three human services funding sources in which MAG has direct responsibility. These strategies propose new priorities that will maximize the impact of each funding source.

CONS: No cons are anticipated.

TECHNICAL & POLICY IMPLICATIONS:

TECHNICAL: The SSBG allocation recommendations include a shift from basic needs to crisis management services. The shift in funding came as a result of a new funding formula developed by the committee that takes into account rankings of the services supported by this funding source. The funding formula may be refined each year as needs and demographics of the people served changes. The new human services coordination goals reflect a shift from building communication to promoting shared use of vehicles and more intensive interaction between agencies. The new goals are based on research, community feedback, and provider expertise. The Stuart B. McKinney applicant list responds to a directive from the U.S. Department of Housing and Urban Development (HUD) to more rapidly house homeless families and individuals. These projects have been submitted to HUD and an award announcement is anticipated soon.

POLICY: The revision to the SSBG allocation recommendations will ensure that the most vulnerable populations receive assistance when they need it the most. The new human services transportation coordination goals will help to provide more rides for more people with fewer resources. Older adults, people with disabilities, and people with low incomes are directly affected by these coordination goals. The proposed Stuart B. McKinney projects will result in people remaining homeless for shorter periods of time which lessens the burden on the region.

ACTION NEEDED:

Approval of the MAG Regional Human Services Plan for FY 2010, which includes approval of the new human services transportation coordination goals. This also includes approval of the FY 2010 Social Services Block Grant allocation recommendations to be forwarded to the Arizona Department of Economic Security.

PRIOR COMMITTEE ACTIONS:

On February 11, 2009, the MAG Management Committee recommended approval of the MAG Regional Human Services Plan for FY 2010. This included a recommendation for approval of the Social Services Block Grant allocation recommendations and the new human services transportation coordination goals.

On January 20, 2009, the MAG Human Services Coordinating Committee voted unanimously to recommend approval of the Social Services Block Grant allocation recommendations and the draft MAG Regional Human Services Plan for FY 2010.

MEMBERS ATTENDING

- * Councilmember Trinity Donovan, Chandler, Chair
- * Vice Mayor Rob Antoniak, Goodyear
- + Councilmember Dave Crozier, Gilbert
- + Jason Matthews for Lance Cypert, Tempe Community Council
- + Susan Hallett, Arizona Department of Economic Security
Kathleen Hemmingsen, Scottsdale Human Services Commission
- Councilmember Dina Higgins for
Councilmember Dennis Kavanaugh, Mesa
- * Mayor Marie Lopez Rogers, Avondale
Vice Mayor Manuel Martinez, Glendale
Dan Wollam for Carol McCormack, Mesa United Way
- * Councilmember Michael Nowakowski, Phoenix, Vice Chair
- * Councilmember Onnie Shekerjian, Tempe
- * Supervisor Mary Rose Wilcox, Maricopa County

+Those members present by audio/videoconferencing.
*Those members neither present nor represented by proxy.

On January 8, 2009, the MAG Human Services Technical Committee voted unanimously to recommend approval of the Social Services Block Grant allocations recommendations. They also voted unanimously to approve the major elements to be included in the draft MAG Regional Human Services Plan for FY 2010.

MEMBERS ATTENDING

- Carl Harris-Morgan, Town of Gilbert, Chairman
- +Bob Baratko, City of Surprise
- Kathy Berzins, City of Tempe
- Kyle Bogdon, DES/ACYF
- Patti Evans, City of Goodyear
- * Stefanie Garcia, City of Chandler
- * Paige Garrett, Quality of Life Community Services, Inc.
Susan Hallett for Laura Guild, DES/CPIP
- Jeffery Jamison, City of Phoenix
- Mitzila Hogans for Deanna Jonovich, City of Phoenix
- Jim Knaut, Area Agency on Aging
- Yvonne Seel for Margarita Leyvas, Maricopa County
- + Joyce Lopez-Powell, Valley of the Sun United Way
- Paul Ludwick, City of Scottsdale
- Steven MacFarlane, City of Phoenix
- Jose Mercado for Doris Marshall, City of Phoenix
- Jayson Matthews, Tempe Community Council
- + Joy McClain, City of Tolleson
- Sylvia Sheffield, City of Avondale, Vice Chair
- Carol Sherer, DES/DDD

+Those members present by audio/videoconferencing.
*Those members neither present nor represented by proxy.

EXECUTIVE SUMMARY

In the past year, the region has witnessed alarming increases in human services demand while funding has become uncertain. In this time of crisis, it is more important than ever to critically examine and strategically allocate the region's resources. This plan reflects efforts to maximize the current capacity to meet these increasing needs in the human services funding areas within MAG's purview. These include locally planned dollars of the Social Services Block Grant, Stuart B. McKinney funds, and the Elderly Individuals and Individuals with Disabilities Transportation Program, or Section 5310. Priorities have shifted in response to regional need and federal direction.

Henry Ford once said, "Coming together is a beginning. Keeping together is progress. Working together is success." This document illustrates the work that can be achieved and the impact that can be made when individuals think regionally and act locally. In tough economic times, hard choices will be made, but vibrant opportunities may also be discovered. Strategic planning and the commitment to ensuring a high quality of life for all people is stronger than any challenge that may lie ahead.

An assessment of the regional landscape affected by the funding sources identified above is offered to put these human services issues in context. MAG extends deep appreciation to the hundreds of people who lifted their voices to give shape to this plan. Their input ensures funding recommendations and related goals are responsive to emerging needs and have the best potential for impact. Teens have shared their insights about dating violence, providers have offered their vision of the future need, homeless people have revealed lessons learned on the streets, and committee members have drawn upon their expertise to make difficult decisions. Without the participation of all these groups and more, this plan would not have been possible.

In summary, this plan strives to accomplish the following funding goals:

- Shift \$22,402 in funding from basic needs to crisis management services for locally planned Social Services Block Grant dollars.
- Increase the Stuart B. McKinney award to \$24.3 million to better support the needs of people experiencing homelessness and domestic violence.
- Maximize the current capacity to deliver human services transportation programs by rewarding Section 5310 applicants requesting shared vehicles and by intensifying coordination efforts.

The plan will offer more detail on these efforts. For more information, please contact the MAG Human Services Division at (602) 254-6300 or visit the Web site at: <http://www.mag.maricopa.gov/division.cms?item=65>.

INTRODUCTION

Every day, people reach out for help because they do not know where to turn. All too often, there is no help to be found. Programs are being eliminated, not for lack of effectiveness, but for lack of funding. Agencies who used to provide critical services are now struggling just to keep their doors open. More than ever before, people who have never needed help before join the throngs of those homeless, needing help, or not knowing where to turn. This plan seeks to initiate the dialogue and action required to address these needs.

In the past year, the region has witnessed alarming increases in human services demand while funding has become uncertain. In this time of crisis, it becomes more important than ever to critically examine and strategically allocate the region's resources. This plan reflects efforts to maximize the current capacity to meet these increasing needs in the human services funding areas within MAG's purview. These include locally planned dollars of the Social Services Block Grant, Stuart B. McKinney funds, and the Elderly Individuals and Individuals with Disabilities Transportation Program, or Section 5310. Priorities have shifted in response to regional need and federal direction.

This region, like many others across the nation, is facing hardships on an incredible scale. The region averages 300 to 500 foreclosure listings a day while municipalities are scaling back on personnel and services due to budget shortfalls (Sign 2008). Agencies are caught in the middle as they receive less support yet they are still faced with increasing demand. This plan will offer relevant information on the state of the region's human services delivery system in the context of the current economic downturn.

Next, the plan will highlight proactive strategies for three funding sources supporting these agencies and the people they serve. Services in the areas of human services transportation, vulnerable populations, and homelessness will be addressed specifically.

MAG has direct responsibility for recommending funding for locally planned Social Services Block Grant dollars; developing human services transportation coordination plans for Section 5310, 5316 and 5317; and for preparing the consolidated application for Stuart B. McKinney funds for homeless assistance programs. An assessment of gaps and opportunities will be offered with specific action steps for each of the three funding sources.

The region will not survive this economic crisis by maintaining the status quo. New ways of doing business and interaction needs to be identified and embraced if needs are to be met effectively. Fortunately, many are already working in this direction. Agencies are joining forces to meet new challenges together. Priorities for funding are shifting to a crisis management mode to ensure the fewest casualties possible. People are reaching across sectors and history to discover new possibilities. There is a role for everyone in this pursuit, whether as a leader, volunteer, or funder.

The next section will offer information about the impact of the economy on human services delivery.

LANDSCAPE OF HUMAN SERVICES

This section will address the impact of the economy's downturn on human services delivery from five different perspectives. The struggles of individuals will shed light on who is seeking assistance and why. Agencies will be assessed for both their contribution to and their dependence on the community. Information about funders will offer a perspective on the level and areas of support available to meet the need. The efforts of municipalities will be explored as the fourth perspective. Last, data and projections about the region's rapid population growth will be offered.

Individuals

Demographics

The 2005-2007 American Community Survey provides the following estimates for Maricopa County. As will be noted in the chart below, this region's households are slightly larger, younger and more affluent than the national average.

Table 1: 2005-2007 American Community Survey—Demographics Estimates

Social Characteristics	Estimate	Percent	U.S.	Margin of Error
Average household size	2.82	(X)	2.60	+/-0.01
Average family size	3.45	(X)	3.19	+/-0.02
Population 25 years and over	2,396,555			+/-151
High school graduate or higher	(X)	83.7%	84.0%	(X)
Bachelor's degree or higher	(X)	27.2%	27.0%	(X)
Civilian veterans (civilian population 18 years and over)	301,112	11.0%	10.4%	+/-4,173
Disability status (population 5 years and over)	430,395	12.6%	15.1%	+/-6,001
Foreign born	649,074	17.2%	12.5%	+/-10,070
Male, Now married, except separated (population 15 years and over)	736,922	50.8%	52.6%	+/-5,998
Female, Now married, except separated (population 15 years and over)	700,773	48.5%	48.5%	+/-5,253
Speak a language other than English at home (population 5 years and over)	955,878	27.7%	19.5%	+/-9,879
Household population	3,724,924			+/-558
Group quarters population	(X)	(X)	(X)	(X)

**Table 1:** 2005-2007 American Community Survey—Demographics Estimates (continued)

Economic Characteristics	Estimate	Percent	U.S.	Margin of Error
In labor force (population 16 years and over)	1,876,229	66.0%	64.7%	+/-5,975
Mean travel time to work in minutes (workers 16 years and over)	26.4	(X)	25.1	+/-0.2
Median household income (in 2007 inflation-adjusted dollars)	53,549	(X)	50,007	+/-443
Median family income (in 2007 inflation-adjusted dollars)	63,425	(X)	60,374	+/-650
Per capita income (in 2007 inflation-adjusted dollars)	26,510	(X)	26,178	+/-195
Families below poverty level	(X)	9.0%	9.8%	(X)
Individuals below poverty level	(X)	12.8%	13.3%	(X)
Housing Characteristics	Estimate	Percent	U.S.	Margin of Error
Total housing units	1,492,572			+/-288
Occupied housing units	1,318,623	88.3%	88.4%	+/-4,300
Owner-occupied housing units	900,357	68.3%	67.3%	+/-4,641
Renter-occupied housing units	418,266	31.7%	32.7%	+/-5,597
Vacant housing units	173,949	11.7%	11.6%	+/-4,346
Owner-occupied homes	900,357			+/-4,641
Median value (dollars)	248,800	(X)	181,800	+/-1,462
Median of selected monthly owner costs				
With a mortgage (dollars)	1,470	(X)	1,427	+/-8

Source: U.S. Census Bureau, 2005-2007 American Community Survey

**** - The median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

***** - The estimate is controlled. A statistical test for sampling variability is not appropriate.

'N' - Data for this geographic area cannot be displayed because the number of sample cases is too small.

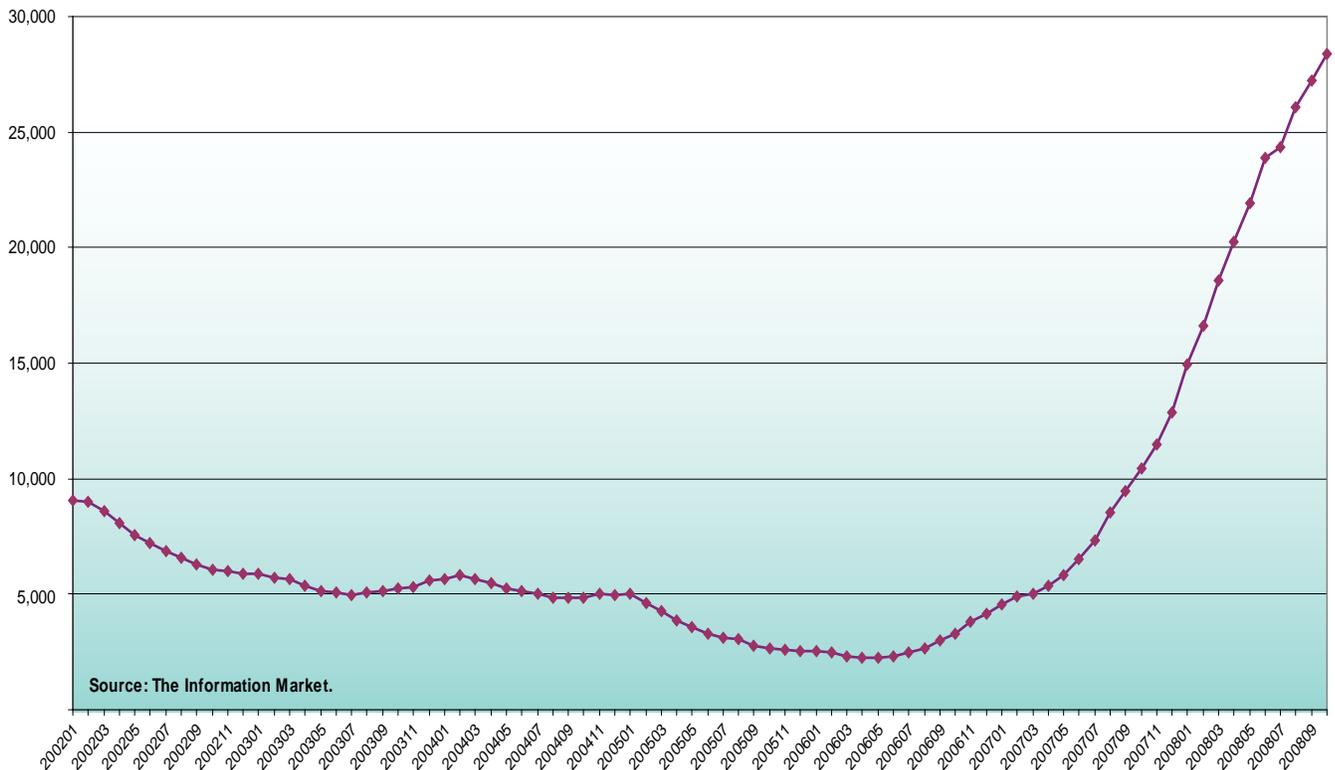

(X) - The value is not applicable or not available.

Foreclosure Crisis

Like the rest of the country, the foreclosure crisis has affected the economic stability and social fabric of this region. This event precipitated the current economic downturn. It has been particularly challenging for this region, which had so much of its projected future embedded in increasing home sales. The inventory of foreclosed homes in this region has climbed to unprecedented levels as shown in the following chart created by MAG with data from the Information Market (MAG 2008).

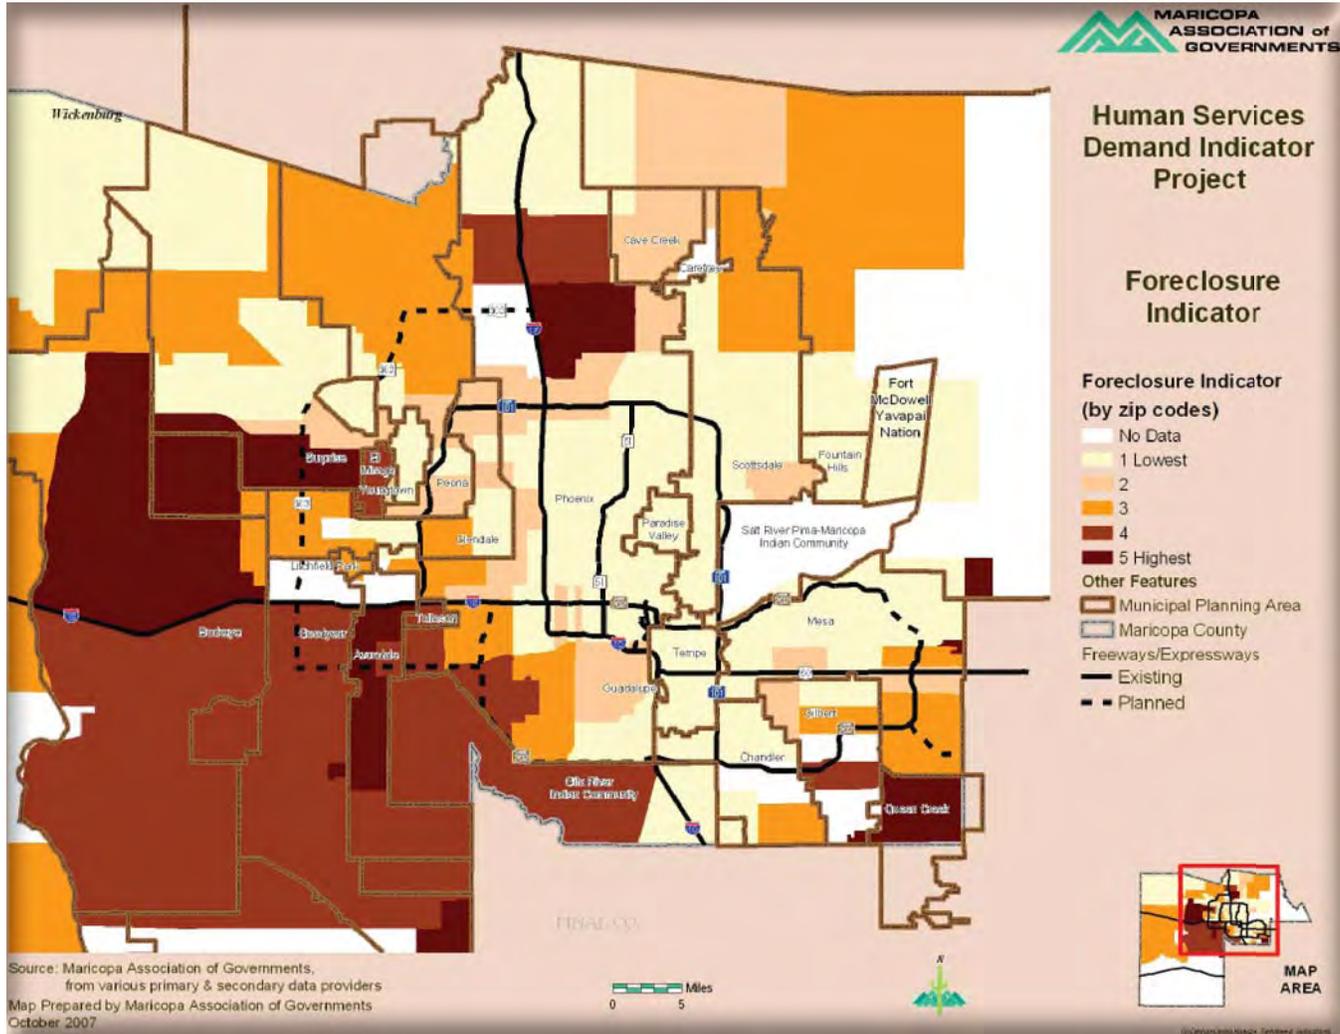

Figure 1: Inventory of Foreclosed Homes in the MAG Region

RealtyTrac reports the number of foreclosures in most zip codes more than doubled during the first six months of 2008 as compared to the same time period in 2007 (RealtyTrac 2008). Some areas, especially those in the outlying areas, have sustained losses much higher than the national average. The 2008 MAG Human Services Resource Assessment Project assessed the locations of foreclosures in the following map. At a glance, it is apparent while the entire region is suffering from the foreclosure crisis, some areas have been hit much harder due to large numbers of homes built within the last five years.

Figure 2: Human Services Demand Indicator Project—Foreclosure Indicator

Although the numbers have increased, the picture is much the same. Thousands of homes are being lost to foreclosure. This devastates not just the displaced family, but also places a strain for those left behind. *Figure 3 (page 9)* illustrates the negative equity created for the neighbors of those with foreclosed homes. Negative equity occurs when one’s home is worth less than what is owed on the home. People commonly refer to this as being “upside down” on their loan. This means people are paying more than their home is worth and makes refinancing unlikely if not impossible. People in this situation are more likely to walk away from their home and let it slip into foreclosure during difficult financial times.

Some choose to sell their home at a loss rather than face foreclosure or continue to pay more than their home is worth. *Figure 4 (page 10)* compares the number of homes sold in the region at a loss versus the number that foreclose.

Figure 5: Phoenix Metro Area Homes with Negative Equity

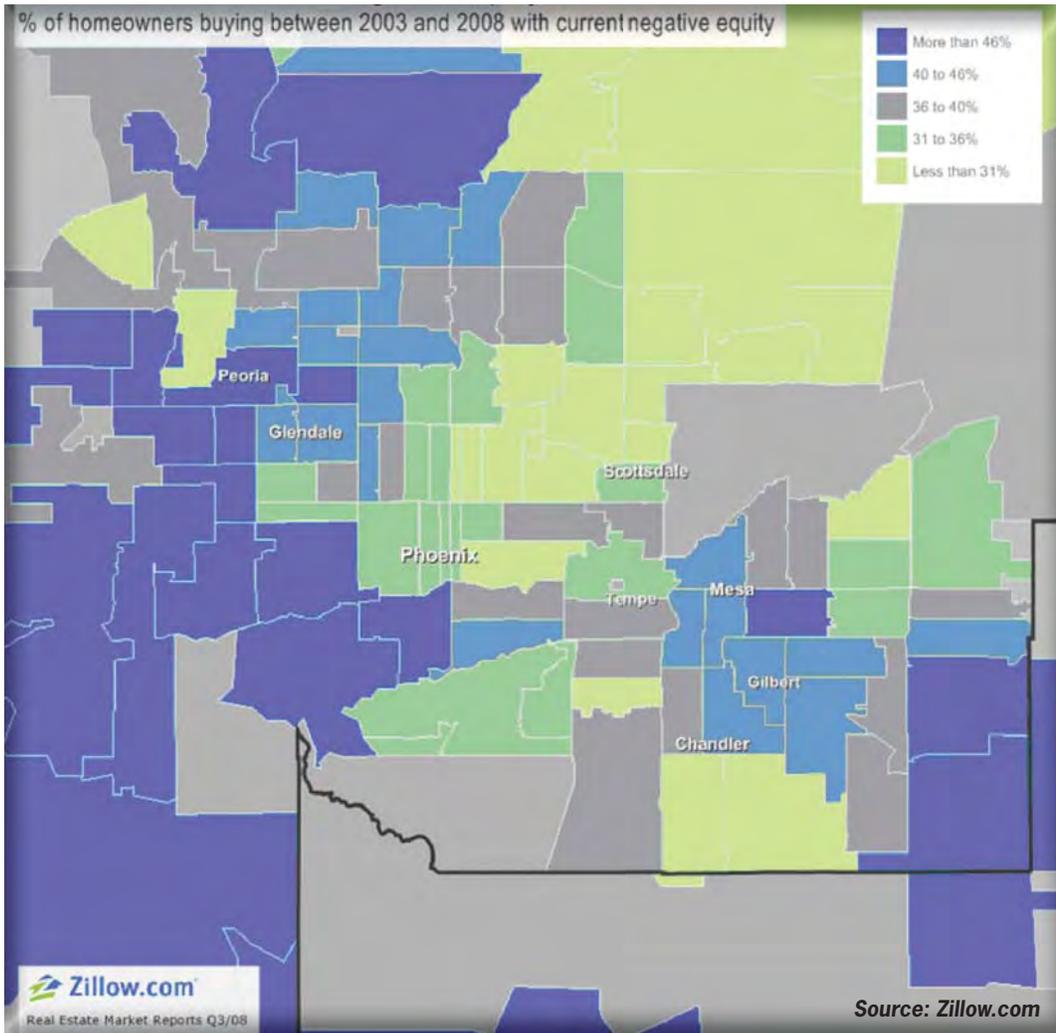

Figure 5 (page 10) was created by MAG with data from the Information Market (MAG 2008) and shows the inventory of foreclosed homes continues to increase. Unfortunately, homes are not selling as quickly as they can foreclose (MAG 2008).

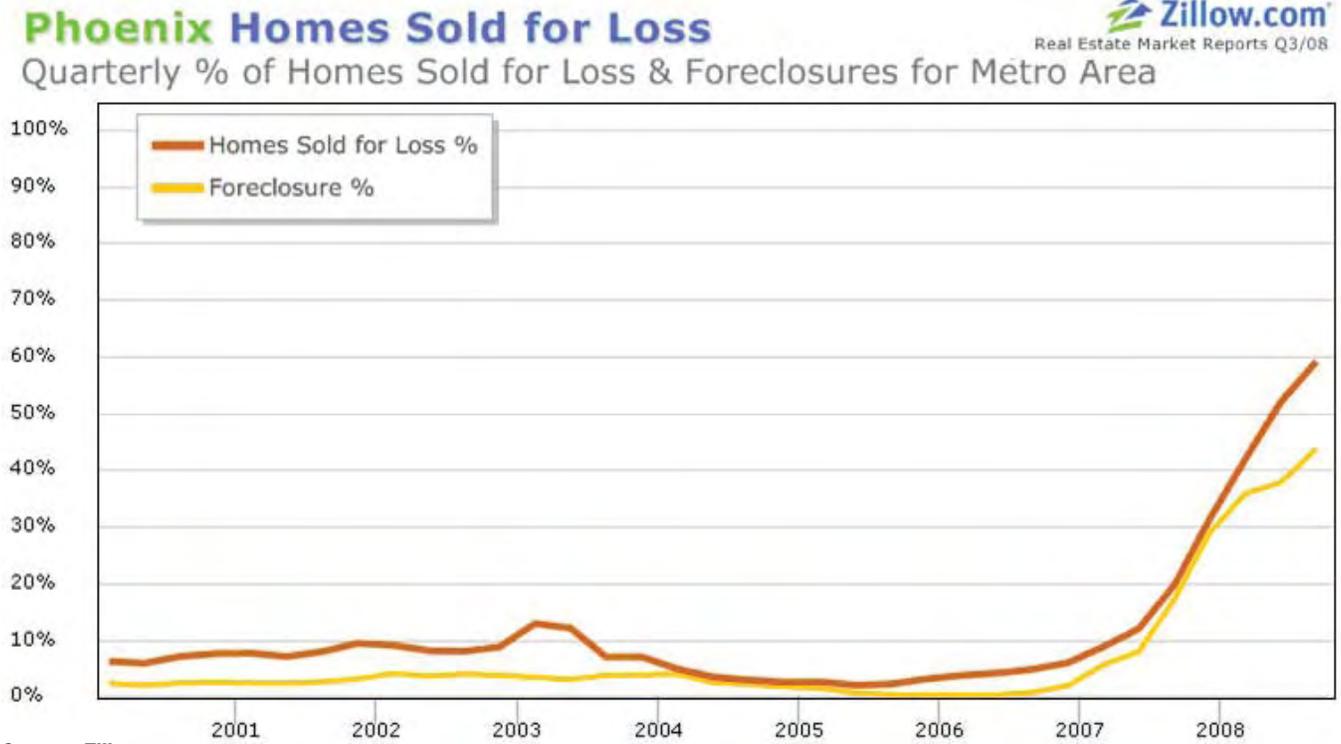

Events and assistance are being offered throughout the region to keep homes and neighborhoods intact. The State has established a hotline, 1-877-448-1211, so people can access information at all times. The federal government is considering a stimulus package to spur infrastructure and an economic recovery sooner rather than later. While assistance is ramping up, the charts illustrate not everyone receives help when they need it.

The hidden population left out from this assistance is renters who live in homes being foreclosed. The landlord has no legal responsibility to tell the tenant if they are facing foreclosure. It is legal to continue accepting rent payments, even if the mortgage is not being paid.

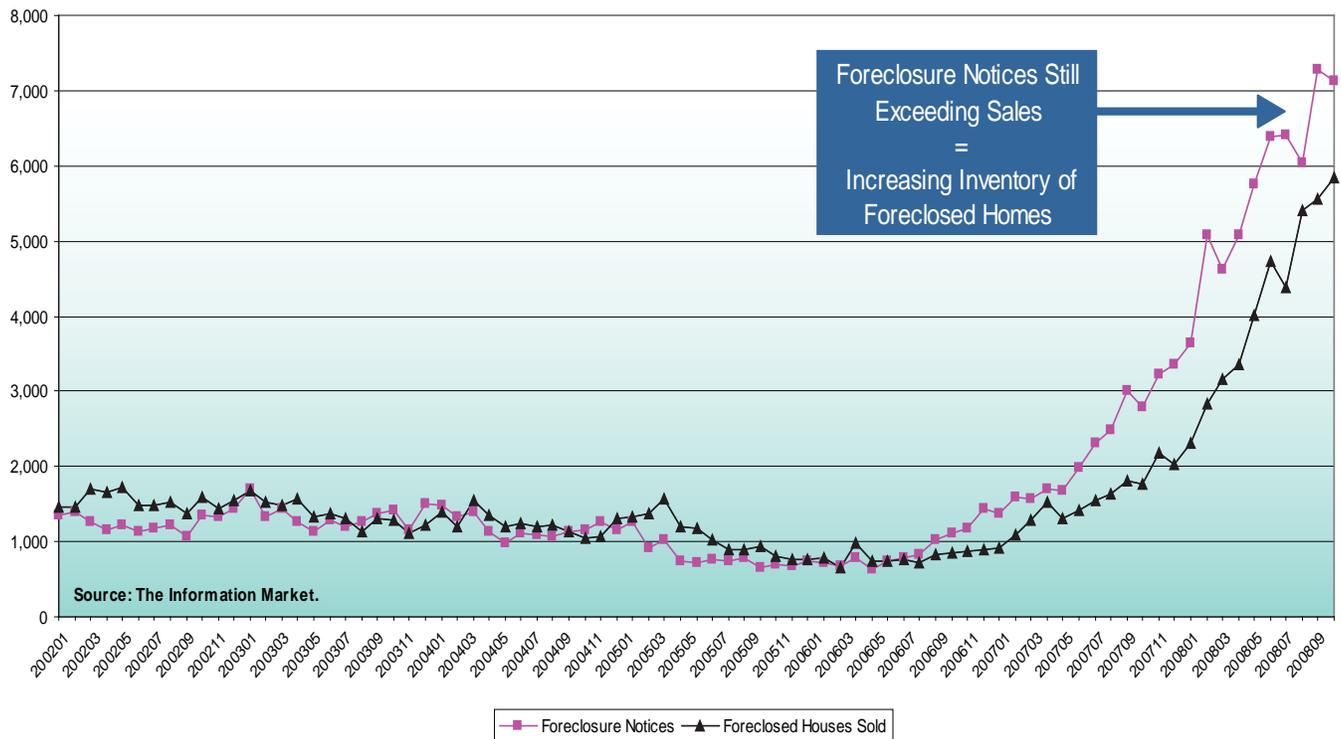

Figure 4: Phoenix Metro Area Homes Sold for a Loss

Source: Zillow.com

Figure 5: Phoenix Metro Area Foreclosure Notices Compared to Foreclosed Homes Sold

This places many in jeopardy who may be faithfully paying their rent every month. They may still be without a home because the landlord/homeowner did not pay the mortgage. Many of the agencies who used to provide rental assistance are no longer able to do so because their own funding has been cut. Without an avenue for assistance, many have nowhere to go but to equally burdened families and friends, or the streets.

Benefits Gap

Even when assistance is available, people do not always access it. ACORN estimates benefit gaps for this region in food stamps; child care assistance; Women, Infants and Children (WIC); health insurance; energy assistance; and the Earned Income Tax Credit. In total, this gap results in \$997 million left unclaimed every year with 377,000 people forgoing critical means of assistance.

Contributions of Time and Money

Fortunately, researchers estimate some individuals will continue to donate money, despite their own economic hardships. Boston College's Center on Wealth and Philanthropy reports the country is in a "wealth recession" after suffering three successive quarters involving a decrease in the real value of wealth (Schervish 2008). The last time the country underwent a wealth recession was in 1999 after the dot.com bubble burst. While real wealth plummeted then 20 percent, the highest percent since 1930, people's charitable contributions decreased only by 10 percent a year later. When net wealth began to increase in 2002, private donations increased as well.

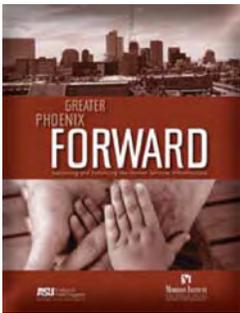

A report by Arizona State University's Lodestar Center for Philanthropy and Nonprofit Innovation, "Giving and Volunteering," suggests the biggest reason donors decided to stop giving was when they no longer felt connected to the agency anymore. Personal financial constraints did not come into the picture until number four on the list, after discontinued involvement with the organization and being misled by the organization. People in this region continue to give to organizations, even in the midst of economic hardships.

Typically nonprofit agencies receive 15 percent of their budget from private donations. Despite this relatively small ratio, this can be an important and relatively stable source of support. For example, the wealthiest families in Arizona gave an astounding \$1.4 billion to local charities in 2005. This is significantly more than local foundations, who gave \$350 million in that same time period (Theisen and Portnoy 2008).

Agencies

Economic Role

Many view nonprofit, community based and faith based organizations as an important source of support for people in need. In doing so, they rely on these agencies to create a support system for the most vulnerable within the region. Many people are unaware of the extent to which these agencies serve as an economic engine and their contributions to the economy.

Greater Phoenix Forward, a recent report by the Morrison Institute, highlights the role nonprofit agencies play in the region's economy. In 2006, there were 10,335 nonprofit agencies on file with the IRS (Morrison Institute for Public Policy 2008). When including agencies too small to file with the IRS, the number of nonprofit agencies in the region swells to 23,000. Of the agencies who did file with the IRS, their collective revenues totaled \$11.5 billion and their assets came to nearly \$20 billion. A work force of paid staff and volunteers of 213,000 people makes human services not just a priority, but big business. The human services ranks exceed other popular employment sectors like restaurants, manufacturing, and finance. More people and money are invested in and through nonprofit agencies than many realize.

If the average overhead of 20 percent holds true for the majority of the agencies in the region, then nonprofit agencies alone are responsible for pumping more than \$9 billion into services for people in need on an annual basis. This figure does not take into account the money saved through intervention. For example, a study in Denver found placing the 513 chronically homeless people in their region directly into housing with supportive services would accrue savings of more than \$16.1 million a year (Perlman and Parvensky 2008). The presence of nonprofit agencies contributes significantly to the region's economy. Their absence would be even more significant but in a devastating way.

Meeting the Need

The *2008 Governor's Survey of Arizona Nonprofit and Faith-Based Communities* as presented by Valley of the Sun United Way indicates although 77 percent of agencies report increased demand, 75 percent are experiencing a decline or stagnation in revenues and donations. Behavioral health, substance abuse, food, advocacy and case management agencies reported the biggest declines in support. More than three quarters of all respondents were bracing themselves for even more increases in demand over the next year, despite level or reduced funding.

New innovations like the *Housing First* model described above in relation to Denver have the potential to reap tremendous benefits in cost effective ways. At the same time, current issues like the foreclosure crisis are making more business for nonprofit agencies and other organizations in the human services sector. The MAG Continuum of Care Regional Committee on Homelessness voted to increase the unmet need by 25 percent despite a 15 percent decrease in the annual street count (MAG 2008). They based the increase in anticipation of increased demand due in part from the foreclosure crisis and the downturn of the economy.

One local shelter reports nearly 200 homeless people sleeping in the parking lot after every bed inside the shelter was full. Some Community Action Program offices are reporting 20 to 30 percent increases in the number of calls received, with an unprecedented number coming from people who have never sought assistance before. Given these increases, the demand for human services is expected to continue to increase at a time when revenue is already strained.

Funders

The region benefits from a variety of funders dedicated to human services. Valley of the Sun United Way, Mesa United Way, local foundations, individual donors, and governments all play an important role in supporting this work. Generally, nonprofit agencies receive about 60 percent of their funding from local, county, state, and/or federal governments; 25 percent from fees for service; and 15 percent from charitable organizations (Theisen and Portnoy 2008). This section will focus on two important sources of federal funding in flux, as well as local foundations and the shifts in priorities occurring as a result of the economy.

Federal Funding

Although there are a number federal sources that support regional human services programs, this section will focus on two of them. The first has been a priority of the MAG Regional Council and the MAG Human Services Coordinating Committee (HSCC), while the second brings significant new dollars at a critical time.

Low-Income Home Energy Assistance Program

Federal funding, while an important source of support, is not always equally distributed to the 50 states. The MAG Regional Council formally advocated in September 2006 and May 2007 for the region to receive its fair share of federal funding for a number of block grant programs, including the Low-Income Home Energy Assistance Program (LIHEAP).

LIHEAP

LIHEAP assist eligible low-income residents with their heating or cooling bills. Historically, this region has not received its fair share of LIHEAP because the national formula is geared toward cold winter states. Only about five percent of those eligible for LIHEAP in this region actually receive it due to lack of funds. For example, New Hampshire has far fewer people, especially low-income people, than Arizona does. This cold weather state has one fifth of Arizona's population and only a tenth of those with low-incomes, yet they draw down \$48 million in LIHEAP as compared to Arizona's \$29 million. This discrepancy would have been even more pronounced but Arizona's share grew from just \$9 million from 2008 to 2009 (Hansen 2008).

Additional increases from contingency and emergency allocations have brought much needed dollars to the State. For example, Maricopa County's allocation grew from just \$925,641 at the beginning of SFY 2009 to a total of \$3,424,855 as of January 2009. The City of Phoenix receives \$5,070,000 as of January 2009 after an emergency allocation of \$713,306. Last year, 28,000 households received assistance throughout the State. This year, the increased allocation is projected to reach out to an additional 52,000 people. Unfortunately, roughly 620,000 people will go without assistance despite being eligible (Hansen 2008).

These dollars are critical for vulnerable residents. Forty percent of the people who receive the assistance have a family member with a disability in the household and nearly as many have children under the age of five (Hansen 2008). The Applied Public Policy Research Institute for Study and Evaluation reports low-income eligible people in the State spend three times more on residential energy than the national average (MAG 2007). Despite the need based on disability, age and financial burden, the region has yet to receive a truly equitable allocation of LIHEAP.

Additional funding is always needed and appreciated in this area. The influx of additional LIHEAP dollars brings an unintended challenge due to the downturn of the economy. Many municipalities have already or are considering staff reductions in response to budget constraints. This means they will have fewer staff to process applications for assistance, just as the funding and demand are increasing. Valley communities are approaching this

challenge differently. Some are training community volunteers while others have management staff working the front lines. The priority is to ensure the assistance reaches the people who need it the most as efficiently as possible. This not only helps the individual, but it also positions the region to receive increases in the future.

Neighborhood Stabilization Program

Assistance in response to the economy's downturn is coming to the region under Title III of the Housing and Economic Recovery Act of 2008. The U.S. Department of Housing and Urban Development (HUD) is providing states and select municipalities the Neighborhood Stabilization Program (NSP). This stimulus is intended to assist communities acquire, rehabilitate, and make foreclosed homes available to residents. The activity is intended to promote redevelopment and reduce the decline of neighborhoods in response to foreclosure. Each recipient community is responsible for developing a plan to allocate dollars awarded to maximum effect. The following chart details the areas receiving NSP funding in this region (HUD 2008).

Table 2: Neighborhood Stabilization Program Funding in the MAG Region, 2008.

Area	NSP Allocation	Local Foreclosure Rate	Local Abandonment Risk
AZ State	\$38,370,206	5.0%	Low
Avondale	\$2,466,039	7.2%	Medium
Chandler	\$2,415,100	4.2%	Low
Glendale	\$6,184,112	7.0%	High
Maricopa County	\$9,974,267	5.4%	Low
Mesa	\$9,659,665	5.8%	Medium
Phoenix	\$39,478,096	7.1%	High
Surprise	\$2,197,786	5.5%	Low

Foundations

The 2008 Arizona Grantmakers Forum Annual Giving Report indicates there are 1,111 private, public and support foundations in this region. They define private foundations as those funded entirely by an individual, family, or corporation. Public foundations have a different tax status and include agencies such as the United Way. Support foundations exist to complement the work of a community foundation and are considered a public foundation due to their close relationship with another publicly supported foundation.

Of the 1,111 foundations in the region, their total assets represent nearly \$5.9 billion with the majority filing as private foundations. Private foundations in this region increased their assets by 33 percent from 2004 to 2006 while those outside this region and Tucson increased by 53 percent. Contributions from all foundations in the region increased 60 percent during this time period. Despite these increases, Arizona foundations still rank in the bottom 10 states with \$645 in assets per capita, compared to the state of Washington, ranked number one, with \$6,797 in assets per capita.

Shifts in Priorities

Foundations and other funders are taking different approaches to the current economic climate. Some such as the Valley of the Sun United Way are keeping their funding formula the same in an attempt to retain some stability for the region's nonprofit agencies. Others are realigning their priorities to meet emerging needs caused by the downturn of the economy. Both the Nina Mason Pulliam Charitable Trust and the Virginia G. Piper Charitable Trust have refocused their efforts on emergency needs such as food and shelter (Scott 2008). Other projects like capital campaigns have been put on hold until the economy improves. This will route millions of dollars, and up to 75 percent of Pulliam's funding, for emergency needs.

The MAG Human Services Coordinating Committee is also recommending changes in response to the economic crisis. As will be discussed later in the report, priorities for the allocation recommendations affecting the locally planned Social Services Block Grant dollars are shifting from basic needs to crisis response services. Programs like emergency shelters will receive a boost in funding while other services will receive a reduction.

Changes are also being implemented to the Section 5310 grant program. Section 5310 is a capital award grant program designed to support agencies transporting older adults and people with disabilities. Agencies with committed agreements to share vehicles will be awarded more favorably than agencies who apply for vans independently. This will increase the rides offered and decrease downtime all within the current capacity of the system. More about this will be presented later in this report.

Municipalities

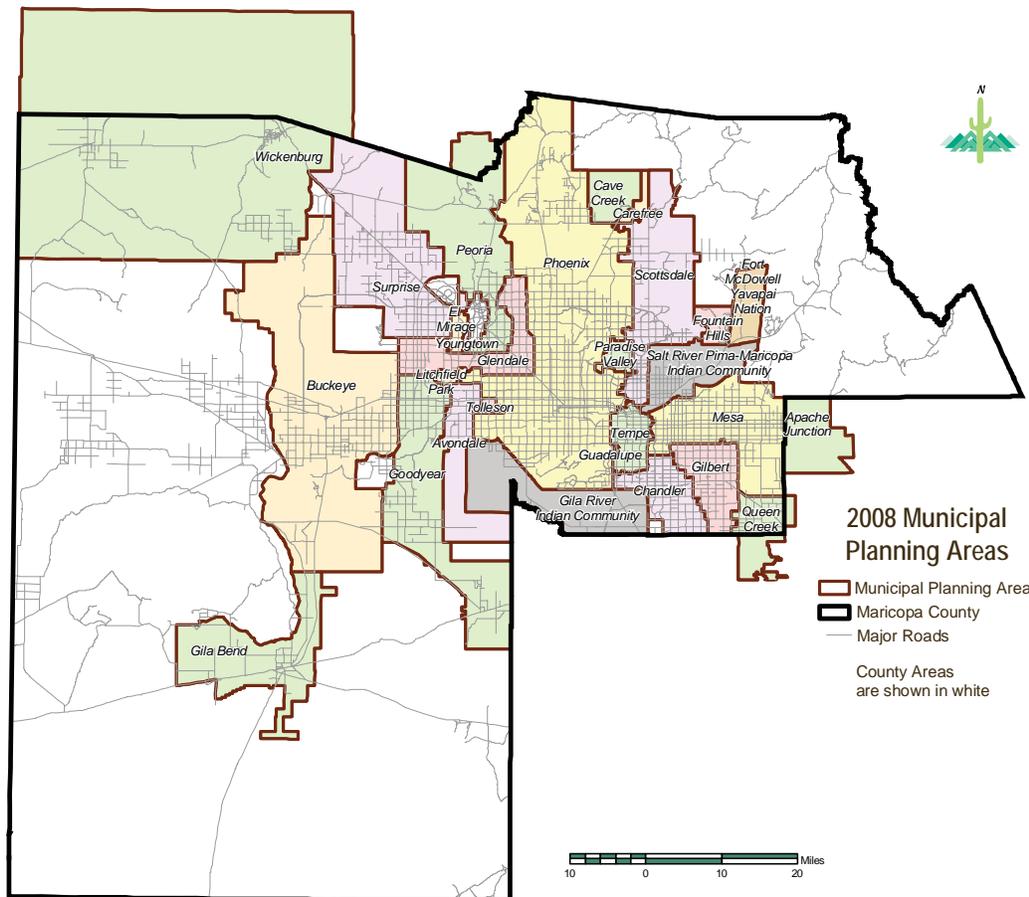

The recent economic crisis is challenging each city and town to reexamine what it supports in relation to the need to reduce spending. More than ever before, human services programs are competing with other essential services like fire and police.

Consolidated Plans

The U.S. Department of Housing and Urban Development (HUD) requires compliance with a local consolidated housing plan prior to disbursement of funding. The consolidated plans identify needs in the community related to affordable housing, homelessness, special needs, and community development. Priorities are identified for both short- and long-term needs strategies. These five-year plans serve as an investment guide specifically for the Community Development Block Grant, Emergency Shelter Grants, HOME Investment Partnerships Program, American Dream Downpayment Initiative, and Housing Opportunities

Figure 6: MAG 2008 Municipal Planning Areas

for Persons with AIDS. The plan is also consulted prior to any other HUD award made to the region. These plans trigger strategic planning and important funding sources for the municipalities and counties within this region.

Although the individual municipalities or sub-regions develop their plans, there is not a consolidated planning process for the region. Communities approach the planning process differently as well. MAG member agencies may be using local funds, Community Development Block Grants, and other locally controlled resources to address human services needs in their areas. Those local efforts are documented in locally adopted Consolidated Plans and are incorporated by reference in this plan. For a copy of the plans, please contact the community of interest or visit: <http://www.hud.gov/offices/cpd/about/conplan/local/index.cfm>.

Budget Reductions

Each municipality in the region is developing a plan for how they will address the needs of their residents. Reductions implemented so far in FY 2009 in human services budgets range, for example, from \$52,277 to \$3.6 million. Additional cuts of up to 30 percent are under consideration in some municipalities. Although the scale is dramatically different, the implication is similar. Municipalities are being challenged in their effort to meet the needs of their residents.

Solutions

Municipalities are taking proactive steps to be responsive to residents' needs within their current budget constraints. The following are a few examples of useful practices already occurring throughout the region.

- One city is piloting a revision to its home delivered meals program to reduce travel to four days with frozen meals offered as a substitution for the fifth day. This will reduce fuel cost while continuing to meet the nutritional needs of older adults served by the program.
- Another municipality took its contracted transportation service in-house. This resulted in greater cost efficiency while retaining high quality service.
- Others are reevaluating the services they offer and retaining the ones consistent with their core function and transitioning others to more appropriate agencies.

All this activity not only will save money, but it will also strengthen the municipalities and increase their capacity to serve.

Region

Geography and Population Growth

Geographically speaking, the MAG region is 9,555 square miles. This makes it bigger than eight states. This is an important consideration not just in terms of size, but in scope and diversity. Parts of the region are very urban, like Phoenix, whereas others retain more of a rural climate, like Wickenburg. Many communities are in transition from rural to urban and are facing the ensuing culture clash as new people bring new identities and priorities.

The map below depicts the region in 1955 with a population of 470,000 people (MAG 2008). The second map (page 20) shows a population of 3.1 million people in 2000. The dramatic growth is seen throughout the region (MAG 2008).

Figure 7: MAG Region Population Concentration, 1955

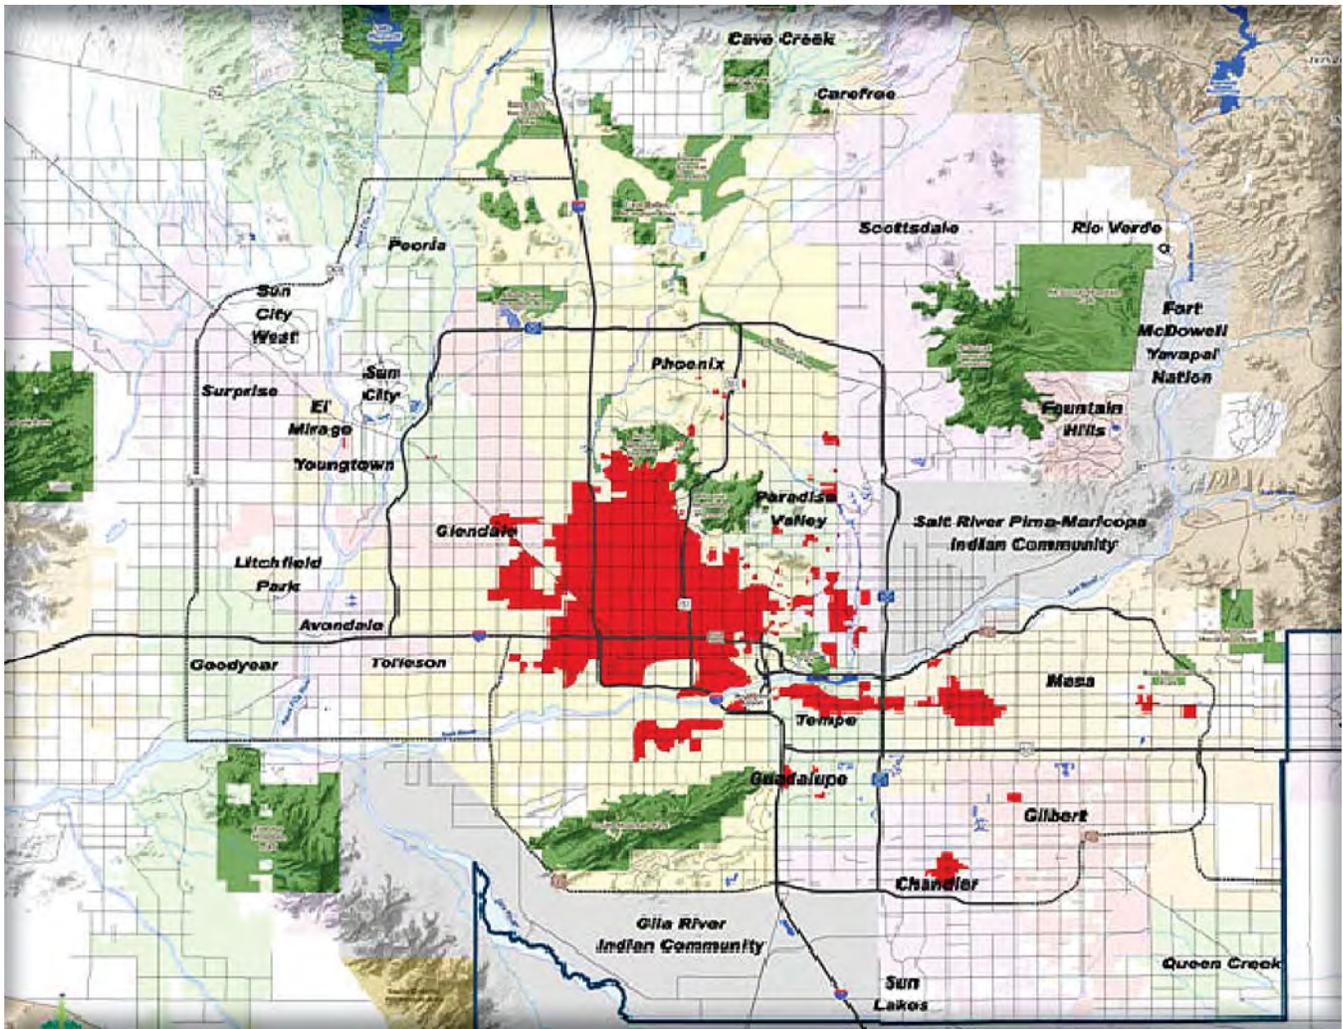

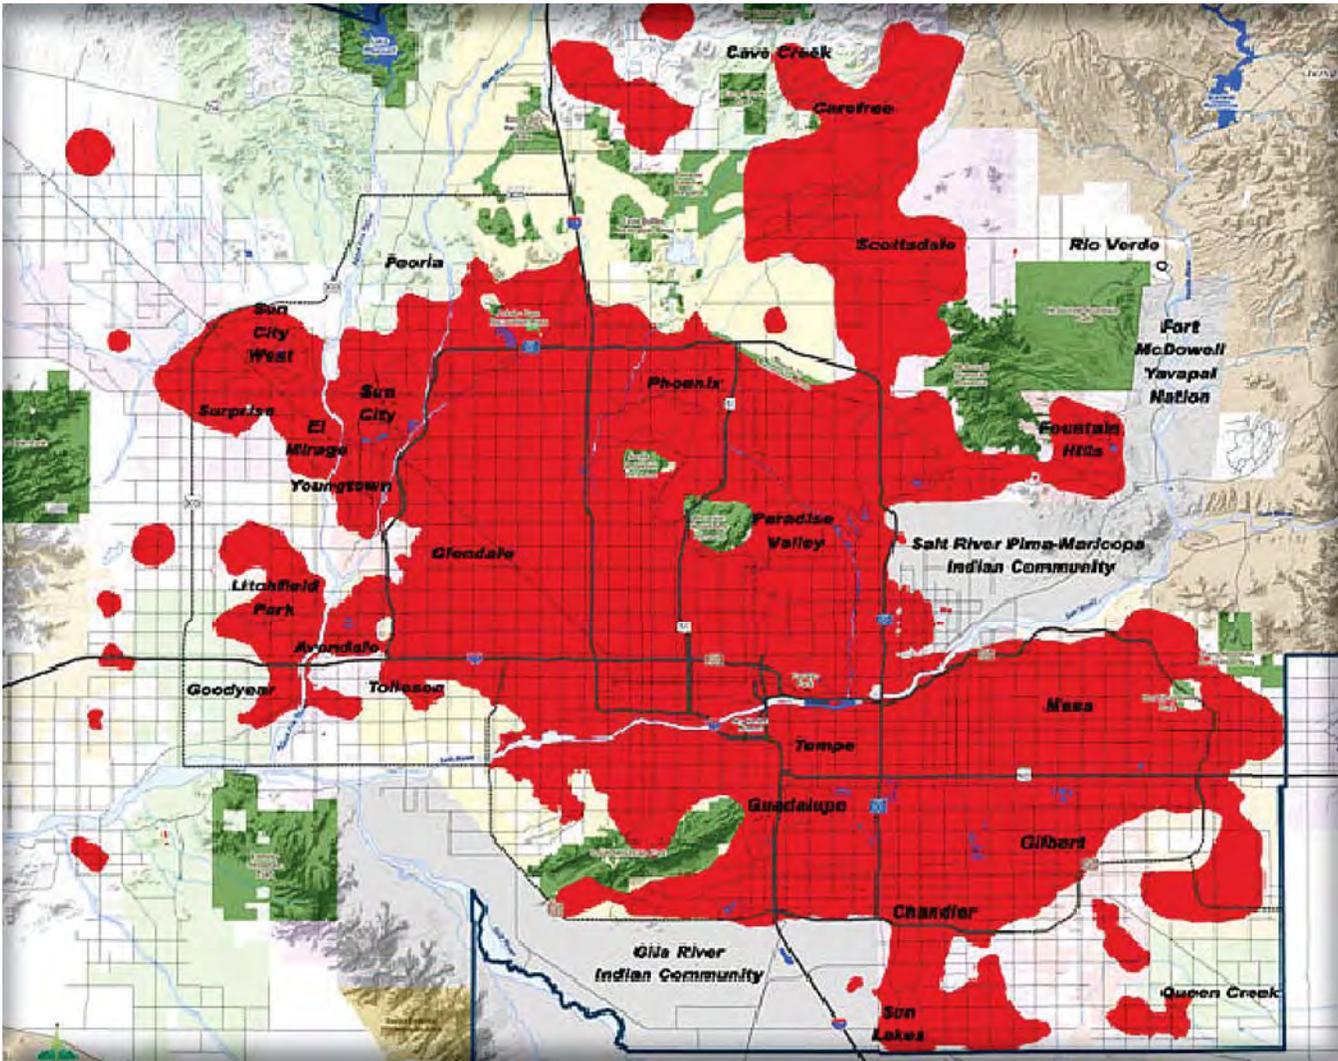

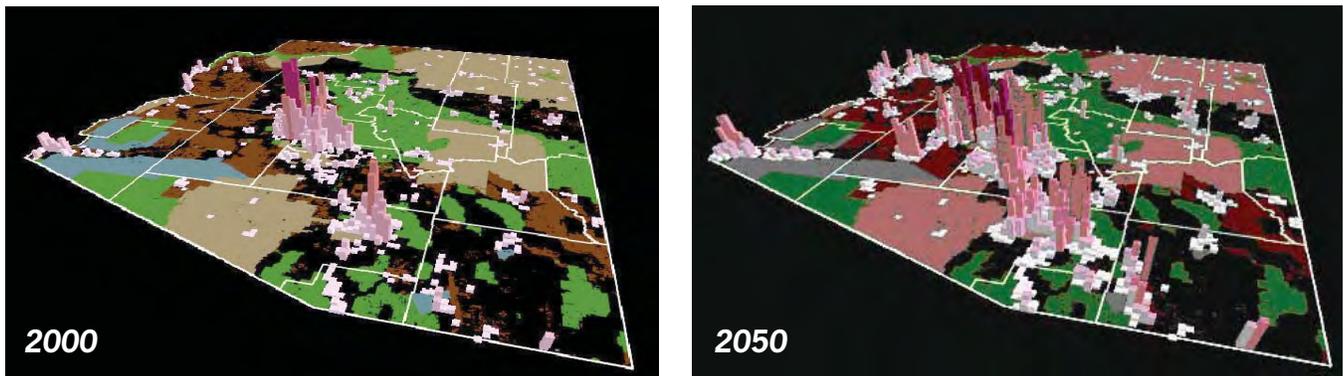

Figure 8: MAG Region Population Concentration, 2000

The region is no longer considered just an urban area. It is being tracked as one of 20 megapolitan areas in the country. This megapolitan area extends from Tucson, covers this region, and continues north to Flagstaff. This is an important consideration for planning as it demonstrates the need not just for responsible planning here, but the urgency to coordinate with contiguous areas. A conservative estimate of people moving here is 100,000 each year. That trend is expected to continue. Up to two-thirds of those coming to the region do not choose to remain here long-term. Retaining a long-term focus with short-term residents can be a struggle. The more people acculturate quickly and remain, the more committed they will be to the region and to its long-term development.

Tremendous growth is estimated to continue throughout the State, but it will be concentrated in the following few counties, Maricopa, Pima, Pinal and Mojave. The following maps dramatically illustrate the density expected to occur as a result of this

Figure 9: MAG Metropolitan Density Projections, 2000 and 2050

anticipated growth from 2000 to 2050 (MAG 2008). This influx of new people and increased density will dramatically change the landscape of the region, and correspondingly, human services.

Crisis Management Strategies

This region faces an unusual blend of challenges and opportunities given its rapid population growth, experience with the foreclosure crisis, and historically low levels of federal support in critical areas. The impact of the economy's downturn has placed providers and the public in a crisis mode. Daunting increases in demand force the human services delivery system to adapt or fail at an alarming rate. The Arizona Community Action Association is spearheading efforts to address the crisis statewide. This region is responding in a number of ways to strategically address the crisis. Human Services Committees at MAG have pledged to undertake the following:

- Track human services budget reductions implemented since January 2008 to better understand the scope of need being created.
- Make information on unit cost available to local foundations as requested so they can better estimate the impact of their dollars.
- Disseminate local information about useful practices in meeting needs regionally to increase capacity and replicate successes.
- Maximize limited resources by rewarding agencies that request shared vehicles through the Section 5310 application process.

- Develop a mechanism to better utilize Section 5310 vehicles by matching agencies with underutilized capacity with agencies needing transportation for their clients.
- Prepare for increased rates of homelessness by reporting an increase of 25 percent in the unmet need to the U.S. Department of Housing and Urban Development.
- Shift \$22,402 from basic needs to crisis management services for locally planned Social Services Block Grant dollars.

These strategies will better position the region to directly address the needs. Continued communication and commitment to making a difference will result in the development of additional strategies to make a positive impact on the region.

FUNDING RECOMMENDATIONS AND GOALS

Funding is always a critical component of human services delivery, but the careful assignment of funding to achieve the most impact during tough economic times becomes a matter of survival. MAG is responsible for more than \$26 million of human services funding in three areas. These areas affect a wide range of people including those experiencing homelessness, domestic violence, disabilities, and advanced years. It is critical to ensure funding is reaching those most in need to have the most positive impact possible. This section will offer recommendations and goals for each of the three areas affected by MAG's regional human services funding planning activities.

Social Services Block Grant

History

DEPARTMENT OF ECONOMIC SECURITY

Your Partner For A Stronger Arizona

For more than 30 years MAG has been under contract with the Arizona Department of Economic Security (DES) to develop allocation recommendations for SSBG. When the funding increased or decreased significantly in the past, the allocation recommendations changed to make best use of the available dollars. Although a change in SSBG funding is not expected at this time, adjustments have been proposed in response to the increased need for specific services and reductions of other funding sources.

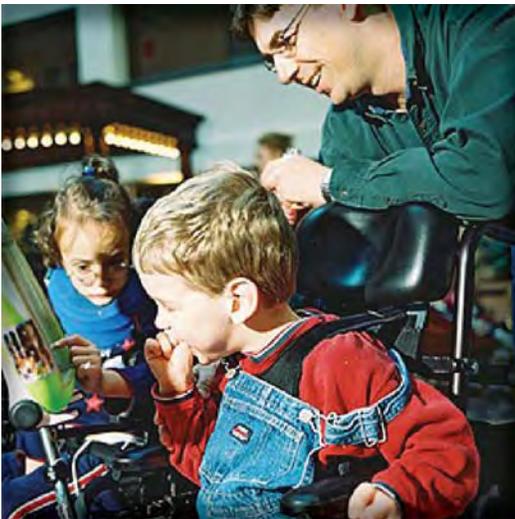

Each year, MAG recommends allocations for \$4.1 million in SSBG funding to support services for four main target groups; adults, families and children; elderly; persons with disabilities; and persons with developmental disabilities. The MAG Human Services Coordinating Committee (HSCC), with the assistance of the MAG Human Services Technical Committee (HSTC), has the main responsibility for developing these allocations with final approval from the MAG Regional Council.

DES contracts with nonprofit agencies and local government to provide services in the four target group areas. The allocation recommendations from MAG affect only the locally planned portion of SSBG dollars received from the federal government through the State of Arizona. The entire State receives \$31.5 million each year. All the councils of governments in Arizona hold contracts with DES to recommend the services most responsive to the needs of their particular region.

Methodology

HSTC and HSCC have completed an extensive survey of the need for services in each of the four target groups. This assessment included reports on demographics, wait lists, the impact of services, and the number of people estimated to be eligible for services. Assessments for each of the target groups are included at the end of this section. In addition, exercises like zero-based budgeting and the ranking of each service provided different perspectives on how the allocation recommendations could be developed. Ultimately, a funding formula was developed on the basis of the service rankings.

All services supported by SSBG were ranked and split into five groups. Services that ranked the lowest, or Group E, received a 20 percent reduction proportional to their last allocation. Services in Group D received a 10 percent reduction proportional to their last allocation. The reductions totaled \$22,402. Services in Group C were held harmless and did not receive any reductions or increases in funding. Services in Group B received one third of the \$22,402 increase proportional to their last allocation. Services ranked the highest in Group A received two-thirds of the \$22,402 increase proportional to their last allocation. Please refer to the spreadsheet following this section.

Five services within the Persons with Disabilities Target Group and Persons with Developmental Disabilities Target Group were reduced while nine services in the Adults, Families and Children Target Group; three services in the Elderly Target Group; one service in the Persons with Developmental Disabilities Target Group; and two services in the Persons with Disabilities Target Group were increased. Although most of the previous allocation recommendations are still responsive to the region's needs, moderate shifting of funds will help meet emerging needs brought on by the downturn of the economy.

The allocation recommendations were last changed in 2002 when funding was reduced at the federal level. At that time, the services were prioritized to reflect basic needs. Although services like speech therapy were considered important, they were not funded so other services more critical to basic needs could continue to be offered. In this latest revision of allocation recommendations, services have been prioritized further to respond to reflect crisis management strategies. A crisis is being experienced by many as the economy continues to place more people in need while agencies receive less support from funders facing incredible budget shortfalls.

Local programs report not only increased demand for services, but also greater demand from people who have never requested assistance before. As a result, services such as shelter, case management, and home delivered meals have received recommendations for the highest increases in SSBG. The allocation recommendation revisions are part of an evolving effort to ensure SSBG funding is maximized to the fullest extent possible. SSBG is a flexible and important funding source. As such, it can be used in innovative ways to assist those in greatest need.

Public comment was received on the proposed changes. Additional opportunities will be made available at the committee meetings related to the allocation recommendations. All comments received to date have been favorable toward the change and supported the reprioritization from basic needs to crisis management services. Members of the public, as well as committee members, did express support for increased analysis of outcome measures. Data on outcome measures are not yet available from DES who holds the contracts with the agencies performing these services. Committee members did recognize standardized outcome measures for all four target groups would be difficult to achieve considering the vast differences in needs and services available to meet these needs.

Target Group Need Assessment

The committee undertook an assessment of the four target groups affected by locally planned SSBG funding. These target groups include Adults, Families and Children; Elderly; Persons with Disabilities; and Persons with Developmental Disabilities. The design for the assessment was approved by the MAG Human Services Coordinating Committee. The following information was developed by the MAG Human Services Technical Committee.

Adults, Families and Children

1. Purpose Statement

Help adults, families and youth in crisis stabilize and attain self-sufficiency.

2. Demographics

The following data represent a compilation from sources that focus on homelessness, domestic violence and unaccompanied youth.

**Table 3:** Summary of Demographics for Homelessness, Domestic Violence and Youth

Demographic	Homeless	Domestic Violence	Youth

~ Arizona Department of Education point in time count 2008

* Homeless Management Information System FY 2008

Calls to CONTACTS FY 2008 as reported by the Arizona Department of Economic Security

+ MAG Annual Homeless Street Count FY 2008

3. Gaps and Impact

A. WAIT LIST DATA

Domestic Violence: CONTACS reports an average of 85 percent of calls for domestic violence shelter resulted in victims obtaining shelter for FY 2008. This leaves an estimated 15 percent who went without shelter. Since 2006, 329 new beds have been opened for a total of 648 beds in the region. In this same time period, requests for shelter have decreased by 8.9 percent to 10,218.

Homeless: CONTACS reported 60 percent of callers were connected with shelter in FY 2008. This leaves a gap of 14,160 calls, or 40 percent. When the duplicate calls are removed, the number drops to 3,115. As of January 2008, there were 8,522 homeless people living on the streets and in doubled up conditions throughout this region. It is anticipated these people would be eligible for services.

Youth: In January 2008, there were 4,630 youth living on the streets and doubled up with and without their families. It is anticipated these youth would be eligible for services.

B. NUMBER OF PEOPLE ESTIMATED TO BE ELIGIBLE FOR SERVICES:

Homeless: There are a total of 22,617 homeless people in shelters, on the streets and doubled up in this region. CONTACS reports 35,400 calls were connected to shelters in FY 2008.

Youth: Cumulatively, there are 8,405 homeless youth in this region living in shelters, on the streets, and doubled up.

Domestic Violence: Although the U.S. Department of Justice noted a decline since the 1990's, many states continue to report rates of domestic violence to be high. In 2005, MAG commissioned a survey indicating 40 percent of residents personally knew someone who had experienced domestic violence or had experienced domestic violence themselves. MAG focus groups conducted in 2006 reported 51 percent of teens personally knew someone who had experienced dating violence or had experienced dating violence themselves.

Research indicates one in five women will experience domestic violence. The 2006 American Community Survey reports a population of 1,369,579 of women age 18 and over in this region. If the research holds true, then 273,915 women would experience domestic violence and be eligible for services.

C. GLOBAL IMPACT OF SERVICES

Youth: Homeless youth service providers indicate the numbers are increasing and homeless youth report being victims of domestic violence and abuse. They also report poor physical health, substance abuse issues, and are pregnant or parenting. They struggle with education, and 19 percent report attempted suicide. The services rendered by locally planned SSBG assist youth by placing them in safe, constructive settings with services to help them stabilize. Research also indicates at-risk teens are more likely to miss school, have lower grades, and higher drop out rates.

Homelessness: With rising mortgage foreclosures, increasing numbers of unsold homes, and the median sale price of a home decreasing significantly, it is likely more people will be experiencing homelessness for the first time. This will increase the burden on the region. Research indicates homeless people utilize expensive emergency services like jails and hospitals much more than the average housed person. Even when factoring in the cost of supportive services, it is still less expensive than having a person living on the streets. The services funded by locally planned SSBG assist homeless people in moving more quickly and effectively from the streets to self-sufficiency.

Domestic Violence: This issue has broad ramifications because domestic violence carries over into the workplace and has regularly been cited as a top business concern. Businesses forfeit \$100 million in lost wages, sick leave, absenteeism, and non-productivity. Nationally, medical expenses from domestic violence total at least \$5 to \$10 billion annually. A MAG study in 2006 reported the average cost to arrest, book and prosecute batterers across the region would at a minimum likely range between \$18 million and \$26 million per year. The services supported by this funding source helps to reduce these costs by offering survivors the tools they need to be safe, stabilize, and break the cycle of domestic violence.

Elderly

1. Purpose Statement

Assist older adults and persons with disabilities aged 18-59 with services designed to help them to live as independently as possible.

2. Demographics

The following data represent older adults living in Maricopa County at the time of the 2006 American Community Survey.

Table 4: Summary of Demographics for Older Adults in Maricopa County

Subject	Total	Margin of Error	60 Years and Over	Margin of Error

Separated	2.1%	+/-0.2	1.0%	+/-0.3
Never married	30.7%	+/-0.5	3.5%	+/-0.5

Table 5: Area Agency on Aging 2008 Services

3. Assistance Levels

The following data were reported from the Area Agency on Aging for Fiscal Year 2008 for unduplicated people served through their programs funded by locally planned SSBG. There may be duplication between services.

Service	Number People Served	Units of Service
Transportation	3,183	199,391
Case Management	5,274	37,819
Home Care (nursing, bathing, housekeeping)	3,656	193,418
Adult Day Health Care	703	112,341
Counseling/program development	1,849	13,478
Home Delivered Meals	6,056	799,763

4. Gaps and Impact

A. WAIT LIST DATA

Transportation numbers are not available for the wait list because the funds are not targeted to one specific program.

- Adult day health care: 35
- Home delivered meals: 10
- Home care: 527
- Counseling: 12

B. NUMBER OF PEOPLE ESTIMATED TO BE ELIGIBLE FOR SERVICES

According to the 2006 American Community Survey, there are 569,213 people aged 60 over in this region. Just over 41,550 older adults, or 7.4 percent, are living at 100 percent of the federal poverty level. Some programs serve any older adult in the region while others restrict eligibility to those with lower incomes.

C. GLOBAL IMPACT OF SERVICES

Services funded by locally planned SSBG dollars assist older adults and persons with disabilities aged 18-59 to live in their homes as independently as they can. Without this support, many would need to move into an assisted living facility or nursing homes at a much higher cost. For example, these facilities can cost \$4,000-\$5,000 a month.

The monthly cost for home delivered meals for one person is \$150 and the monthly charge for a person to receive bathing services is \$200. Even when a person needs more than one service on a monthly basis, the cost is generally significantly lower than if they needed to move into a nursing home or an assisted living facility.

Persons with Disabilities

1. Purpose Statement

Assist persons with disabilities with services designed to help them to live as independently as possible.

2. Demographics

The following demographics on persons with disabilities were retrieved from the 2006 American Community Survey for Maricopa County.

Table 6: Summary of Demographics for Persons with Disabilities in Maricopa County

Subject	Total	Margin of Error	Male	Margin of Error	Female	Margin of Error
Population 5 years and over	3,431,163	+/-991	1,723,471	+/-1,311	1,707,692	+/-978
Without any disability	87.5%	+/-0.3	88.3%	+/-0.4	86.8%	+/-0.4
With one type of disability	5.8%	+/-0.2	5.9%	+/-0.3	5.7%	+/-0.3
With two or more types of disabilities	6.7%	+/-0.2	5.8%	+/-0.3	7.5%	+/-0.3
Population 5 to 15 years	611,139	+/-2,975	312,778	+/-2,225	298,361	+/-2,411

3. Assistance Levels

In FY 2008, 795 clients were served in the region.

Race and Family Status: It does not appear the American Community Survey reports data about race and household status for people with disabilities.

4. Gaps and Impact

A. WAIT LIST DATA

There are approximately 300 clients waiting for services at this time in Maricopa County.

B. NUMBER OF PEOPLE ESTIMATED TO BE ELIGIBLE FOR SERVICES

According to the Rehabilitation Services Administration of the Arizona Department of Economic Security, the estimated need is more than six times the current level of funding. About 63 percent of all traumatic brain injuries (TBI) occur in teenagers and adults aged 15-64 years, the primary working population. An estimated 5.3 million Americans are living with disabilities resulting from TBIs, according to the Centers for Disease Control and Prevention. According to the Army Institute of Surgical Research, 22 percent of wounded soldiers from the Iraq and Afghanistan conflicts who have passed through the military's Landstuhl Regional Medical Center in Germany had injuries to the head, face, or neck. This percentage can serve as a rough estimate of the fraction who have TBI. The Department of Veterans Affairs is now planning for the large influx of veterans with TBIs from the current conflicts who will need continuing care during the coming years.

C. GLOBAL IMPACT OF SERVICES

There are substantial differences in government health services and independent living services for people with selected disabilities. According to the Rehabilitation Services Administration of the Arizona Department of Economic Security, Deaf-Blind, Blind, and Deaf persons do not get selected services that are made available to other persons with disabilities under Title XIX and Medicare. The supported employment concept assumes all persons, regardless of the degree of their disability, have the capacity and should be afforded the opportunity to engage in competitive employment with appropriate support services. The scope of supported employment services varies based on the amount, intensity, and kind of support needed by each individual. Supported employment offers more than just the assistance needed to obtain employment; it also provides the necessary support for up to 120 days to help an individual maintain employment. According to a recent review, the most promising development in the vocational rehabilitation field during the past decade has been the supported employment movement. Supported employment emphasizes competitive jobs in integrated work settings with follow-along supports.

Persons with Developmental Disabilities

1. Purpose Statement

Assist people with developmental disabilities to live as independently as possible.

2. Demographics

The American Community Survey and the US Census report on disabilities but do not offer data the way the State of Arizona defines developmental disabilities. As a result, data for persons with developmental disabilities not receiving services already from the Arizona Department of Economic Security’s Division for Developmental Disabilities is not available. These data were reported by DES for July 2008. Of the 18,300 people described below, 330 receive services directly funded by locally planned SSBG.

Table 7: Summary of Demographics for Persons with Developmental Disabilities

Age		Income	
Birth to three years of age	2,563	Eligible for Title XIX	13,021
3.1 years to 18 years of age	8,379	Not Eligible for Title XIX	5,279
18.1 years to 50 years of age	5,861	Total	18,300
50.1 years to 89 years of age	1,497		
Total	18,300	Employment	
		Eligible for Employment	2,647
Race/ethnicity		Employed	906
Alaska/American Indian	460	Wait listed	141
Asian/Pacific Island	364	Total	3,694
Black or African American	1,217		
Hispanic or Latino	5,095	Disability rates	
White not Hispanic	9,508	Cognitive Disability	7,192
Other	391	Autism	2,345
Unknown	1,265	Cerebral Palsy	1,534
Total	18,300	Epilepsy	614
		Other	8,606
Gender		Total	18,300
Male	11,285		
Female	7,015	Family status	
Total	18,300	Living at home or on their own	15,047
		Group quarters	3,253
Assistance levels: See Income		Total	18,300

3. Gaps and Impact

A. WAIT LIST DATA

Employment	141
Overall services	4,622
Total	4,763

B. NUMBER OF PEOPLE ESTIMATED TO BE ELIGIBLE FOR SERVICES

18,300 are currently enrolled and eligible for services.

C. GLOBAL IMPACT OF SERVICES

People with developmental disabilities have much higher rates of unemployment. According to the DES Division for Developmental Disabilities, the state’s unemployment rate as of August 1, 2008, was 5.7 percent, whereas the unemployment rate for persons with developmental disabilities was 70.2 percent. Unemployment rates, combined with the effects of the economy, are expected to increase the numbers of people on the wait list for services.

When persons with developmental disabilities are employed, their salary tends to be much lower than the average for persons without developmental disabilities. The Division supplied the following statistics for people receiving services:

Table 8:
*Employment of
Persons with
Developmental
Disabilities*

Developmental Disability	% Employed	Average Annual Wage
Cognitive Disability	29.5%	\$7,545
Epilepsy	32.3%	\$13,079
Cerebral Palsy	23.3%	\$22,178

The impact of this funding allows persons with developmental disabilities to receive assistance enabling them to work, live as independently as possible and depend less on the community to provide for their care.

For example, according to the Division, the average employed person with developmental disabilities pays \$1,207 in taxes annually, no longer needs or qualifies for \$49,608 in state and local services, and receives only half of the Social Security Income benefit at \$2,432. This saves tax payers \$53,247 per person every year. This computes to a savings of \$32.71 for every SSBG dollar allocated to this target group.

The following table contains the allocation recommendations showing the funding that was moved from basic needs to crisis management services.

Table 9: Social Services Block Grant Funding Recommendations

Target Group	Rank	Unit of Change	Service Title & Service Ranking Across Target Group	FY2009 Funding		% of Total	\$ Amount of Change	FY2010 Funding

Stuart B. McKinney Funds

Overview of Funding Source and Process

When the Continuum of Care Regional Committee on Homelessness was established at MAG in 1999 after being hosted elsewhere, MAG accepted the responsibility of preparing the consolidated Stuart B. McKinney application to the U.S. Department of Housing and Urban Development (HUD). This funding source supports homeless assistance programs offering transitional housing, permanent supportive housing, and supportive services. Subpopulations of homelessness per this funding source include, but are not limited to, victims of domestic violence, veterans, chronically homeless individuals, and youth on their own. Chronically homeless individuals are defined as those who have been homeless for an extended period of time and who have a qualifying disability.

In transitional housing, homeless people may stay for a period of up to twenty-four months. During this time, clients receive case management and other tools to help them stabilize and prepare for re-entry back into mainstream housing. In permanent supportive housing, eligibility is restricted to homeless people who have a qualifying disability. Tenure in the program is permanent barring any major infractions of the rules. Supportive services give people the assistance they need to stabilize and may include employment programs, case management, and day care.

In recent years, HUD has shifted funding priorities in significant ways. Applications now are ranked more favorably if they request fewer dollars for supportive services. The competition nationally increases every year, so many Continuums of Care, including the one in this region, are attempting to shift as many supportive service dollars into other funding sources as possible. This region has been able to shift money and now has a 60/40 split between housing and service dollars.

HUD has also reprioritized all new funding opportunities to assist chronically homeless individuals and the rapid re-housing of homeless families. For three years, HUD restricted new grants strictly to permanent supportive housing programs serving chronically homeless individuals. This shift was made after research indicated chronically homeless people, though a small percentage of the total homeless population, actually use a significant portion of the resources. Their frequent utilization of high dollar emergency services creates a burden on the rest of the service delivery system. Research indicates early and permanent housing placement with supportive services is more effective for the client and more cost efficient for the system. The regional Continuum of Care has

competed successfully for one new grant under this category in each of the last three years, bringing in \$4,133,153 in new funding to create 257 new beds.

In FY 2009, HUD added new funding opportunities for programs helping to rapidly re-house homeless families. This shift was based on research indicating that homeless families were more often homeless due to the lack of affordable housing. Investment in placing families more quickly into housing would reduce time spent in shelters and open up beds for people with more intensive needs. In the FY 2009 application process, the Continuum of Care recommended one new project in this category. If funded, the project will add 780 new beds and serve 240 families. Please refer to the list of funding recommendations approved by the MAG Continuum of Care Regional Committee on Homelessness at the end of this section.

All applications for new funding are evaluated and recommended for funding by the Ranking and Review Committee staffed by Valley of the Sun United Way. This relationship provides the benefit of having a third party rank the applications. MAG staff reviews the renewal applications for outcome measure achievement, compliance with the Homeless Management Information System, and support of Continuum of Care activities. Agencies with low performance are placed on probation and receive technical assistance throughout the year. If they resolve the areas of concern, they are taken off probation in the next application cycle. If issues remain unresolved, they risk losing funding per the vote of the Continuum of Care.

This region must remain competitive on a national scale to retain current and to compete for new funding. Last year, seven percent of Continuums of Care across the country were not funded. To date, this region has been extremely successful in competing for funding. Each year, the Continuum of Care's application scores high enough to receive more than \$7,000,000 above and beyond the pro-rata renewal amount. This results in record funding awards for each application. Last year, HUD awarded \$21.4 million to 50 agencies in this region.

Homeless Planning

The MAG Continuum of Care Regional Committee on Homelessness launched efforts to develop a new Regional Plan to End Homelessness in January 2008. The committee used Appreciative Inquiry as a tool to identify the strengths of the Continuum of Care and areas of focus for the plan. Appreciative Inquiry is a strength-based model that studies human systems when they are at their best. The model draws strength from the positive and rests on the belief people learn more from their successes than their mistakes.

The plan proposed action steps in five areas of focus. These areas include leadership and community support; community awareness and collaboration; prevention; housing and services; and education, training and employment. Although the Continuum of Care will take the lead on many of the steps, the plan draws support from community leadership and activities as well. The plan is available for review at the following link: <http://www.mag.maricopa.gov/detail.cms?item=9791>.

In total, 63 interviews were conducted with formerly homeless people and people currently experiencing homelessness. Over 70 interviews were conducted among members of the Continuum of Care and practitioners. The process helped to energize people as they shared stories of success. This product offers compelling insights into what it takes to end homelessness and how that happens every day in the region, one person at a time. Following are excerpts from a sampling of the interviews.

“I worked with an individual that everyone had given up on. Now he works in the system helping others.” - *Continuum of Care Stakeholder*

“We save lives and make a real difference.” – *Continuum of Care Member*

“Homelessness is a very lonely world. You don’t trust anybody. You’re afraid to ask for help and eventually it becomes a habit.” – *Person experiencing homelessness*

“Don’t give up on people when they are struggling.” – *Person experiencing homelessness*

“Someone gave me a chance to do something different with my life.” – *Person experiencing homelessness*

“The most important thing is being treated like real people.” – *Person experiencing homelessness*

“I want to give back what they freely gave to me. Not only am I able to help somebody else, but I’m helping myself.” – *Person experiencing homelessness*

Domestic Violence Planning

Domestic violence shelters receive funding through the Stuart B. McKinney application, as well as through a variety of other funding sources operating independently of MAG. Currently, seven domestic violence programs receive funding through this source. Although considered a subpopulation of homelessness for the purpose of the grant, domestic violence policy is addressed at MAG through a committee focused exclusively on this issue.

The MAG Regional Domestic Violence Council was formed at MAG in 1999 after the issue was identified as a priority of the MAG Regional Council. A Regional Plan to End Domestic Violence was developed in 1999 and updated in 2004. The first two plans address 42 recommendations in the areas of prevention, early intervention, crisis intervention, transitional response, system coordination and evaluation, and long-term response. It is anticipated that the Council will develop a new plan in FY 2010.

In the past, the Regional Domestic Violence Council has developed domestic violence awareness training for groups such as first responders of fire and police departments, physicians, and employers. Screening tools were researched and distributed in the region's emergency departments at hospitals. Most recently, the Council has focused on teen dating violence through the Youth Empowerment Project. The Innovative Domestic Violence Prevention Grant Program has been a generous supporter of this project since its inception.

The Youth Empowerment Project launched in 2006 as an intervention tool to give teens the resources they need to end dating violence. The impetus for the project came from teens themselves who reported in focus groups around the Valley the prevalence of teen dating violence and a preference to turn to friends before adults for assistance. The project offers resources and teen testimonials about their experiences with dating violence on the project's Web site, www.WebofFriends.org. In FY 2006, the site had 1,100 visitors. By FY 2008, the number had grown to 11,000. These numbers speak not only to the success of the project, but also to the prevalence of teen dating violence here in the region.

Annual public service announcement competitions through the Youth Empowerment Project engage teens in developing messages promoting healthy relationships and the end of teen dating violence. Three years of competitions have resulted in video and radio public service announcements being produced and distributed throughout the region. These public service announcements have helped to raise awareness about the issue, as well as drive people to the Web site so they can access resources. The final PSA's as well as the original entries may be viewed here: http://weboffriends.org/html/ad_test.html.

The Youth Empowerment Project is in the final year of a three year grant. Contingent upon new funding being secured, the Council has plans to expand the project and Web site to address abusers more directly. Teens in recent focus groups indicated the need to talk to the abusers in order to end dating violence. The main focus has been helping teens prevent or safely escape dating violence. The future focus will be on stopping abuse before it starts by engaging those at risk of abusing to develop healthier coping mechanisms. Assessment tools will be added to the Web site so victims and abusers may better self-identify and access resources appropriately.

Joint Activity

The Continuum of Care and Regional Domestic Violence Council began partnering in December 2007 in order to better address the needs of domestic violence victims in homeless shelters. Since then, the two committees have jointly developed an eligibility matrix and revised screening questions to place people in the shelter most appropriate for them more quickly.

Community Information and Referral has piloted the new screening questions through their CONTACTS hotline. Refinements will be made on the basis of the feedback received. The initial question is phrased, "CONTACTS Shelter Hotline, are you calling because you are being abused?" Depending on how the question is answered, it is followed by "are you calling because you are homeless?" CONTACTS staff will also ask if the caller is in a safe place to talk.

The eligibility matrix offers criteria specific to each emergency and domestic violence shelter in the region. Once it has been finalized, providers will complete the information pertinent to them and the matrix will be distributed. The matrix may be accessed here: <http://www.mag.maricopa.gov/detail.cms?item=9797>.

The two committees will continue to work on improvements to the service delivery system through an ongoing work group meeting as needed throughout the year and a joint committee meeting in December 2009.

Funding Recommendations

The following funding recommendations were submitted to HUD as part of the Stuart B. McKinney application approved by the Continuum of Care.

Table 10: Stuart B. McKinney Funding Recommendations

Applicant	Project Sponsor	Project Name	Project Type	New/ Renewal	Funding Request
Area Agency on Aging Region One	Area Agency on Aging Region One	HIV Case Management at Scattered Sites	Permanent Housing	Renewal	\$126,575

Section 5310 and Coordination Planning

Overview of Process and Plans

Section 5310, Elderly Persons and Persons with Disabilities Transportation Program, is a capital award grant program designed to assist agencies transporting older adults and people with disabilities. The program provides vehicles, software, related equipment such as radios, and funding for mobility management staff each year. The State of Arizona receives \$3.3 million with approximately \$1 million coming to this region each year. The MAG Elderly and Persons with Disabilities Transportation Program Committee reviews all applications and develops a priority listing of applications to be forwarded to the Arizona Department of Transportation.

In 2006, the reauthorization of SAFETEA-LU included a requirement for any applicants of Section 5310, 5316 and 5317 to be in compliance with a locally derived coordination plan for human services transportation. Section 5316, or Job Access and Reverse Commute, supports agencies transporting low-income workers. Section 5317, or New Freedom, is a relatively new funding source designed to provide assistance beyond the Americans with Disabilities Act. SAFETEA-LU authorizes the federal surface transportation programs for highways, highway safety, and transit. This new requirement was the catalyst for developing the region's first Human Services Coordination Transportation Plan in 2007 and on an annual basis thereafter.

The first plan, available here, <http://www.mag.maricopa.gov/detail.cms?item=7467>, focused on improving communication among the stakeholders in human services transportation as a precursor to improved coordination. This plan was celebrated as a national model with presentations across the country. The second plan, available here, <http://www.mag.maricopa.gov/detail.cms?item=8111>, built on the success of the first plan by focusing on standardizing operations between the agencies. The third plan, to be released in 2009, will focus on maximizing the capacity of the current system by encouraging shared use of vehicles and coordinated mobility management.

Priorities and Goals for FY 2010 Competition

The specific goals for the 2009 plan update include the following:

- Maximize resources and reduce unused capacity by rewarding Section 5310 applicants who request shared vehicles. Applications will be evaluated on their confirmed commitment to coordinate services and operations.
- Complete an inventory of travel training programs in the region. The inventory will lead to a better understanding of the availability of programs, better coordination, and the development of new programs to fill gaps in service.
- Develop a mechanism for matching agencies with the capacity to offer more trips with agencies needing transportation for their clients as well as people in need from the community. The impact will be more people are transported within the current capacity of the human services transportation delivery system.
- Encourage and award applicants that have supported the development and implementation of the MAG Human Services Coordination Transportation Plans as evidenced by their inclusion in the plans participant lists, as well as those projects that promote the United We Ride goals. The goals include the following:
 - Provide more rides for the same target population for the same or less resources (efficiency)
 - Simplify customer access to transportation (effectiveness)
 - Increase customer satisfaction (quality)

The success of each plan will provide the catalyst and energy for the next plan as the strategies necessarily become more intensive. The federal government expects greater impact from coordination strategies in the aforementioned three areas. In light of the economy, coordination activities have a tremendous potential of meeting people's needs in a cost efficient, effective manner.

CONCLUSION

Realistically, the calls for help will continue to increase for the near to mid-term future. Not everyone will receive the help they need. Many, though, will connect with valuable resources and the impact of this cannot be underestimated. Much more is needed than any one entity can provide, but in times like these, it is critical for each person to do what is within their capacity. By working together, this capacity can be increased and maximized. Henry Ford once said, “Coming together is a beginning. Keeping together is progress. Working together is success.” This document illustrates the some of the work to be achieved and the impact to be made when individuals think regionally and act locally.

In tough economic times, hard choices will be made, but vibrant opportunities may also be discovered. Strategic planning and the commitment to ensuring a high quality of life for all people is stronger than any challenge which may lie ahead. MAG extends a deep appreciation for all committed to this goal. To become involved with the regional human services planning process at MAG, please contact the MAG Human Services Division by phone at (602) 254-6300, by email at humanservices@mag.maricopa.gov, or visit <http://www.mag.maricopa.gov/division.cms?item=65> for more information. Thank you for supporting this work!

MARICOPA ASSOCIATION OF GOVERNMENTS

INFORMATION SUMMARY... for your review

DATE:

February 17, 2009

SUBJECT:

MAG Continuum of Care Regional Committee on Homelessness Regional Plan to End Homelessness

SUMMARY:

The MAG Continuum of Care Regional Committee on Homeless, together with more than 70 stakeholders, met during the year of 2008 to develop the Regional Plan to End Homelessness. This is not the first Regional Plan to emerge from the Continuum but it is a fresh look at the issues surrounding homelessness in the region with goals and action steps to end homelessness in today's community. There was a Regional Plan to End Homelessness created in 2002 and a Regional Plan Update in 2005. The MAG Regional Council approved the Regional Plan Update in May 2005. In January 2008, a Continuum of Care Regional Plan Working Group, made up of Continuum of Care members, community stakeholders, and persons who have experienced homelessness, was assembled to take the lead on the development of the plan. Over the course of a year, the group developed five areas of focus with regional goals, and thirty action steps to lead the charge. The Regional Plan to End Homelessness was recommended for approval by the MAG Continuum of Care Regional Committee on Homelessness on January 26, 2009. The MAG Management Committee recommended approval of the plan on consent at the February 11, 2009 meeting.

PUBLIC INPUT:

The Regional Plan to End Homelessness was developed on the basis of broad community input of more than 70 stakeholders beginning January 2008 through January 2009. The community input included elected officials, service providers, municipal staff and the private sector including people who were currently homeless. An opportunity for public input on the Regional Plan was provided at the January 26, 2009, Continuum of Care Regional Committee on Homelessness meeting but no public input was given. An opportunity for public input was provided at the February 11, 2009 MAG Management Committee meeting but no public input was given.

PROS & CONS:

PROS: The Plan promotes coordinated actions on a regional basis, maximizes resources available to the region, avoids duplication of efforts, seeks to identify best practices and provides assistance to build capacity and fund-raising opportunities.

CONS: There are no anticipated cons from developing the report.

TECHNICAL & POLICY IMPLICATIONS:

TECHNICAL: The plan was developed using a process called Appreciative Inquiry (AI). Using the AI process, stakeholders focused on the strengths in the community and how to emphasize the positive core of the Regional Committee to establish a successful plan. More than 130 AI interviews were completed with community stakeholders as well as with persons experiencing homelessness. Responses to the interviews were used to develop the goals in the plan. Trends were analyzed from the interview responses and action steps were developed to meet the needs expressed. The Regional Plan is meant to be a working document where accomplishments are continually celebrated and accountability is established. The Regional Committee on Homelessness will establish an implementation plan in April 2009 and outcomes will be measured.

POLICY: The Continuum of Care Regional Committee on Homelessness created the Regional Plan to End Homelessness after encouragement by the federal government that all regions develop similar plans to end homelessness. This is part of a larger movement in developing strategies to ending homelessness.

ACTION NEEDED:

Approval of the MAG Continuum of Care Regional Committee on Homelessness Regional Plan to End Homelessness.

PRIOR COMMITTEE ACTIONS:

The MAG Management Committee recommended approval of the Regional Plan to End Homelessness on February 11, 2009.

Letter from the Outgoing Chair

I have been deeply impacted by the issues of homelessness in the community through my experience as Chair of the MAG Continuum of Care Regional Committee on Homelessness. I was touched by personal stories of struggle during my 24-hour homeless immersion experience. I was faced with the reality that homelessness can be life threatening to those having to endure the summer heat without shelter and hydration. I have witnessed first-hand the endless dedication of families and youth who are working to emerge from homelessness. These experiences have provided me with an understanding and passion for combating homelessness that will always be with me. It has been an honor to serve as Chair of the MAG Continuum of Care Regional Committee on Homelessness during these times and through the development of the *Regional Plan to End Homelessness*. During my next chapter as Deputy Attorney General, these experiences will continue to remind me of the importance of finding solutions to end homelessness.

More than 8,000 people experience homelessness on any given night in Maricopa County. These men, women and children in our community are in need of housing and services and the region is taking action. The *Regional Plan to End Homelessness* offers the region's response to homelessness with action-oriented goals and action steps. Ending a multi-faceted problem like homelessness in the region will require dedication, hard work, collaboration and leadership among service providers and community leaders. Important steps have been taken with the development of this Plan. The next phase is to implement the action steps that have been put in place for the region. I would like to

thank all of those who have been involved in the Plan's development. It is my hope that the energy and excitement created over the past year will continue as goals are achieved.

This plan is meant to be a working document in which outcomes are measured and successes are celebrated. Accountability will be key as the plan is implemented. As the region continues to learn from its successes and the success of other communities, the plan will be adjusted to reflect what has been learned. Ending homelessness is a personal passion. Although my term as Chair of the MAG Continuum of Care Regional Committee on Homelessness has ended, I will continue to lead in this area. I encourage new leadership on the issues of homelessness in the region and I challenge you to join in the implementation phase of the Plan. Together, we can make this a community in which everyone has a place to call home.

Sincerely,

Greg Stanton
Councilmember, City of Phoenix
Chair, MAG Continuum of Care Regional Committee on Homelessness March 2005 –
January 2009

Introduction

The MAG Continuum of Care Regional Committee on Homelessness, together with more than 70 stakeholders, met during the year of 2008 with the purpose of developing a *Regional Plan to End Homelessness*. This is not the first Regional Plan to emerge from the Continuum but this is a fresh look at the issues surrounding homelessness in the region with goals and action steps to combat homelessness in today's community. The first Regional Plan was developed in 2002 and was updated in 2005. In January 2008, a Continuum of Care Regional Plan Working group, made up of Continuum of Care members, community stakeholders, and persons who have experienced homelessness, was assembled to take the lead on the development of this plan. Over the course of a year, the group developed five areas of focus with regional goals, and thirty action steps to lead the charge.

The Regional Plan is built on five areas of focus:

1. Leadership and community support
2. Community awareness and collaboration
3. Prevention
4. Housing and services
5. Education, training and employment

Five goals lead the charge:

1. High-profile community champions will raise awareness and support for coordinated responses to end homelessness in the region.

2. Leverage funding, services and housing to end homelessness in the region by creating innovative new partnerships and strengthening collaborative relationships.
3. Coordinate an effective information network to prevent people from becoming homeless.
4. Increase the number, availability, and coordination of permanent supportive housing, affordable housing and services to individuals and families who are experiencing homelessness.
5. Promote information about resources that provide people who are homeless with the skills and knowledge they need to ameliorate barriers to housing.

Thirty action steps to reach the goals:

To reach the goals set forth in the Plan, thirty action steps were developed. The action steps are grouped first by the goal that it fits within and then by whether it is a time sensitive, short-term or long-term goal. The highlighted action steps are steps the Continuum of Care will take the direct lead in implementing. The action steps that are not highlighted represent action steps that other stakeholders will be taking the lead on. Each action step includes a brief description and purpose statement, details on how it will be measured, the proposed timing and resources needed to complete it, and the evaluation method. Whether or not the Continuum of Care is taking the lead, the Continuum will be assessing and monitoring progress made on each of the goals and actions steps within the Plan.

This Plan will offer a fresh Regional response to ending homelessness in Maricopa County. First, an overview of the MAG Continuum of Care Regional

Committee on Homelessness will frame the landscape on which the plan was developed and which will be monitored. Second, data will be provided on those who are experiencing homelessness on the streets and in shelters throughout the region. The data presented is an important part of the planning efforts as it provides the snapshot of information and insight into the needs of those whom the Plan is intended to help.

Then, the process in which the Plan was developed will be explored. This Plan is unique in that it was developed with an approach called Appreciative Inquiry (AI). Using AI, the Plan will focus on the positive approach to ending homelessness in the Region by placing the emphasis on what's working rather than what systems have failed. Stories of success have been incorporated in the planning process as have provided the platform from which new successes will be created.

MAG Continuum of Care Regional Committee on Homelessness Overview

The Maricopa Association of Governments (MAG) Continuum of Care Regional Committee on Homelessness is a planning entity made up of local stakeholders convened for the purpose of ensuring that homeless planning is coordinated across municipalities and agency lines. Toward this goal, the Continuum:

- Develops an annual consolidated application for Stuart B. McKinney funds through the U.S. Department of Housing and Urban Development to support homeless assistance programs throughout Maricopa County.
- Supports year-round planning and coordination to end homelessness in the region.
- Develops, implements, and monitors the progress of a Regional Plan to End Homelessness.

MAG first hosted the Continuum of Care in 1999. However, Maricopa County was first to host the Continuum of Care in 1994 in response to a directive from the U.S. Department of Housing and Urban Development (HUD). Municipalities such as the City of Mesa and the City of Phoenix also hosted the Continuum of Care. The Continuum of Care model is HUD's primary strategy toward ending homelessness in the country. HUD requires that a Continuum of Care be in place for a community to qualify and apply for homeless assistance funding. The MAG Continuum of Care has competed successfully over the last nine years resulting in \$147,871,203 for over 50 programs, creating 3,770 new beds in the community.

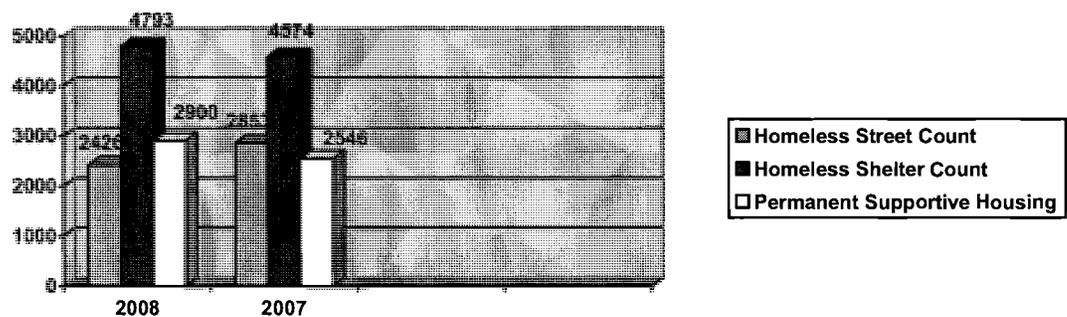

MAG Continuum of Care Regional Committee on Homelessness HUD McKinney-Vento Funding 1999 - 2007	
1999	\$7,700,000
2000	\$18,637,000
2001	\$9,273,000

2002	\$15,339,000
2003	\$15,966,172
2004	\$19,333,276
2005	\$20,043,200
2006	\$20,126,941
2007	\$21,452,614
Total	\$147,871,203

Homeless Street and Shelter Count

To develop effective goals and see the impact of the outcomes, it is important to know how many people experience homelessness in the region. On any given night in Maricopa County, there are more than 8,000 people who are living on the streets or in shelters. This information is the result of a regional effort to identify the number of individuals and families experiencing homelessness in Maricopa County. The annual point-in-time Homeless Street Count is coordinated by the MAG Continuum of Care Regional Committee on Homelessness in partnership with Street Count Coordinators in the 25 municipalities across the region. The annual point-in-time Homeless Shelter Count is completed by the Arizona Department of Economic Security (DES). The number of people living on the streets and in emergency and transitional shelters represents an overall decrease of three percent from 2007 to 2008.

Homeless Street and Shelter Count Totals

In 2008, the number of people living on the streets decreased by 15 percent and the number of people living in shelters increased by four percent. Additionally, the results show that there was an overall increase of 14 percent in the number of people in permanent housing. The decrease in numbers of people on the streets and the corresponding increase in the number of people in shelters and permanent housing may indicate that people are transitioning from the streets into shelters and ultimately into housing. Both locally and nationally there are intense efforts in placing people in permanent housing and providing them with wrap-around services to help them maintain their housing in the long run. Dennis Culhane is a nationally recognized researcher in the area of homelessness. His research has shown that it is cheaper to place someone in housing and provide them with the services that they need to stay housed than for them to remain homeless on the streets or in the shelter system.

While the homeless street count numbers decreased from 2007 to 2008, the weather and other factors may have played a role in the decrease. Enumerators found that many normally highly populated encampments were washed away due to heavy rains leading up to the day of the count. There were also geographic areas that enumerators were not able to access due to the rainy conditions. The weather is always a factor that needs to be considered when comparing street count data from one year to the next.

The data collected during the street count is the region's best estimate of the number of people on the streets. The data gathered during the point-in-time count provides the best look into the number of people living on the streets but it is also important to know that the data is not inclusive of everyone. Although enumerators do their best to find everyone on the streets, they know that people are missed.

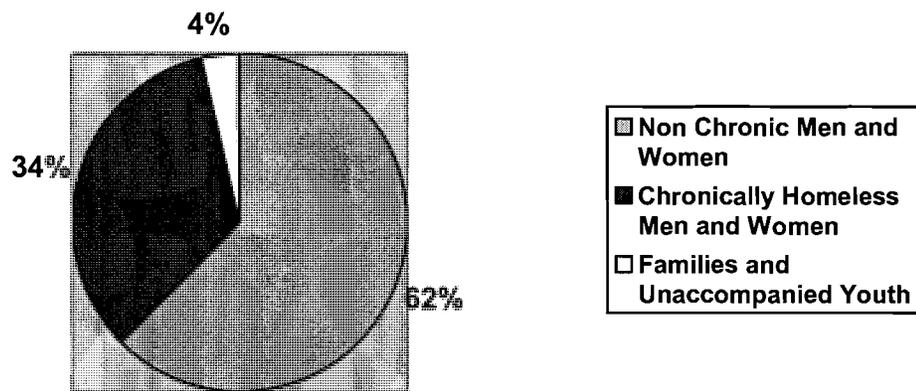

In addition to the number of people counted in the street and in shelters, there were also 6,096 people living as “doubled up” or living temporarily with another family. The number of people doubled up comes from the Arizona Department of Education and includes an actual count of homeless children reported in the school system and an estimated number of homeless adults. Combining the street and shelter count numbers with the number of people doubled up results in 13,315 homeless people in the MAG region during one point-in-time in January of 2008.

2008 Homeless Street and Shelter Count Results	
Street Count	2,426
Shelter Count	4,793
Doubled Up*	6,096
Total	13,315
*Sharing housing with other persons due to loss of housing, economic hardship or similar reason. Adults in families are estimated.	

Of the 2,426 homeless men, women, and children sleeping on the streets, 71 percent were found within the city of Phoenix. While Phoenix has seen a 23 percent decrease in their homeless street population in the last year, the remaining municipalities (excluding Phoenix) have seen a 13 percent increase in their street count numbers. The majority (62 percent) of homeless persons living on the street are non-chronic men and women while chronically homeless men and women accounted for 34 percent of persons. The U.S. Department of Housing and Urban Development (HUD) defines someone as chronically homeless if they have been homeless for a year or more or have had four episodes of homelessness over three years. The remaining four percent was equally divided among families and unaccompanied youth. A total of 49 adults and children were counted within 10 families on the streets. This is a decrease of 50 percent from the 20 families counted in 2007. The number of homeless families found during the point-in-

time street count under represents the number of homeless families in the community. It is difficult to locate families experiencing homelessness during the street count as often times families will double-up with friends or sleep in their cars and are hard to locate. Future street counts will focus on finding ways to more accurately count homeless families. There was also a 65 percent decrease in the amount of unaccompanied youth identified between 2007 and 2008.

2008 Homeless Street Count Data

From 2007 to 2008 there was a three percent increase in the number of individuals in emergency shelters, a five percent increase of individuals in transitional housing, and a 14 percent increase of individuals in permanent housing. Individuals who are seriously mentally ill account for more than one-third of all individuals in shelters. Other large special population groups include domestic violence victims and those dealing with substance abuse disorders. These three groups combined account for 73 percent of the entire homeless population living in shelters in Maricopa County.

***Information not collected during the Homeless Street Count.**

Homeless Management Information System (HMIS)

In 2001, HUD notified Continuums of the Congressional direction on improved local and national homeless data collection and analysis. With the notification came the requirement that Continuums have a locally implemented Homeless Management Information System (HMIS). The Maricopa County HMIS was implemented by Community Information and Referral in 2002, with guidance from the MAG Continuum of Care Regional Committee on Homelessness. Since the local HMIS was established, the community is able to gather quality data on the numbers of people in shelters, analyze the data, and better address the needs of those in shelters. On a regional basis, HMIS reports reveal aggregate data such as demographic information, the extent of homelessness, primary reasons for homelessness, and more.

From July 2007 to June 2008, there were a total of 14,095 people in emergency shelter, transitional housing and permanent supportive housing reported in HMIS. Of that total, 57 percent were males and 43 percent were females. During that time, 54 percent were homeless individuals and 46 percent were people in families. Seventy percent of the people in HMIS were aged 18 to 61 and 27 percent were 17 and under.

HMIS Demographic Information: All Clients FY 2007-2008

When asked the primary reason for their homelessness, 13 percent of those in the HMIS report indicated that their homelessness was due to a lack of financial resources. In addition, 12 percent said their homelessness was resulted from being evicted and nine percent said it was because of a loss of job. Domestic violence was also reported as a primary reason for homelessness, especially among homeless women. More than 15 percent of the people in the HMIS report being victims of domestic violence. More than one third of women in the HMIS report being a domestic violence victim.

Primary Reason for Homelessness

Of adults over the age of 18, 19 percent reported being employed. Fifty-five percent indicated a disability, however, only 10 percent reported receiving benefits for their disabilities. The majority of people reported monthly income levels of less than

\$750 a month. For additional information on the aggregate data collected in HMIS, please refer to the report below.

Regional Planning

In 1987, the MAG Regional Council directed that a Task Force be assembled to focus on a regional response to homelessness. That Task Force produced plans to address homelessness as a region. The MAG Continuum of Care Regional Committee on Homelessness published a Regional Plan to End Homelessness in 2002. This plan was developed to raise awareness and offer direction to end homelessness in the MAG region. Four basic goals led the charge: increase funding, prevent homelessness, remove barriers to accessing services and improve data collection and outcomes. These goals provided the direction, the community provided the energy, and the people experiencing homelessness provided the impetus for action.

In 2005, the Regional Plan was updated to provide a benchmark for what had been accomplished and a focus for what remained to be done. The information compiled in the update reflected the diligence of a wide variety of stakeholders including non-profit agencies, homeless service providers, elected officials, municipal staff, concerned citizens, the faith based community, and people who have experienced homelessness. Goal achievement was assessed and to date, more than 88 percent of the goals developed in 2002 have been engaged or accomplished.

In January 2008, the Continuum of Care Regional Committee on Homelessness together with more than 70 community stakeholders launched efforts to develop a new plan using Appreciative Inquiry (AI) as a tool during a full day planning workshop. The purpose of the workshop was to begin development a Plan to End Homelessness in a manner that engaged the entire Continuum of Care's history, wisdom, insight and passion. The group was introduced to the AI process that enabled the community to:

- Take inventory of and celebrate past successes in the regional work to end homelessness.
- Create a shared vision for a future in which the Phoenix metropolitan area is an exemplar of regional collaboration resulting in comprehensive services that ensure permanent housing and financial stability for local residents.
- Focus available financial, political and organizational resources on identified high-priority elements of the service delivery system.
- Forge new partnerships that will enable timely and effective implementation of the plan.

Appreciative Inquiry (AI): A Process for Positive Change

AI is a process for creating positive change. It is different from other planning processes because it focuses on what is right, rather than what is wrong, by asking positive questions to ignite productive dialogue and inspire action. In keeping with the AI goals and process, a series of one-on-one interviews were conducted with members of the Continuum of Care Regional Committee on Homelessness, community stakeholders, formerly homeless persons, and with people currently experiencing homelessness. People all across the region were engaged in conversations about creating positive outcomes where ending homelessness is a reality. Through these conversations, a vision emerged of a future where everyone has a positive place. Overall, 70 professionals were interviewed and their responses were analyzed for trends. They were asked to discuss their relationship with efforts toward ending homelessness in the region, peak experiences in ending homelessness, stories about successful programs or processes that really made a difference in the lives of homeless individuals or families and what came

together to create those successes. The stakeholder interviews were the beginning points for the development of the goals and actions steps that emerged into the Regional Plan.

In keeping with the AI approach and to truly involve people experiencing homelessness in the development of the Plan, 63 interviews were conducted with people who had experienced homelessness or who were currently homeless. They were asked to share stories about their experiences, to reflect on elements of success in the region, and what is needed to end homelessness in their opinions.

Elements of Success

Thirty percent of the responders indicated that personalized support from service providers helped create the impetus for their success. The caring attitude of providers and their willingness to help encouraged their success. This network of support helped them believe that success was possible.

While staff support was the primary force behind their success, 24 percent of responses included their own attitude as being a critical catalyst toward success. The AI interviews revealed that after receiving support and encouragement from staff, it was the change in their own attitude that drove their success. Other critical areas that played a part in their success included the knowledge gained from programs (like budgeting and savings classes), and the support of friends or family.

What's Needed to End Homelessness

The AI interviews asked for their opinions regarding what is needed to end homelessness in the region. The responses were analyzed to help shape the development of the goals and action steps in the Plan. Responses were organized into four categories

that parallel the Regional Plan goals. The categories include programs and funding; housing; education, training and employment; and community awareness and support.

- **Programs and Funding**

One-third of all AI interviewees indicated a need for more supportive programs with enhanced awareness and accessibility to the programs. Many said that although programs exist in the community, awareness of the programs is lacking among those who are in need. A crucial need was expressed for more funding to support current services along with the growth of programs on a region-wide basis. Awareness of what is available to those experiencing homelessness also needs to increase.

- **Housing**

To achieve secure permanent housing and financial stability, housing has to be more affordable for everyone. Twenty percent of those interviewed indicated a need for affordable housing or listed it as a first step on the path to ending homelessness in the region. The majority of people interviewed point out that the availability of affordable housing in general should be a top priority for the region. The generally accepted definition of affordability is for a household to pay no more than 30 percent of its annual income on housing. In the report, *Maricopa County 2020 Eye to the Future*, researchers found that “Maricopa County is one of the nation’s fastest growing counties, subsequently increasing pressure on housing and rental prices.” The authors note a number of factors that impact housing affordability. “Incomes have not kept pace with price increases; there is a lack of financing for low- and moderate-income households, as well as NIMBYism, exclusionary zoning, and other regulatory barriers” (Maricopa County Board of Supervisors 2001). Data from the Federal Housing Finance Board

reveal that home prices in Arizona have been increasing faster than income. Data shows that from year 2000 to 2007, the median sale price of homes in Arizona increased by 75 percent, while the median family income only increased by just over 13 percent (Arizona Department of Housing, Federal Finance Board).

- **Education, Training and Employment**

Along with programs and housing, the importance of education, skill-training and employment opportunities was emphasized by interviewees. Almost 30 percent of respondents indicated a desire for more educational opportunities and/or skill-training programs. Some examples include work readiness courses and financial planning programs. Almost 50 percent of those interviewed acknowledged that an increase in wages and a strengthened pool of jobs would increase their own success in ending homelessness.

- **Community Awareness and Support**

Finally, those interviewed felt that community understanding and support should be the first step to ending homelessness in the region. Thirty percent of respondents indicated the need for increased community support and involvement. Many of the people interviewed acknowledged the importance of a community resource and service guide to help with awareness of programs and to increase community knowledge of services available in the region. There are resources that exist in the community now such as *Community Information and Referral* and *Arizona 2-1-1*. Both provide information about programs and can be used as a referral tool for programs and services in Maricopa County.

Regional Response Addressing the Needs

When comparing the needs revealed in the AI interviews with people experiencing homelessness and the priorities developed by the professionals and committee members, it is clear that the goals developed in the Plan are reflective of the needs expressed by the people experiencing homelessness. Action steps that correspond directly to the indicated needs include:

- Coordination between homeless and domestic violence providers.
- Additional funding for permanent affordable housing units and supportive services.
- Web-based resource page that includes employment and training opportunities.
- Housing stability and financial management training programs.
- Increased community awareness on the issue of homelessness.
- A user guide to help clients navigate the homeless behavioral health system.

MAG Continuum of Care (CoC) Regional Community on Homelessness
 2008 Regional Plan to End Homelessness Goals and Action Steps

Leadership and Community Support
 (*Highlighted Action Steps represent CoC lead activities.)

Goal: High-profile community champions will raise awareness and support for coordinated responses to end homelessness in the region.

Action Steps	Purpose	Measurement (how many, etc.)	Timing	Resources Needed	Evaluation Method
1) Launch implementation of the Regional Plan to End Homelessness with a regional summit.	Gain support for the Continuum of Care Regional Plan and coordinate responses to ending homelessness.	One Summit	Planning: six months Event: 1/2 day	Funding for Implementation Summit. Planning group composed of stakeholder representatives.	Survey designed by planning group and interested others.
2) Identify successful practices in ending homelessness to present at the Arizona Coalition to End Homelessness Annual Conference on October 27-28, 2008.	Build community support for successful strategies in ending homelessness.	Five best practices will be featured	Planning: 6 months Event: 2 days	Possible travel expenses for representatives from other communities.	Breakout session survey.
3) Conduct a cost study to document the economic impact of homelessness in Maricopa County through.	Build community support on the cost effectiveness of rapid re-housing.	One cost study	Completion of study in June 2008.	Funding to cover consultant and printing costs	Arizona Coalition to end Homelessness Conference and Implementation Summit evaluations with possible latter evaluation of report usage.

Community Awareness and Collaboration

Goal: Leverage funding, services and housing to end homelessness in the region by creating innovative new partnerships and strengthening collaborative relationships.

Time Sensitive					
Action Steps	Purpose	Measurement (how many, etc.)	Timing	Resources Needed	Evaluation Method
4) Participate in the Arizona Town Hall "Housing Arizona" event. Focus discussion on homelessness and how it relates to the Town Hall topic of affordable housing.	Address the need for affordable housing on statewide basis.	One town hall and one pre-meeting.	Planning: Summer 2008 Event: November 2008.	Expertise of committee members and community partners.	Event evaluation.
5) Conduct cascading Appreciative Inquiry (AI) interviews with persons experiencing homelessness and with community leaders.	Build community support for ending homelessness and inform the planning process.	40 interviews completed.	December 2008.	CoC members and stakeholders to conduct AI interviews.	Track satisfaction with the interviews through surveys.
Short Term					

6) Develop collaborative press releases, community awareness events and a comprehensive Web-based information source.	Increase community awareness of issues related to homelessness, resources and solutions.	Quarterly press releases, two events a year and one comprehensive Web-based information source.	First community event by January 2009 and quarterly press releases thereafter.	Media coverage and Website development.	CoC meetings.
7) Expand Project Homeless Connect to take place at least quarterly and to expand to at least one other city in the region per year.	Provide immediate services to homeless people in an efficient setting.	Quarterly events and at least one new community to host a Project Homeless Connect per year.	First by July 1, 2008.	Connection to housing, services and benefits, salons to provide hair cuts, volunteers to guide guests through the process and donations of clothing for guests.	Track the number of agencies that participated and the number of people connected to services.
8) Host brown-bag trainings for stakeholders.	Improve regional collaboration and communication on strategies to end homelessness in the region.	Four a year.	Beginning in January 2009.	Speakers and meeting supplies.	Track the number of participants and survey the participants to evaluate satisfaction.
9) Create a "Collaboration Corner" at the homeless street count volunteer trainings.	Encourage service providers to communicate with each other, share information about services they provide and encourage innovative partnerships among providers and programs.	One event at each of the 3 volunteer trainings.	Planning: three months Events: one month.	Meeting supplies.	Track the number of participants.
10) Provide in-depth	Improve the quality of data	Number of trainings	Annually	Experience of	Compare count

training, technical assistance and mentoring for Street Count Coordinators.	and collection methods and increase validity to the street count throughout the region.	and hours of technical assistance provided.		those that have done the count before, city staff, outreach teams and volunteers.	trends to prior years.
11) Develop a tri-fold business card size community resource guide for persons who are experiencing homelessness.	Empower homeless people to access appropriate services.	Tri-fold resource card.	March 2009.	Research information about resources. Funding for printing of cards.	User survey results.
12) Create a User Guide for homeless behavioral health services to facilitate better communication and collaboration among providers.	This will facilitate seamless service delivery and faster recovery from homelessness. The result will benefit the community at large as homeless people will spend less time being homeless and more time as productive citizens positively contributing to the region.	One User Guide will enable people to navigate through the homeless behavioral health system more efficiently.	Completed in FY09.	Development of User Guide.	User Guide is complete and clients respond to a survey and usefulness of the guide.

Prevention

Goal: Coordinate an effective information network to prevent people from becoming homeless.

Time Sensitive					
Action Steps	Purpose	Measurement (how many, etc.)	Timing	Resources Needed	Evaluation Method

13) Develop recommendations for local prevention strategies based on an assessment of best practices.	Identify the strategies that have the most potential for successful local implementation.	The number of recommendations presented in a report to the CoC.	Completed by October, 2008 for the ACEH Conference.	Report/Presentation.	Summit survey evaluation of presentation.
Short Term					
14) Develop a resource sheet that offers information about eviction prevention resources within the community and provide the sheet to property managers along with eviction notices.	Decrease the number of evictions.	100 percent of people being served eviction notices will receive the resource notices.	Beginning in January 2009.	Participation of stakeholders in developing resource page to include with eviction notices.	Document a decrease in the number of evictions.
15) Hold housing stability and financial management trainings.	Ensure people have the information and resources they need to remain stably housed.	Quarterly.	Beginning in January 2010.	Training materials and trainers.	Participant evaluations.
Long Term					
16) Develop an interagency and community discharge planning model to eliminate the number of people being released from prisons and jails to homelessness.	Eliminate the number of people being released to homelessness.	Development of a planning model.	On going work and long term goal.	Coordination of efforts to stop the discharge of people into homelessness.	Protocols are implemented and a decrease in the number of people being discharged into homelessness is documented.

Housing and Services

Goal: Increase the number, availability, and coordination of permanent supportive housing, affordable housing and services to individuals and families who are experiencing homelessness.

Short Term

Action Steps	Purpose	Measurement (how many, etc.)	Timing	Resources Needed	Evaluation Method
17) Increase the supply of permanent supportive housing for chronically homeless individuals with a disability through U.S. Department of Housing and Urban Development McKinney Vento funding.	Stably house chronically homeless people and open up resources for others needing assistance.	100 in first year. 1,000 in ten years.	Annually.	Funding for operating and capital, PSH units, increased political will and supportive services (money or leveraged).	Increased number of permanent supportive housing units.
18) Improve coordination between homeless shelter providers and domestic violence shelter providers.	Reduce vacancy rates in all beds throughout the community.	Improved coordination of beds.	On going.	Coordination between providers and funders.	Reduction in vacancy of shelter beds.
19) Move 25 chronically homeless people from the streets into a housing first model and provide coordinated and effective wrap-around services to maintain housing stability.	Reduce the time chronically homeless people spend on the streets.	150 people a year.	Annually.	Funding, coordination between providers, units, Supportive services, outreach teams and follow-up teams.	150 People are placed in a housing first model.
20) Expand the number of faith communities participating in Open Table and Circles of Support.	Increase the capacity of the faith-based community to address homelessness.	25 faith communities sponsor 50 families or individuals who are homeless obtain	2 years	Funding, coordination between providers and volunteers,	Track the number of people placed in housing.

		housing and services needed to sustain housing.		training of volunteers, program manual and related documentation.	
21) Hold quarterly case manager trainings on assisting clients with obtaining SSI/SSDI determination.	Improve stability and self-sufficiency of persons who are homeless.	Number of individuals/families linked to benefits.	On going	Coordination among providers and Social Security Administration.	The number of persons receiving SSI/SSDI eligibility is increased. Report from providers.
22) Stabilize funding for existing shelter beds.	Ensure continuity of service.	Baseline of existing programs and support.	10 years, potentially reducing need for services as availability of Permanent Supportive Housing (PSH) and affordable housing increases.	Funding coordination between existing providers Support and advocacy from ACEH.	Funding for existing shelter beds becomes stabilized.
Long Term					
23) Establish a public/private partnership to create a sustained funding pool for development, implementation and expansion of permanent affordable housing units and supportive services for	Expand available resources to increase the number of permanent supportive housing units	Housing fund resource level: \$2 million in year one. Ramp to \$20M a year by year ten. 250 housing units in year one.	10 years.	Political will. Funding for capital, operating expenses & supportive services.	Number of individuals placed and retained in permanent supported housing.

families and individuals experiencing homelessness. These funds should be directed to expanding permanent housing opportunities including rental assistance programs, new construction, or acquisition and rehabilitation of existing units as well as funding requisite supportive services.		4000 housing units in ten years.			
24) Create a local permanent supportive housing toolkit to be distributed to local service providers wanting to create additional permanent supportive housing units in the community.	Increase community support and ability to develop permanent supportive housing.	1 toolkit, available online.	1 year.	Funding to create toolkit, staff time to coordinate, and a network to distribute the toolkit.	Survey people to determine if the toolkit is effective.
25) Establish a Benefits Advocate position that will assist chronically homeless persons who are eligible for benefits to apply for and receive SSI/SSDI benefits.	Increase the resources available to homeless people to stabilize.	1 position created in the community.	2 years.	Funding, coordination among providers and Social Security Administration, training for Benefits Advocate and referral sources.	The number of persons receiving SSI/SSDI eligibility is increased. Report from providers.

26) Create five new regional interdisciplinary outreach teams.	Assist individuals and families obtain housing.	5 new teams.	2 years.	Funding, coordination between providers, faith communities, local law enforcement, etc.	Increase in the number of individuals and families identified and housed.
27) Create follow-up and support services teams (ratio of 1 case manager to 20 families or individuals) to provide services to those in permanent supportive housing programs.	Help formerly homeless people maintain their housing.	Increased number of teams, and individuals/families in PSH programs.	5 years.	Funding Coordination between providers.	Measure the number of teams created and the number of individuals/families in PSH programs.

Education, Training and Employment

Goal: Promote information about resources that provide people who are homeless with the skills and knowledge they need to ameliorate barriers to housing.

Short Term					
Action Steps	Purpose	Measurement (how many, etc.)	Timing	Resources Needed	Evaluation Method
28) Collaborate with homeless liaisons in the	Provide resources needed for homeless youth to obtain	Quarterly meetings.	Annually.	Partnership with homeless school	Knowledge of resources is

public school system to provide resources for homeless youth to complete and or obtain their education.	their diploma, ESL, college preparation programs, vocational education programs and programs on financial literacy.			liaisons.	increased. Determined by pre and post survey.
29) Offer financial management classes to case managers.	Offer tools to case managers so they can better assist their clients achieve financial stability.	Number of financial management classes offered by Arizona Saves.	Annually.	Partnership with Arizona Saves.	Case Manager knowledge is increased. Measured by pre and post surveys.
Long Term					
30) Develop a Web-based resource page about employment and training opportunities.	Promote employment and training opportunities for people who are homeless in the region.	Development of one Web-based resource page.	December 2009.	Funding and staff to create page.	Creation of Web-based resource page.

In Conclusion

The Appreciative Inquiry (AI) process used to develop the *Regional Plan to End Homelessness* offers an opportunity to explore the region's response to homelessness in a way that has not been done before. From organizational useful practices to personal success stories, the Continuum of Care has looked at the issue of homelessness in a new light. This process has brought together stakeholders that have never been engaged before to develop a plan to be implemented collaboratively.

This Plan is just one point along the journey to end homelessness in the region. In March 2009, an Implementation Summit will be held to begin the next, and possibly most critical, phase of the Regional Plan. Continuum of Care members will unite with community stakeholders and clients to continue the AI process by developing an implementation plan. The implementation plan will include a timeline and funding strategies for the goals and action steps in the plan. Accountability will be established by identifying stakeholders to take the lead on each of the action steps.

The region can end homelessness by implementing the goals and action steps in the Plan, continually evaluating success, and by making adjustments when necessary. The plan encourages new collaborations, energy and leadership. There is a role for everyone in making a positive place for each person in the region.

AI Stakeholder Quotes

“Everyone deserves the opportunity to have a better life.” – Continuum of Care Member

“I worked with an individual that everyone had given up on. Now he works in the system helping others.” - Continuum of Care Stakeholder

“Individuals from the Continuum of Care come together and work with passion and respect for the people they are helping.” – Continuum of Care Stakeholder

“Political and social investment at the front end will be returned to the community through the success of families in the future.” – Continuum of Care Stakeholder

“People are working together to make a difference in this community. They are willing to put themselves out there to do the right thing as a team.” – Continuum of Care Member

“Different solutions work for different people.” – Continuum of Care Member

“I have been able to see former clients come back and work at our agency.” – Continuum of Care Member

“People are ready for change. They are hungry for change.” – Continuum of Care Member

“In the region, we need to continue to work together and ensure that the voices of the people we serve are being heard.” – Continuum of Care Member

“It’s important to offer resources, to meet clients where they are, and to be realistic about their challenges.” – Continuum of Care Member

“I respect the Continuum of Care members for asking the hard questions. We can address issues by working together and being proactive in our solutions.” – Continuum of Care Stakeholder

“Shared responsibility is key. Each entity can do something.” – Continuum of Care Stakeholder

“A woman was in a positive environment by being in our program for two years. She bought her own home and became a success speaker for United Way.” – Continuum of Care Member

“You have to get to the underlying reason to understand why each person is homeless.” – Continuum of Care Member

“Imagine every person and every family having a safe place to stay and their basic needs met.” – Continuum of Care Member

AI Client Interview Quotes

In their words, what it’s like to be homeless:

“I am a single dad and I have to do whatever it takes to help my family.”

“I set up small goals daily and keep moving towards them like having a safe place, a toothbrush, staying clean, and looking for work.”

“The hot summer (in Arizona) is the hardest part when you live outside on the street.”

“[Being homeless] is scary. You don’t know if someone is going to hurt or maybe even kill you.”

“Being homeless is more than being hungry; you need to shower, to look presentable to find a job, and a place to sleep.”

“It doesn’t matter what you did in the past; everyone needs a second chance.”

“I became homeless when my ex-husband left me with my children, I didn’t have any way to survive.”

“It is degrading to be homeless.”

“If someone is homeless, don’t put them in a category of worthlessness - find the reason for his homelessness.”

“Being homeless for me was a way of life. I did not feel like a part of society and often times felt like an outcast.”

“It’s hard to find stable housing while being a young single mother who is trying to go to school.”

“Being homeless is depressing, especially with kids.”

“Homelessness happens faster than you’d expect.”

“Not all homeless people are alcoholics or addicts. Some of us are trying to get on our feet.”

“Homelessness is a very lonely world. You don’t trust anybody. You’re afraid to ask for help and eventually it becomes a habit.”

“Homeless people need to be understood and supported for who they are.”

“The homeless are exploited. They want to be treated as people, not animals.”

“Being labeled ‘homeless’ is like being put into a box or a category where you are seen as less than a whole person.”

In their words, what people experiencing homelessness want and need to end homelessness:

“We need help, not pity or judgment.”

“Don’t give up on people when they are struggling.”

“Case management support and guidance will help move us on with our life and will teach us to be self-sufficient.”

“Ask [the homeless] what they need, they’re the best source. And then try to implement their needs.”

“Give opportunities.”

“Give everyone the courage and skills to try to make a better life.”

“To create success, we must help each other without being judgmental. We must remain open-minded because everyone is in different situations.”

“We need more time during the day to look for work. Focus on delivering services and classes so we have time to look for work.”

What works according to people experiencing homelessness:

“Learning to be responsible is key. Services will help, but in the end you have to do it yourself. You must be independent.”

“It’s important to let people know what is available to help them and push them to take the help.”

“If it wasn’t for the programs I don’t know where my family would be living.”

“I just decided I was going to succeed.”

“Without the programs or the funding we would be on the streets.”

“Someone gave me a chance to do something different with my life.”

“The most important thing is being treated like real people.”

Positive words from those experiencing homelessness:

“Creating a plan for success is not easy, but with patience and support you can achieve your goal to end homelessness.”

“I know that God has given me this opportunity to change my life.”

“You can’t judge a book by its cover; people have talent worth discovering. Give people the chance to do their best.”

“Maricopa County has given me the opportunity to change my life. They’ve been willing to give me a chance.”

“Homeless people need to put everything on the table and realize that it’s okay to be who you are and it’s also okay to change.”

What's Working in the Community

The MAG Continuum of Care Regional Committee on Homelessness has had a number of successes since the Regional Plan was updated in 2005. These successes are the result of steadfast dedication to ending homelessness and strategic decisions to support this goal. Through collaboration among a diverse array of stakeholders, funding has increased, innovations have been implemented, and lives have been saved. This section will highlight some of these best practices to celebrate their success and to encourage their replication.

Funding has increased because the Continuum continues to score well in the annual application to HUD for Stuart B. McKinney funding. The 2007 funding amount of more than \$21 million marks the highest award ever to be received in the region. Since 2005, 175 new permanent supportive housing beds have been created for chronically homeless individuals. The Homeless Management Information System in Maricopa County is on the leading edge for data collection and innovation. There is a new collaboration between the MAG Continuum of Care Regional Committee on Homelessness and the MAG Regional Domestic Violence Council to enhance the shelter referral process. New community strategies have been put into place and are showing positive outcomes. The Continuum of Care has developed and distributed heat-relief maps during the summer showing refuge locations and water hydration stations throughout the region in an effort to prevent heat-related deaths in the community. Importantly, excitement has been created during the development of the *Regional Plan to End Homelessness* to carry forward the region's response to ending homelessness.

There are many programs in the community that are showing great strides in the effort to end homelessness in the region. The Regional Plan Working Group invited all service providers in the community to submit information about their program, highlighting successes. The table below is a summary of the programs that responded. Each of the 14 programs below are producing great outcomes and are offered as local models that others can replicate. There are other programs in the community that are successful. This table is reflective of a sampling of the region's breadth of programs and services and does not represent all of the quality programs within the County.

The programs highlighted below are aligned with at least one of the areas of focus within the Regional Plan. This summary is meant to encourage the replication of useful practices. The program name, a brief summary, and contact information are listed below. Please refer to the agency contact for more detailed information on the programs.

Regional Plan to End Homelessness
Programs Working in the Community**

			Regional Plan Focus Areas				
Program Name	Description	Contact Information	Leadership and Community Support	Community Awareness and Collaboration	Prevention	Housing and Services	Education, Training and Employment
Arizona Housing, Inc.	This program provides permanent housing and supportive services for up to 84 single adults. Residents are maintaining housing with an average length of stay over two years with many over five years.	John Wall at (602) 256-6945 x 3043 or jwall@cass-az.org .				•	•
Arizona Veterans In Progress (VIP)	This program is a residential-employment center for homeless veterans. VIP services commence with street outreach to identify and engage homeless veterans in taking the steps to create positive change in their lives.	www.usvetsinc.org or contact Donna Bleyle, Site Director, at (602) 305-8585 or dbleyle@usvetsinc.org .			•	•	•
Family Connections Teams	This program provides voluntary services for families at risk of entering the child welfare system, or who are facing homelessness or a result of domestic violence, or for families who might benefit from intensive wraparound services.	State of Arizona 211 web site at www.az211.org or call Family Connections at (602) 542-6600.		•	•		•

Program Name	Description	Contact Information	Leadership and Community Support	Community Awareness and Collaboration	Prevention	Housing and Services	Education, Training and Employment
Heat Relief Network	The City of Phoenix Human Services Department operates this program that provides refuge from the heat, hydration stations, and wellness checks to residents during the summer. This program operates in partnership with the faith-based community, service providers, local businesses, and others in an effort to prevent heat-related deaths among homeless people.	Deanna Jonovich, Deputy Human Services Director, at (602) 262-4522 or deanna.jonovich@phoenix.gov .	•	•	•		
HomeBase Crews'n Health Mobile	This program is a collaboration between Phoenix Children's Hospital and HomeBase Youth Services. It provides a holistic approach to meeting the needs of homeless youth. Medical care, clinical care, substance abuse services, supportive services for crisis management, basic needs, housing, education, and employment are provided to assist young adults in reaching their fullest potential.	www.hbys.org or call (602) 263-7773.		•	•	•	•
Inter-faith Homeless Emergency Lodging Program (I-HELP)	I-HELP is an emergency shelter for homeless adults. The program rotates among faith communities throughout Tempe. The program operates seven nights per week and provides shelter, food and case management services.	www.az-ihelp.org or contact Beth Fiorenza, Executive Director of the Tempe Community Action Agency at (480) 350-5880 or BethF@tempeaction.org .	•	•		•	•

Program Name	Description	Contact Information	Leadership and Community Support	Community Awareness and Collaboration	Prevention	Housing and Services	Education, Training and Employment
Lodestar Day Resource Center (LDRC)	This program is designed to serve as a gateway for homeless individuals to access an extensive array of human services needed to begin the transformation from crisis to stability and self-sufficiency. The LDRC is located at the Human Services Campus in downtown Phoenix. A faith-based, non-profit, and private public collaboration that provides wrap-around services for people experiencing homelessness.	http://lodestardrc.org/ .	•	•	•	•	•
Open Table	This is a faith-based program or group of people and organizations that establishes goals and develops the overall plan to accomplish these goals. By working together with the individual or family, Open Table overcomes obstacles that prevent the achievement of stability and self-sufficiency.	www.theopentable.org . or info@theopentable.org or call (602)793-0533.	•	•	•	•	•
Native American Connections – Pendleton Court	This program provides 11 units/beds of temporary transitional supportive housing to homeless women who have become more stabilized after completing a residential treatment program for substance abuse.	Diana Yazzie-Devine, President/CEO of Native American Connections at (602) 254-3247 or d.devine@nativeconnections.org .			•	•	•

Program Name	Description	Contact Information	Leadership and Community Support	Community Awareness and Collaboration	Prevention	Housing and Services	Education, Training and Employment
Save the Family Transitional Living Program	This program is specialized, nationally accredited program providing comprehensive wrap-around housing and supportive services to homeless families with children in order that they become self-sufficient.	www.savethefamily.org or call (480) 898-0228.			•	•	•
Tempe Project Homeless Connect	Project Homeless Connect is a national best-practice that brings together multiple community organizations for one day in one place to provide immediate services to homeless individuals and families. Volunteers are paired with each homeless individual/family and escort them through the array of services. MARICOPA ASSOCIATION OF GOVERNMENTS

INFORMATION SUMMARY... for your review

DATE:

February 17, 2009

SUBJECT:

Development of the FY 2010 MAG Unified Planning Work Program and Annual Budget

SUMMARY:

Each year, staff develops the MAG Unified Planning Work Program and Annual Budget. The Work Program is reviewed each year by the federal agencies and approved by the Regional Council in May. A review of the detailed draft Work Program and Budget is tentatively scheduled for the beginning of April. This presentation is an overview of MAG's early FY 2010 proposed projects for the FY 2010 Work Program.

The Budget Workshop, which will also be available via Webinar, is scheduled for Wednesday, February 19, 2009, at 1:30 p.m. in the MAG Palo Verde Room. The invitation to the Budget Workshop is attached.

A draft Dues and Assessments worksheet is included in this material. The draft Dues and Assessments increase each fiscal year is calculated using the average CPI-U from the prior calendar year. Because of the uncertainty of economic conditions beginning with the FY 2009 Work Program, Dues and Assessments were not increased between FY 2008 and 2009. With the continuing uncertainty of economic conditions for MAG member agencies, MAG staff is proposing an overall reduction in the FY 2010 draft Dues and Assessments of fifty percent with changes for individual members because of population shifts.

Information for this presentation of the developing budget is included for your early review and input. Enclosed for your information are the following documents:

- ▶ Attachment One is the time line for budget development.
- ▶ Attachment Two is the draft Dues and Assessments for FY 2010.
- ▶ Attachment Three is the Budget Workshop invitation.
- ▶ Attachment Four is the Proposed New Projects for FY 2010.

PUBLIC INPUT:

None.

PROS & CONS:

PROS: MAG is presenting a review of the proposed new projects associated estimated costs for FY 2010. This will provide for an incremental review of key budget proposed projects in February and a review of the more complete draft budget and work program in March of 2009.

CONS: None.

TECHNICAL & POLICY IMPLICATIONS:

TECHNICAL: None.

POLICY: None.

ACTION NEEDED:

Information.

PRIOR COMMITTEE ACTIONS:

FY 2009 Total Costs		\$202,861	\$10,000	\$117,379	\$143,872	\$72,231	\$60,207			
Based on Population		-\$101,429	-\$5,000	-\$58,689	-\$71,937	-\$36,113	-\$30,104			
		-50.00%	-50.00%	-50.00%	-50.00%	-50.00%	-50.00%			
Per Capita Cost		\$0.02519	\$0.00124	\$0.01458	\$0.01787	\$0.00897	\$0.00748			

The annual Dues and Assessments are apportioned according to per capita populations. Dues and Assessments are decreased for FY 2010. Changes in population and a 50% reduction in overall dues account for the difference between FY 2009 and FY 2010 Dues and Assessments totals.

- (a) MAG July 1, 2008 Approved Population
- (b) The 9-1-1 assessment is apportioned according to per capita populations excluding the City of Phoenix.
- (c) The Homeless Prevention assessment is only charged to cities who are CDBG recipients and have populations over 50,000 and to Maricopa County.
- (d) Total Dues and Assessments minimum of \$350 per member is waived for FY 2010.
- (e) The Maricopa County portion of the dues and assessments includes the balance of the county, excluding Gila River Indian Community, the Fort McDowell Yavapai Nation, and the Salt River Pima-Maricopa Indian Community (except when calculating the Homeless Prevention assessment).
- (f) Maricopa and Pinal County portions
- (g) Maricopa and Yavapai County portions
- (h) Maricopa County portion only

February 17, 2009

MAG WEBINAR PRESENTATION ON THE DEVELOPMENT OF THE FY 2010
UNIFIED PLANNING WORK PROGRAM AND ANNUAL BUDGET

Thursday, February 19, 2009, at 1:30 p.m.
MAG Office, Suite 200, Palo Verde Room
302 North 1st Avenue, Phoenix

In an effort to get early input into the FY 2010 MAG Budget and to provide information about the proposed budget for our member agencies, we will hold a budget workshop on Thursday, February 19 at 1:30 p.m. The budget workshop will include an overview of MAG's proposed dues and assessments and proposed projects for the FY 2010 Work Program.

We would like to invite you to attend this meeting by GoToMeeting®, or in person at MAG in the Palo Verde Room on the second floor of the MAG Offices. Instructions on attending this workshop are described below:

- GoToMeeting®: Please join GoToMeeting® with the following web address:
<https://www2.gotomeeting.com/join/935129543>
GoToMeeting® Online Meetings Made Easy™
- Once connected to GoToMeeting® dial (602) 261-7510 between 1:25 p.m. and 1:30 p.m. the day of the workshop. After the prompt, please enter the meeting ID number 283438 on your telephone keypad followed by the # key. If you have a problem or require assistance, dial 0 after calling the number above. (To attend by phone only please follow the same instructions.)
- Attending in Person: If you are attending in person, please park in the garage underneath the building. Bring your ticket to the meeting, parking will be validated. For those using transit, Valley Metro/RPTA will provide transit tickets for your trip. For those using bicycles, please lock your bicycle in the bike rack in the garage.

If you have any questions or need additional information on the budget presentation, please contact Becky Kimbrough at (602) 254-6300.

Draft MAG FY 2010 Work Program
Proposed New Projects

Environmental Division

Project Name: 2010 MAG Air Quality Associate

Brief Description: As the designated Regional Air Quality Planning Agency for the Maricopa area, the Maricopa Association of Governments conducts air quality modeling and prepares air quality plans to attain and maintain the National Ambient Air Quality Standards. Technical assistance from a MAG Associate will be needed in the following technical air quality areas: air quality modeling; air quality monitoring and meteorology; traffic surveys and emissions inventories; dirt road inventories and tracking progress made to pave dirt roads; statistical analysis of data; analysis of control measures; implementation of control measures; tracking implementation of committed control measures; air quality plan preparation; CMAQ evaluation methodologies; and transportation conformity. Technical assistance may also include an analysis of greenhouse gas requirements and emissions. The National Association of Regional Councils and Association of Metropolitan Planning Organizations have indicated that greenhouse gas requirements may be included in the transportation reauthorization legislation.

Recommended by: This project is recommended by MAG staff to meet the requirements in the Clean Air Act and to follow through with the direction given by the MAG Regional Council.

Mission/Goal Statement: Perform data collection, analysis, modeling, and planning necessary to meet the National Ambient Air Quality Standards and the Clean Air Act requirements for the criteria pollutants and conformity.

Resources Required: \$130,000

Approximate Time Frame for Project Completion: One year.

Expected Outcome: A new Eight-Hour Ozone Plan is required to demonstrate attainment of the strengthened ozone standard promulgated by the Environmental Protection Agency in March 2008 (0.075 parts per million). Supplemental analyses may be necessary to provide to the Environmental Protection Agency for approval of the MAG 2007 Five Percent Plan for PM-10. Tracking the implementation of the committed measures in the Five Percent Plan and the progress made to pave dirt roads will contribute to attainment of the PM-10 standard and cleaner air for the citizenry.

Benefit to MAG member agencies: Attainment of the strengthened eight-hour ozone standard would reflect positively on the region. Timely implementation of committed control measures in the MAG Five Percent Plan for PM-10 will assist the region in meeting the Clean Air Act requirements for PM-10 and avoid more onerous control measures, the withholding of federal highway funds, and a conformity lapse. Updating the CMAQ methodologies and assumptions used to quantify the air quality benefits of the CMAQ projects will incorporate the latest research results and technical approaches. This will ensure that the projects submitted by the MAG member agencies for CMAQ funds are fairly and equitably evaluated. An analysis of greenhouse gas requirements and emissions may be beneficial to the MAG member agencies for complying with potential future mandates.

Benefit to the Public: Timely implementation of committed measures in the MAG Five Percent Plan for PM-10 will assist the region in attaining the PM-10 standard and improving public health. Improved methodologies for CMAQ project evaluation will provide more accurate emissions reductions for proposed projects that will be used in prioritizing the projects for funding and implementation in accordance with the multi-modal theme in the Regional Transportation Plan.

Draft MAG FY 2010 Work Program
Proposed New Projects

Transportation Division

Project Name: Traffic Signal Optimization Program (TSOP) On-Call Projects

Brief Description: The MAG Traffic Signal Optimization Program (TSOP) has successfully completed 22 projects in 11 MAG jurisdictions. Projects developed through this program provide technical assistance to member agencies for improving traffic signal coordination, optimization, and review of operations through simulation modeling. Assistance is provided by consultants hired by MAG through an on-call services contract. The TSOP has been championed by the MAG Intelligent Transportation Systems Program to provide traffic engineering assistance for refining signal operations across the MAG region. It is one of the strategies identified in the MAG Regional Concept of Transportation Operations. Projects may generally cost up to \$30,000, and would not require a local match.

Requested by: This project is recommended by MAG staff, and based on the MAG ITS Committee recommendation for FY 2010 TIP. Funds have already been programmed for this project.

Mission/Goal Statement: The goal of this project is to ensure that the traffic signal operations in the region are efficient, safe, and minimize the impact on the environment.

Resources Required: \$321,497 (TIP)

Approximate Time Frame for Project Completion: Based on our previous experience in executing TSOP projects at MAG, it is anticipated that these funds will be used to carry out about ten TSOP projects during the second half of fiscal year 2010.

Expected Outcome: Improved traffic operations and reduced vehicular emissions. Signal optimization projects have been found to produce benefit to cost ratios as high as 40 to one.

Benefit to MAG member agencies: MAG member agencies benefit from being able to adjust signal timing to account for changes in traffic patterns due to new developments and traffic growth. Affected members may postpone the need for costly long-term road capacity improvement by improving traffic flow with existing resources.

Benefit to the Public: Reduced motorist frustration and unsafe driving by reducing stops and delay. Improved traffic flow through a group of signals, thereby reducing emissions and fuel consumption.

Draft MAG FY 2010 Work Program
Proposed New Projects

Transportation Division

Project Name: 2010 Phase I: Inner Loop Traffic Operations Model

Brief Description: This project will establish a multi-modal traffic operations model of the Phoenix Inner Loop to assist with planning for automobile, commercial vehicle, and transit (bus and rail) operations and will include both freeways and arterial streets.

Requested by: This project is recommended by MAG staff, City of Phoenix, and Arizona Department of Transportation.

Mission/Goal Statement: Development of a multi-modal traffic simulation model for the central core of the urban area for testing alternative investment strategies, which will improve mobility.

Resources Required: \$500,000, and an additional staff position.

Approximate Time Frame for Project Completion: 12 to 18 months.

Expected Outcome: A computer simulation transportation model that will improve mobility for the testing of alternative investment strategies for the central area of the urban region.

Benefit to MAG member agencies: A refined strategy for transportation investments that will result in higher levels of mobility in the central area of the region by identifying more cost effective options.

Benefit to the Public: Higher level of mobility for the public in the central area of the metropolitan region.

Draft MAG FY 2010 Work Program
Proposed New Projects

Transportation Division

Project Name: Survey of Revenue Options for Regional Transportation Funding

Brief Description: Conduct a survey of sources of regional funding for transportation projects in the United States and summarize the policies and methods used to allocate this funding to projects to ensure geographic equity. The survey will identify what geographic equity measures are used, such as population, revenue generation, or other measures, and how these measures are used in the project selection process. In addition, the use of public private partnerships (PPP) to construct transportation facilities will also be summarized as part of the survey. This will include the type of project, a description of the project, parties involved in the project, and the funding strategy for the construction and / or the operation of the transportation project.

Requested by: This project is recommended by MAG staff.

Mission/Goal Statement: Identify funding sources and measures of geographic equity and how these measures are used for project selection.

Resources Required: \$125,000

Approximate Time Frame for Project Completion: Six months.

Expected Outcome: Identification of funding sources and measures, identifying how these measures are used for project selection.

Benefit to MAG member agencies: Information from other regions regarding the connection between where revenues are raised and where projects are located to ensure broad support in future transportation elections.

Benefit to the Public: Identification of alternative methods for future regional transportation funding.

Draft MAG FY 2010 Work Program
Proposed New Projects

Transportation Division

Project Name: Regional ITS Architecture (RIA) Phase II – Web Application – On-call

Brief Description: A current consultant project (RIA Phase I) that is performing the essential tasks for updating the Regional ITS Architecture (RIA) is expected to be completed by March 2009. A follow-up project, RIA Phase II, is proposed for implementing web-based tools that would enable the RIA to be implemented effectively across the region and incorporate the RIA as an essential component within the regional planning process. The Phase II project will build on the results and the Microsoft SQL database to be developed during the Phase I project.

The following products/benefits will result from the web application to be developed through the RIA Phase II project:

- Availability of web-based tools to assist MAG member agencies with incorporating RIA in their ITS-related project development process. This would ensure that the projects satisfy federal requirements for RIA consistency, as well as ensuring regional compatibility. These tools will provide download services to member agencies so that they can download portions of the entire Regional ITS Architecture to assist in the development of project ITS architecture for an individual jurisdiction.
- All existing and planned regional ITS infrastructure projects and other related applications will be presented with their links to the RIA. This information will be useful for agency staff, managers, and elected leaders to better understand the value of investments in ITS.
- Information on all existing and planned ITS applications and their functions in the region will be made available to the general public via an interactive display that will continue to be updated with new projects as they are implemented.

Requested by: This project is recommended by MAG staff.

Mission/Goal Statement: The primary goal of this project is to facilitate the adoption of the Regional ITS Architecture as a useful planning tool for ITS infrastructure development by MAG member agencies. Other goals include improving the sharing of information on transportation technology infrastructure in the region and their benefits, with planning staff decision makers at local agencies and the general public.

Resources Required: \$80,000

Approximate Time Frame for Project Completion: September 2009 through August 2010.

Expected Outcome: A software application at the MAG website that will be utilized by MAG member agencies when developing the scope of work for new ITS projects.

Benefit to MAG member agencies: Compliance with USDOT Rule 940 that requires all federally funded ITS projects to conform to a Regional ITS Architecture. Ability to share information with the public on city-owned infrastructure and programs.

Benefit to the Public: Better information on the investment of public funds in regional ITS infrastructure and its role in improving transportation services both at the local and regional levels.

Draft MAG FY 2010 Work Program
Proposed New Projects

Transportation Division

Project Name: Central Phoenix Transportation Framework Study

Brief Description: Develop a multi-modal transportation framework for the Central Phoenix study area, bounded by Northern Avenue on the north, the SR-143/Hohokam Expressway on the east, South Mountain on the south, and 75th Avenue on the west.

Requested by: This project is recommended by MAG staff, City of Phoenix, and Arizona Department of Transportation.

Mission/Goal Statement: Development of a framework for the central core of the urban area that will set the framework for future transportation investment decisions to improve regional mobility along Interstate 10, Interstate 17, SR-51, SR-202L, key surface arterials, and future transportation corridors proposed by the Regional Transportation Plan.

Resources Required: \$600,000

Approximate Time Frame for Project Completion: 12 to 18 months.

Expected Outcome: An overall regional transportation framework for the Phoenix city center and surrounding neighborhoods for basing future transportation investment decisions.

Benefit to MAG member agencies: While the primary beneficiary for this effort will be the core of the Phoenix urban area, a coordinated investment framework delivered by this project will represent a vision for enhancing and improving transportation in and out of this region's primary economic center, thereby benefitting the entire metropolitan region.

Benefit to the Public: Higher level of mobility for the public in and around the core of the Phoenix metropolitan area.

Draft MAG FY 2010 Work Program
Proposed New Projects

Transportation Division

Project Name: Algorithmic Development, Estimation, Calibration, and Validation for the MAG Regional Activity-Based Model Development

Brief Description: This project ensures continuity in the activity-based model development and constitutes conclusive stages of the development. Activity-based models generally take from three to five years or longer to fully develop. Activity-based models represent the next generation of travel forecasting models that are required for testing planning policies and to increase the explanatory power of traditional travel forecasting tools. The necessity to address new planning and policy questions and challenges, as well as the changing economic environment, requires development of this advanced forecasting and simulation tool. MAG structured the development of the more advanced model in a way that provides clear benefits and deliverables at the end of each development stage.

Requested by: This project is recommended by MAG staff.

Mission/Goal Statement: To provide in-depth analysis and quality transportation forecasts for the purpose of regional transportation planning and informed decision making by MAG member agencies and to advance the state-of-the-practice in MAG transportation modeling, data collection, and analysis and achieve emerging state-of-the-art in metropolitan transportation modeling.

Resources Required: \$500,000

Approximate Time Frame for Project Completion: FY 2010.

Expected Outcome: Completed third phase of the activity-based model development, including, but not limited to, estimated and calibrated modeling procedures and model validation. This phase will complete the work related to integration of trip-generation models in the daily activity modeling framework and complete the tour-based and destination models. A detailed list of tasks of the phase three development will be based on the results of the first and second phases.

Benefit to MAG member agencies: The development of advanced forecasting tools that are better able to answer upcoming planning policy questions and increase the quality and sensitivity of travel forecasting in the region.

Benefit to the Public: Better planning decisions based on the increased quality of information provided to the decision makers.

Draft MAG FY 2010 Work Program
Proposed New Projects

Transportation Division

Project Name: On-Call Consulting Services for Transportation Software Development and Support

Brief Description: This project will provide ongoing support for model-related software development tasks. Required areas of expertise include FORTRAN, C, C#, Java, ArcGIS and GISDK, dynamic traffic assignment software (to be determined) and relational data base development expertise. This on-call service will ensure that the development, maintenance and support of the existing MAG transportation modeling programs and data management tasks are supported as required for ongoing modeling tasks and requests.

Recommended by: This project is recommended by MAG staff.

Mission/Goal Statement: To provide in-depth analysis and quality transportation forecasts for the purposes of regional transportation planning and informed decision making by MAG member agencies. This project will advance state-of-the-practices in MAG transportation modeling, data collection, and analysis and achieve emerging state-of-the-art in metropolitan transportation modeling.

Resources Required: \$450,000

Approximate Time Frame for Project Completion: FY 2010.

Expected Outcome: Technical support and development for transportation software.

Benefit to MAG member agencies: Uninterrupted travel forecasting and transportation modeling support for the member agencies.

Benefit to the Public: Better planning decisions in the region, increased public awareness on transportation issues.

Draft MAG FY 2010 Work Program
Proposed New Projects

Transportation Division

Project Name: Monitoring Traffic Conditions on Freeways and Arterial Streets Using New Technologies

Brief Description: The study builds on the results of the currently ongoing evaluation of traffic mobility on MAG freeway and arterial networks through new ground truth data sources. It will complete the investigation of the archived ground truth traffic data provided by leading traffic information companies and will finalize data collection methodology and the purchase of the required data sets.

Requested by: This project is recommended by MAG staff.

Mission/Goal Statement: Identify and evaluate alternative sources of traffic information that will result in more effective and timely traffic data for planning and modeling.

Resources Required: \$95,000

Approximate Time Frame for Project Completion: FY 2010.

Expected Outcome: New travel time and speed data collection methodology to replace probe car survey to allow constant monitoring of the MAG freeway and arterial traffic conditions.

Benefit to MAG member agencies: New sets of data for planning and forecasting purposes with annual and extensive spatiotemporal coverage on travel time and travel speed. This will be the first arterial mobility monitoring program.

Benefit to the Public: Better transportation planning through analysis of alternate traffic information for decision making in the region.

Draft MAG FY 2010 Work Program
Proposed New Projects

Transportation Division

Project Name: On-call Consulting Services for Collection of Regional Intersection Traffic Data, Screen Line Traffic Counts, and Level of Service Data on Regional Facilities

Brief Description: This on-call consulting support project is directed at collecting traffic data for the following main areas: turning movements on a set of selected intersections of the major arterial roads in the region; mid-block counts to fill in gaps in the new screen line system; level of service data on regional freeways; and freeway ramp queuing data. The main purpose of the project is to provide validation data for the regional forecasting models, and to complement and update previously collected traffic volume data sets.

Requested by: This project is recommended by MAG staff.

Mission/Goal Statement: Provide current data for in-depth analysis and quality transportation forecasts for the purposes of regional transportation planning and informed decision making by MAG member agencies. Advance state-of-the-practice in MAG transportation modeling, data collection, and analysis and achieve emerging state-of-the-art in metropolitan transportation modeling.

Resources Required: \$350,000

Approximate Time Frame for Project Completion: FY 2010.

Expected Outcome: Traffic volumes data sets.

Benefit to MAG member agencies: New sets of data for planning and forecasting purposes.

Benefit to the Public: Better transportation planning decisions in the region through using current sources of data for traffic impact studies.

Draft MAG FY 2010 Work Program
Proposed New Projects

Transportation Division

Project Name: Texas Transportation Institute (TTI) Urban Transportation Performance Measure Study

Brief Description: This is an ongoing effort with Texas Transportation Institute that is being sponsored by a number of large MPOs and DOTs around the country. The data will be utilized in data analysis and modeling tasks. The FY 2010 project will investigate freight mobility and impacts of the economic environment on traffic congestion.

Requested by: This project is recommended by MAG staff.

Mission/Goal Statement: Provide in-depth analysis and quality transportation forecasts for the purposes of regional transportation planning and informed decision making by MAG member agencies. Conduct regional level mobility evaluation and provide support on various mobility related issues. Advance state-of-the-practice in MAG transportation modeling, data collection and analysis and achieve emerging state-of-the-art metropolitan transportation modeling.

Resources Required: \$25,000

Approximate Time Frame for Project Completion: FY 2010.

Expected Outcome: Updated evaluation of the MAG regional mobility.

Benefit to MAG member agencies: New, in-depth, quantified analytical data for planning and forecasting purposes.

Benefit to the Public: Better transportation planning decisions in the region.

Draft MAG FY 2010 Work Program
Proposed New Projects

Communications Division

Project Name: *Don't Trash Arizona* Litter Prevention and Education Program for the Regional Freeway System

Brief Description: Concern over freeway litter led elected officials to include \$279 million for landscape maintenance and litter control (pickup and sweeping) in the Regional Transportation Plan approved by voters in 2004, including funding for litter prevention. The objective of the Litter Prevention and Education program is to improve visual aesthetics along the highway system in the MAG region by increasing awareness of the economic, safety, and health impacts of littering and to encourage motorists to dispose of trash properly.

In 2006, litter prevention and education efforts were begun by the Maricopa Association of Governments (MAG) and the Arizona Department of Transportation (ADOT) to address roadway litter. The slogan *Don't Trash Arizona!* was selected and is used cooperatively by MAG and ADOT to increase public awareness of the roadway litter condition, and the agencies work together on efforts to decrease roadway litter. In May 2008, the MAG Regional Council approved funding for continuing the program through FY 2009, with the possibility of extending the program depending on funding availability and evaluation results.

Requested by: This project is recommended by MAG staff.

Mission/Goal Statement: Develop and implement a strategy to increase public awareness as a way to reduce litter on the regional freeway system in the MAG Region and to utilize an evaluative process to measure the success of the program.

Resources Required: \$300,000

Expected Outcome: The consultant will develop and implement a strategy to increase public awareness as a way to reduce litter on the regional freeway system in the MAG Region and will implement an evaluative process to measure the success of the program. The consultant will use an array of communication services, including public education and outreach efforts that are designed to increase awareness of the freeway litter problem in the MAG region in an effort to lead to measurable changes in behavior among offenders. The consultant will provide services that include public relations, marketing, advertising, and the development of partnerships with businesses, organizations, or other entities that provide additional value in promoting litter control efforts.

Benefit to MAG member agencies: It costs our region about \$3 million and nearly 150,000 labor hours each year to pick up litter along Valley freeways. Unsightly litter also impacts our economy when tourists and prospective businesses choose not to come back to our state due to a poor impression. Litter is not only unsightly, it is unsanitary and can cause environmental and health problems. Cigarette butts, for example, contain toxic chemicals that can end up in storm drains and contaminate our water systems. Trash and other items falling from unsecured loads can cause serious traffic accidents. Debris on roadways nationwide causes 25,000 accidents each year and more than 80 fatalities. MAG analysis of crash statistics finds that in 2006, there were 468 accidents due to objects in the roadway. Accidents and slow-downs due to roadway debris increase the time we spend stuck in traffic and results in lost productivity.

Benefit to the Public: While many Arizonans take pride in our state, some believe that one small piece of trash won't matter. But even small pieces of litter add up to a giant problem: about 151,000 bags of trash are picked up off Valley freeways every year. By reducing the amount of freeway litter through public education, we can address the economic, safety, and health impacts caused by littering and improve our regional quality of life.

Draft MAG FY 2010 Work Program
Proposed New Projects

Communications Division

Project Name: Disability Outreach Associate

Brief Description: Federal transportation law requires that environmental justice be part of any transportation plan to prevent discrimination and to ensure the full and fair participation of minority populations and low-income populations in the transportation decision-making process. MAG implemented the Associate Outreach program in 2001 to provide targeted outreach to Title VI communities, including the disability community. The Disability Outreach Associate serves as a liaison between MAG and the disability community, developing methods to engage the community in the transportation planning process, while achieving high levels of participation from the community and securing participation and promoting activity in the planning and programming process.

Requested by: This project is recommended by MAG staff, in compliance with SAFETEA-LU federal transportation law.

Mission/Goal Statement: Develop a regional transportation plan that ensures the full and fair participation of all potentially affected communities in the transportation decision-making process, and to ensure that the plan identifies and addresses, as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on protected populations such as the disability community.

Resources Required: \$20,000

Approximate Time Frame for Project Completion: Ongoing in one-year contract terms to FY 2010.

Expected Outcome: The Associate will work as a liaison between MAG and members of the disability community to provide information and collect feedback to be used in the update of the Regional Transportation Plan. The Plan is designed to develop systems, services, and solutions that meet the needs of the public, including disability communities. Input from the disability community leads to better transportation decisions that meet the needs of all people and the creation of transportation facilities that fit harmoniously into communities.

Benefit to MAG member agencies: Active public involvement by all affected stakeholders helps strengthen community-based partnerships; helps develop transportation facilities that fit harmoniously into communities; and provides populations with opportunities to learn about and improve the quality and usefulness of transportation in their lives.

Benefit to the Public: Regional transportation solutions that ensure safety and mobility for all while avoiding, minimizing, or mitigating disproportionately high and adverse human health and environmental effects, including social and economic effects, on Title VI and other protected populations such as people with disabilities.

Draft MAG FY 2010 Work Program
Proposed New Projects

Communications Division

Project Name: Video Outreach Associate

Brief Description: Freelance writer/producer to assist in video outreach program through project management. Associate would help with pre-production; shot-sheeting and writing scripts; and overseeing post-production.

Requested by: This project is recommended by MAG staff.

Mission/Goal Statement: Surveys have found that an overwhelming majority of Americans get their news and information through the medium of television over all other forms of media. Through the use of television production equipment and facilities, MAG utilizes its Video Outreach Program to help inform Valley residents of MAG's role and responsibilities in the region and to encourage public participation in the development of MAG plans and programs. These video segments are distributed to air on city cable channels and other broadcast outlets in order to reach the broadest possible community.

Resources Required: \$24,000

Approximate Time Frame for Project Completion: FY 2010.

Expected Outcome: The MAG Communications Division began its Video Outreach Program in 2007 with the purchase of television production equipment and staff training. A number of successful videos have been produced to date. A freelance writer/producer was recruited in 2008 to assist at key points in the production and enable these important videos to be completed. This would be a continuation of the services that began in October 2008.

Benefit to MAG member agencies: As members of the MAG organization, member agencies play a key role in developing regional policies. The Video Outreach Program provides positive exposure regarding this role and increases the public understanding of local governments' regional responsibilities and accomplishments.

Benefit to the Public: The MAG Video Outreach Program performs an important public service by communicating information about air quality, transportation, and human services issues to the general public, encouraging public participation in the development of MAG plans and programs, and resulting in a better informed and active citizenry.

Draft MAG FY 2010 Work Program
Proposed New Projects

Information Services Division

Project Name: Digital Aerial Photography

Brief Description: MAG and MAG member agencies use digital aerial photography for a variety of planning and GIS purposes. In this rapidly developing area, it is important to have up-to-date imagery to track development and land use and to plan for future growth. This project also provides the digital aerial photography to member agencies at no additional cost to the member agency.

Requested by: This project is recommended by MAG staff, and MAG Population Technical Advisory Committee.

Mission/Goal Statement: Annual updates to the digital aerial photography enhances member agency and MAG planning and mapping capabilities.

Resources Required: \$40,000

Approximate Time Frame for Project Completion: December 2009.

Expected Outcome: Up-to-date imagery enabling MAG and MAG member agency staff to use and display current and accurate information.

Benefit to MAG member agencies: MAG will purchase the imagery with a license that allows MAG to distribute a copy of the imagery to each MAG member agency.

Benefit to the Public: New imagery will enable MAG and MAG member agencies to enhance their planning efforts and allow them to provide better information to the public regarding new and existing developments.

Draft MAG FY 2010 Work Program
Proposed New Projects

Information Services Division

Project Name: MAG Associate(s), Census 2010

Brief Description: MAG staff may need assistance in preparation for Census 2010. It is critical that MAG not only has adequate staff to continue to support existing and planned services and programs, but also be able to adequately address the needs of MAG and MAG member agencies that will be presented by Census 2010.

Requested by: This project is recommended by MAG staff and the MAG Population Technical Advisory Committee.

Mission/Goal Statement: MAG can better support MAG member agencies with adequate resources to address the needs that will be presented by Census 2010.

Resources Required: \$38,000

Approximate Time Frame for Project Completion: This request is for funding through June 2010. The project will be completed immediately following Census 2010.

Expected Outcome: This possible MAG Associate(s) will allow MAG to continue the high level of support for MAG member agencies.

Benefit to MAG member agencies: This possible MAG Associate(s) will enable MAG to provide support to MAG member agencies as necessary, thus reducing the potential for duplication of effort. The decennial census count is used to distribute billions of federal dollars to cities and towns.

Benefit to the Public: The decennial census count is used to distribute billions of federal dollars to citizens in the MAG Region.

February 17, 2009

TO: Members of the MAG Regional Council

FROM: Lindy Bauer, Environmental Director

SUBJECT: PROPOSED STRAWMAN OPTION FOR A REVISED EIGHT-HOUR OZONE
NONATTAINMENT AREA BOUNDARY

By March 12, 2009, the Governor is required to recommend nonattainment area boundaries to the Environmental Protection Agency (EPA) for the revised eight-hour ozone standard. The Environmental Protection Agency had strengthened the standard by lowering it from .08 parts per million to .075 parts per million on March 12, 2008. The Arizona Department of Environmental Quality (ADEQ) has been conducting a stakeholder process to discuss a Strawman Option for a Revised Eight-Hour Ozone Nonattainment Area Boundary. The ADEQ is proposing to extend the boundary only where absolutely necessary. The deadline for submitting comments on the Strawman Option to ADEQ is the close of business on February 26, 2009. Following the consideration of comments, ADEQ will make a recommendation to the Governor.

The current eight-hour ozone nonattainment area boundary was designated by EPA in 2004. It encompasses a 4,880 square mile area located mainly in Maricopa County and Apache Junction in Pinal County. Presently, eight out of twenty monitors in the nonattainment area are meeting the new eight-hour ozone standard of .075 parts per million and twelve monitors have violations. The violations of the new standard are primarily in eastern Maricopa County and northern Pinal County. In general, the ozone concentrations are trending downward.

The Arizona Department of Environmental Quality is in the process of developing recommended boundaries for the Maricopa nonattainment area based upon the nine factors outlined in the December 2008 EPA guidance. These factors include air quality data; emissions data; population density and degree of urbanization; traffic and commuting patterns; growth rates and patterns; meteorology; geography/topography; jurisdictional boundaries; and level of control of emission sources. As a starting point for the analysis, EPA recommends the Core Based Statistical Area which includes all of Maricopa and Pinal counties. The guidance indicates that EPA may support nonattainment area boundaries that are larger or smaller than the presumptive starting point. Each nonattainment area should be evaluated on a case-by-case basis.

A Voluntary Association of Local Governments in Maricopa County

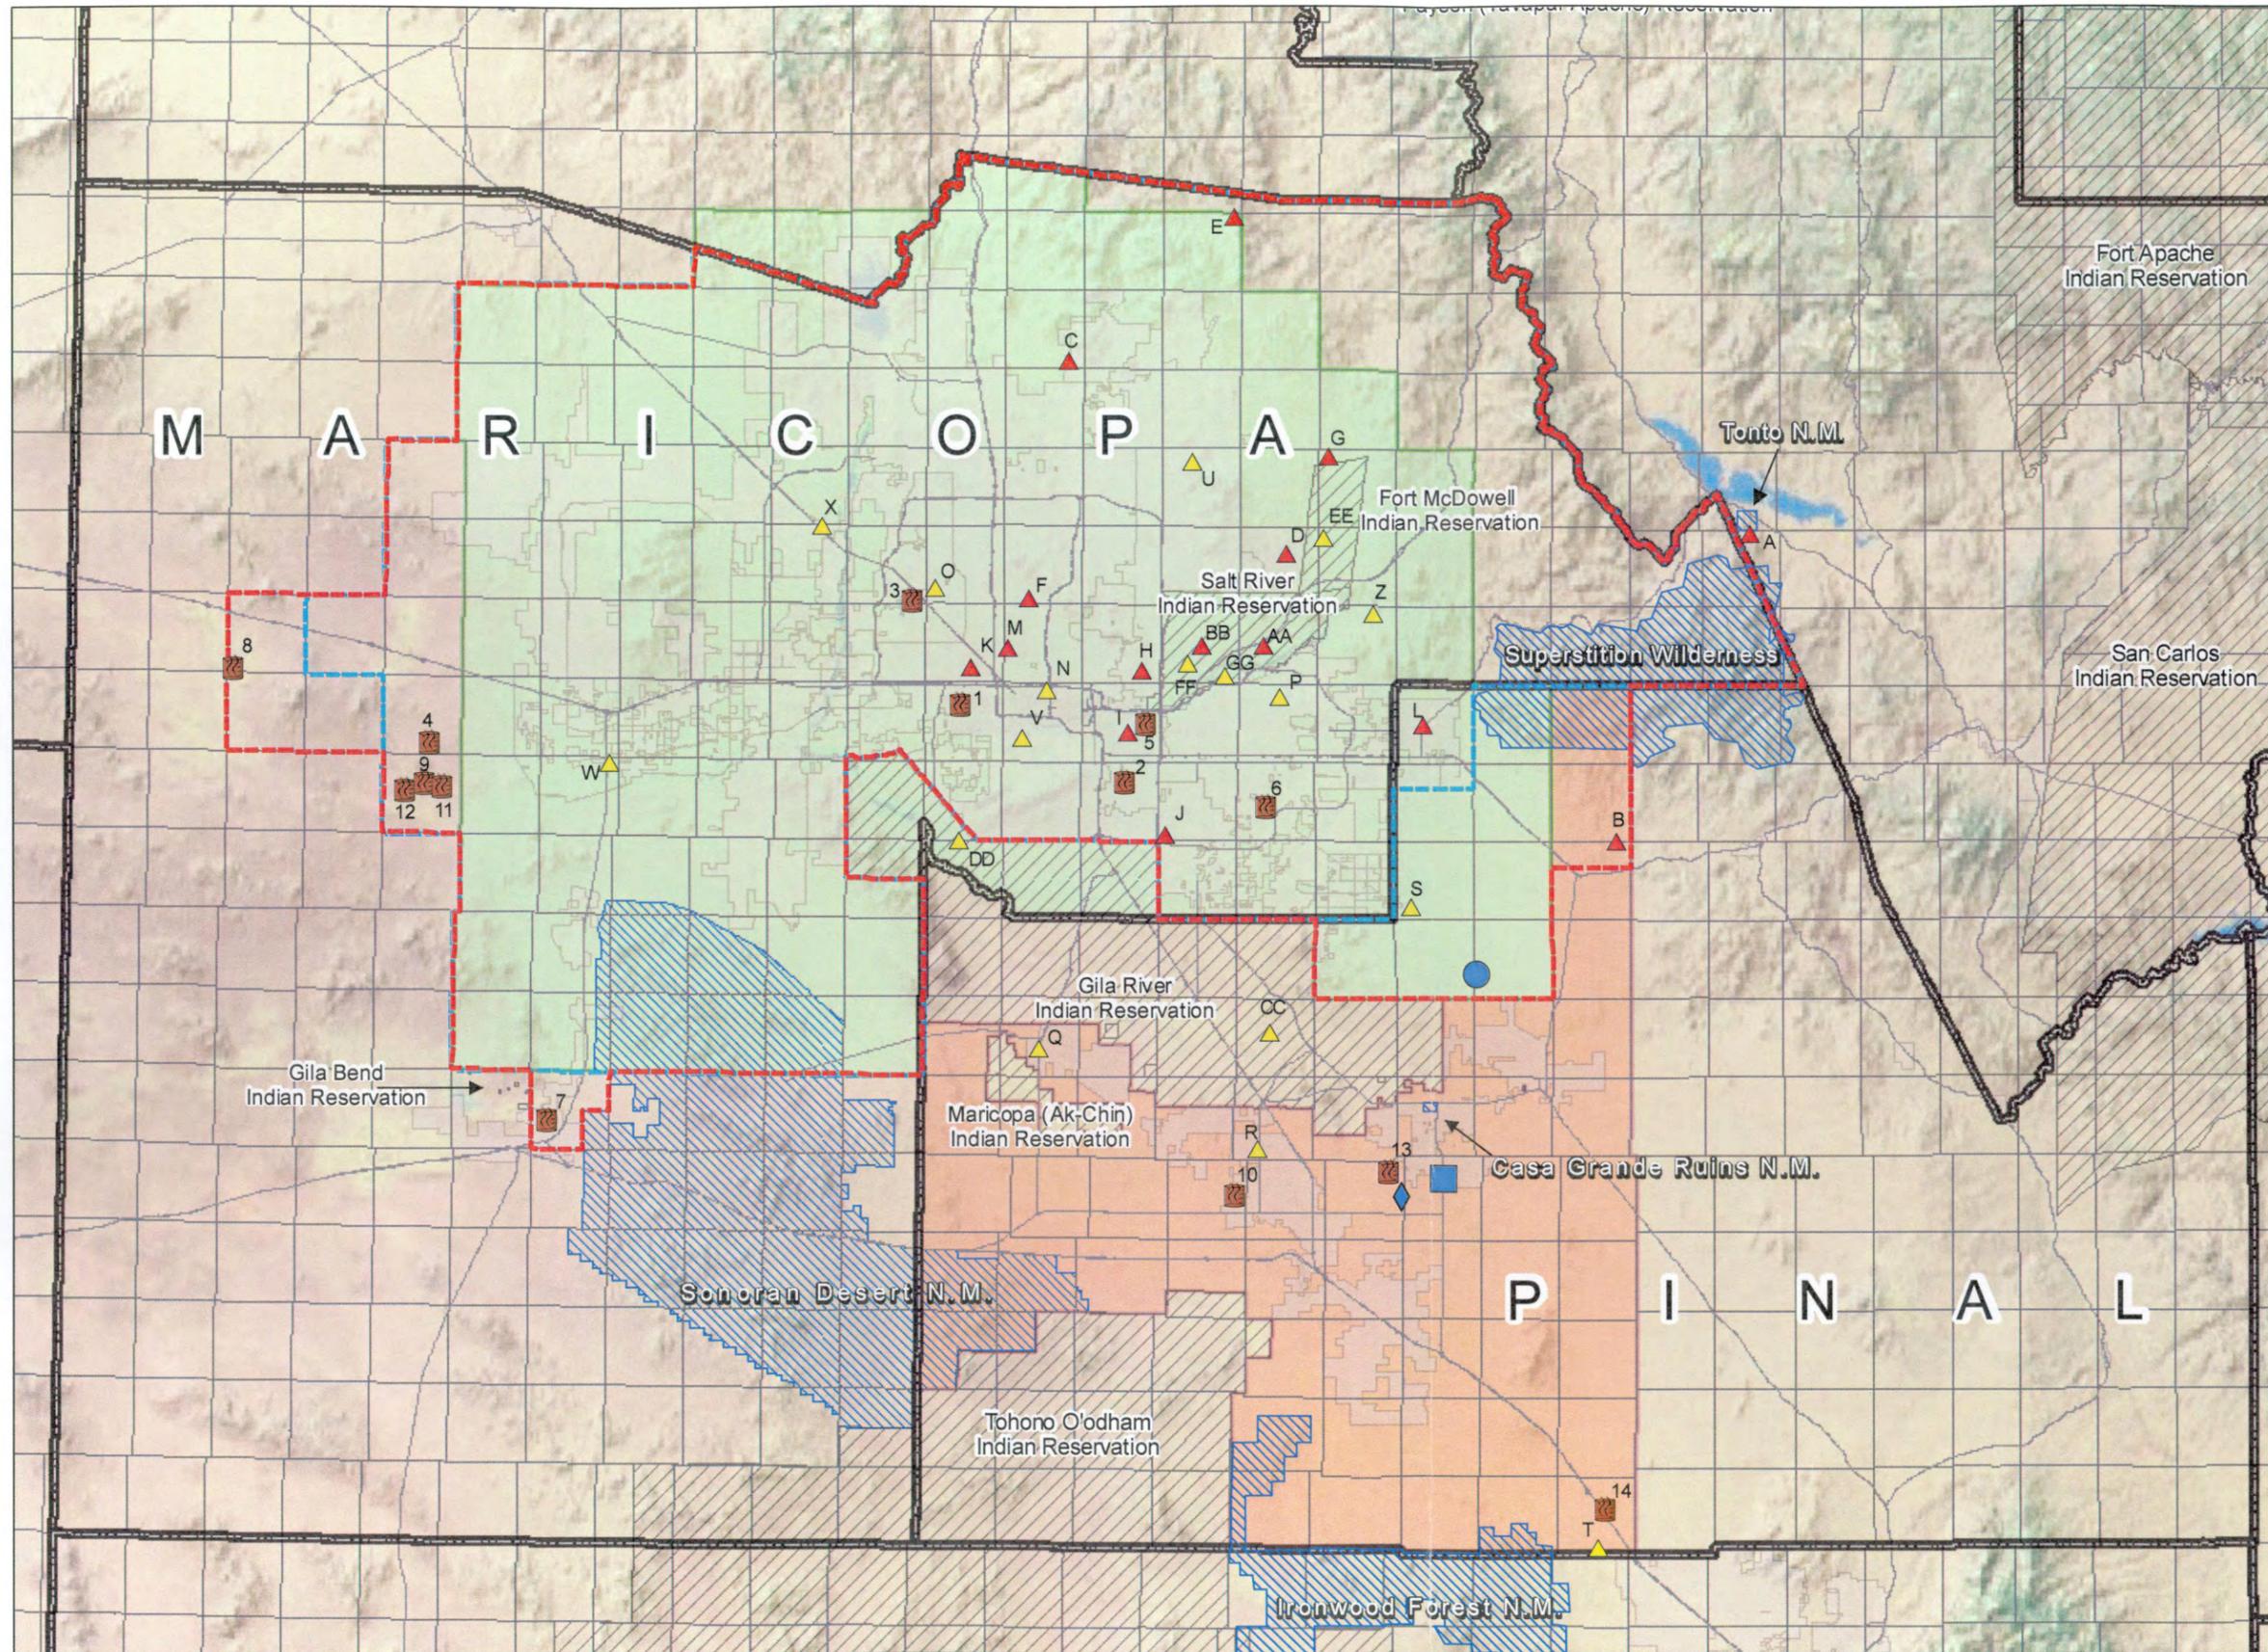

On February 12, 2009, ADEQ conducted a general stakeholder meeting to discuss the data used to conduct the evaluation and a Proposed Strawman Option for a Revised Eight-Hour Ozone Nonattainment Area Boundary. The ADEQ is proposing to extend the boundary only where absolutely necessary. Specifically, ADEQ is proposing to include the New Harquahala Generating Project to the West, the Gila River Power Station to the Southwest, and also include the proposed Salt River Project Abel Power Natural Gas Generating Plant and the Queen Valley monitor to the Southeast which are in Pinal County (see attachment).

If the power plants are included in the nonattainment area boundary, they would be required to meet more stringent regulations such as Lowest Achievable Emission Rates and Offset Requirements. For example, new power plants or modifications to existing power plants which are major sources would have to reduce emissions to demonstrate a net air quality benefit. The existing power plants proposed for inclusion are already included in the MAG air quality modeling domain. In nonattainment areas, there are also more stringent requirements for business and industry. Businesses that would be impacted include wood furniture manufacturing; fiberglass boat manufacturing; semiconductor manufacturing; dry cleaning establishments; gasoline bulk plants; and gasoline service stations. Transportation conformity requirements would apply as well.

The deadline for submitting comments to ADEQ on the Strawman Option is the close of business on February 26, 2009. Following the consideration of comments, ADEQ will make a recommendation to the Governor. According to the EPA schedule, the Governor is required to recommend the nonattainment area boundaries by March 12, 2009. The EPA will notify states and tribal communities of any modifications to their recommendations by November 12, 2009. There will be an opportunity to submit additional information and comments. The final ozone boundary designations will be made by EPA by March 12, 2010. It is anticipated that new air quality plans would be due in 2013.

If you have any questions, please do not hesitate to contact me at (602) 254-6300.
